## **Acknowledgement**

This research would not have been possible without the many people who supported, advised, suggested, and encouraged me throughout this experience. In spite of finding my subject quite difficult to deal with sometimes, I have always enjoyed the moments I spend on this study and I worked with great devotion to understand the situation of girls trafficking survivors.

I would explicitly like to thank the girls that were the respondents of my research for their effort, input and trust. I was overwhelmed by your warm welcome and the amount of love and trust you have given me. Most importantly, I would like to thank you for the sparks you have lit in me by showing me your strength and courage. Thank you for that. I sincerely hope you will keep your strength and that all of your dreams will come true. The determination and wish to succeed in life I have seen in you brings hope to many of us.

I also want to express many thanks to the organization; I worked with *Shakti Samuha* for opening their doors to me and taking me serious in conducting my research. I admire and appreciate the work you do for improvements in the lives of girls trafficking survivors. I also want to express my gratitude to my supervisor Mr. Madhusudan Subedi, for guiding me, suggesting me and advising me to complete this study.

My special thanks go to my family members for their encouragement, motivation, and support during data collection, data entry, analysis and interpretation.

Finally, I would like to thank all those who directly or indirectly helped me while preparing this thesis.
