Acknowledgements

This study was undertaken in partial fulfillment of the requirements for the Masters' Degree of Arts in Rural Development and was submitted to the Department of Rural Development, Tribhuvan University for the same. The field work was carried out in various parts of Kathmandu mainly at streets, junctions and waste disposal sites of urban dwellings of Kathmandu Metropolis as the purpose of the study was to explore the socio-economic status of child scavengers in Kathmandu city.

There were many people who helped and encouraged me open-heartedly to make this study a success. An expression of gratitude is due to all of them. A special thanks to Mr.Chiranjibi Yadav, who tirelessly helped me in data collection and continuously back supported me with enthusiasm and encouraged me to accomplish this task.

Profound gratitude is also due to my respected teacher and supervisor Dr. Keshav Khadka, Prof. Dr. Pradeep Khadka (HOD, Department of Rural Development) who initially helped me in selecting the research methodology and then went on to provide invaluable guidance, moral support and encouragement during my research work and writing of the final report. Without his generous efforts, this study could not have been conducted.

Thanks to all the respected teachers of the Department of Rural Development, Tribhuvan University for their continued advice and encouragement.

The biggest thanks of all must go to the street scavengers, who opened up their lives and, in the process, helped in the battle against child labour and homelessness.
