ACKNOWLEDGEMENT

In undertaking this research work, I have been helped and encouraged extremely by a number of teachers and my colleagues and friends. First and foremost, I would like to express my sincere gratitude to my respected supervisor Prof. Dr. K.D. Manandhar for the existence of present dissertation work. His support and encouragement has played seminal role during the tedious process of providing concrete shape to my thoughts. Any attempt to extend my gratitude to him in words is actually inadequate.

Thanks to all the teachers and staff of the Shanker Dev Campus for their moral support and intellectual assistance.

I am wholeheartedly grateful to my parents without their assistance and inspiration getting this state in my life will be impossible.

Last but not least, I would like to thank my all friend, especially Ms. Geeta Basnet for her continuous encouragement and contribution to complete the research work.

Manju Shrestha
