

OPEN SOURCE SOFTWARE (OSS) FOR LIBRARY MANAGEMENT - A STUDY

A DISSERTATION SUBMITTED IN PARTIAL FULFILLMENT FOR
ASSOCIATESHIP IN INFORMATION SCIENCE (2008-2010)

Under the Guidance of
Dr. M. Natarajan
Scientist, NISCAIR

Submitted by
Lal Bahadur Chouhan
AIS (2008-2010)
August, 2010

**NATIONAL INSTITUTE OF SCIENCE COMMUNICATION AND
INFORMATION RESOURCES (NISCAIR), CSIR**

**14, SATSANG VIHAR MARG
NEW DELHI-110067**

CERTIFICATE

This is to certify that Mr. Lal Bahadur Chouhan, AIS Student (2008-2010) has prepared his dissertation entitled “**Open Source Software (OSS) for Library Management - a Study**” under my guidance for partial fulfillment for the award of Associateship in Information Science, a two year post-graduate level course, conducted by National Institute of Science Communication and Information Resources (NISCAIR), CSIR, New Delhi, India.

To the best of my knowledge the work is original and has not been submitted elsewhere.

Dated:

Dr. M. Natarajan
Scientist “F”
ETD, NISCAIR, CSIR
14, Satsang Vihar Marg
New Delhi-110067

ACKNOWLEDGEMENT

This dissertation could not have been completed without the support and guidance of a number of individuals and organizations. I would therefore, like to express my sincere gratitude to them. My supervisor, Dr. M. Natarajan, Scientist “F”, NISCAIR for his guidance and support enabled me to complete the dissertation in time. I would like to express my gratitude to Ms. V. V. Laxmi, the then Coordinator SAARC Documentation Centre (SDC), and New Delhi.

I would like to thank the following respected teachers’ Mrs. Renu Arora, Head-ETD and Faculty members Mr. G. Mahesh, Mr. Mukesh Pund, Mr. Salim Ansari and Dr. B. K. Sen, Dr. T. K. Jain, NISCAIR, New Delhi.

I would like to express my gratitude to Mr. Krishna Mani Bhandary, Chief Librarian, Tribhuvan University Central Library who has given me an opportunity to study AIS Course, in NISCAIR, New Delhi. I would like too many thanks to Mr. Bishwa Raj Gautam, General Secretary, Nepal Library Association who has helped me for preparation of this dissertation.

I would also like to express my thanks to Dr. Mohan Raj Pradhan, HealthNet Nepal, Mr. Rudra Prasad Dulal, Dr. Madhusudan Karki, Head TULISD, Mr. Jagadish Chandra Aryal - SSBL, Mr. Pradeep Bhattarai - NNL, Mr. Anil Jha - ICIMOD Library, Ms. Neerana Shakya - Unesco Library, Mr. Ashok Thapa - MPP, Ms. Upasana Pandit, Mrs. Bidya Sharma-Martin Chautari, TUCL family, everyone who are actively participated in the questionnaire and interview that were conducted as part of this study and, to everyone who has contributed to free and open source software.

I would also like to thank Mr. Abdur Razzak, PRO, BCSIR, Bangladesh, Mr. B. S. Singh, SDC, NISCAIR, National Science Library Family and colleagues of AIS.

Finally, I would like to express my deepest thanks to my parents, brothers, wife Muna and son Adarsha Chauhan who have supported me during the AIS Course (2008-2010).

Lal Bahadur Chouhan

PREFACE

This study presents the open source software (OSS) for library management- a study. It focuses on the evaluation of OSS on the basis of certain important checkpoints. It also highlights the importance of library automation, library activities and services.

Due to the enormous explosion of information, the quantity, variety and complexity of information is being increased rapidly in every field of knowledge. To control and dissemination of this overwhelming flow of information as well as to meet the requirements of the user community, a library professionals should apply the advanced technology in a library and information centers. Computer technology and the availability of electronic databases have increased access to information at an exceptional rate. All libraries must strategically plan in order to meet the demands of patrons wishing to use new technology to access information from databases worldwide.

Open source emerged as an alternative model of software development. It has revolutionized the development of software and offers a number of attractions for libraries, especially for developing countries. Open source software (OSS) is computer software whose source code is available under a license that permits users to use, change, and improve the software, and to redistribute it in modified or unmodified form.

Open Source Software represents in existing opportunity for libraries, and major shift in software design. Open Source allows that library to participate directly in the development of its systems and services in a manner consistent with the value of librarianship. Today, there is great demand, challenges and opportunities for librarians to develop library database for worldwide access not only bibliographic but also full text.

To offer the complete satisfaction of users and perform the library activities and functions, we must select competent and suitable software which can meet out our requirements. Therefore, librarians and information professionals must keep in mind some basic aspects before selection of library software. Therefore, an evaluation of appropriate software is very much needed for any libraries for user friendliness, efficiency and cost effectiveness. Comparison provides us the basis on which to choose between alternative. So an evaluation is basically a judgment of worth.

However, software selection is a very complicated issue, on the observation of experts the discussion should be made by the selection committee for its suitability. This study will provide guidelines in the selection or development of appropriate OSS to Nepalese librarians.

The present study examines the ways which library management software have changed the libraries in Nepal over the last few decades, and speculates about further changes to come.

The study has been divided in to seven chapters. Chapter one describes the background, introduction, objectives, problems, limitation, scope, importance and methodology of the study. Chapter second provides literature review of related topic published from the country and abroad. The knowledge and experiences of library professionals and specialists presented in documentary and electronic forms such as books, reports, articles, thesis, internet resources etc. are critically reviewed. The sayings and opinions of the experts are coated in different places according to their relevancy. The third chapter provides focus of the study, which are four libraries i. e. TUCL, SSBL, NNL, ICIMOD. Their introduction, objectives, used database etc. Chapter fourth presents the focus of the OSS which is being used in Nepal for library management. The fifth chapter represents research methodology. Chapter six represents analysis and presentation of data. Chapter seven has highlighted certain findings and conclusion of the study.

TABLE OF CONTENTS

	Page No.
Certificate	ii
Acknowledgement	iii
Preface	iv
Table of Contents	vi
List of Tables	ix
List of Figures	x
List of Abbreviation	xi
Chapter -One	
1. Background	1
1.1 Library	1
1.2 Automation	2
1.3 Library Automation	3
1.4 History of Library Automation	4
1.5 New Trend	7
1.6 Software	8
1.7 Open Source Software (OSS)	10
1.8 Proprietary/Commercial	11
1.9 Freeware	11
2. Problem of the Study	12
3. Objectives of the Study	12
4. Scope of the Study	13
5. Limitation of the Study	13
6. Methodology	14
7. Importance of the Study	14
8. Organization of the Study	15

Chapter – Two

2. Review of Literature 16

Chapter -Three

3. Focused Libraries under Study 23
- 3.1 Tribhuvan University Central Library (TUCL) 23
 - 3.2 Nepal National Library (NNL) 28
 - 3.3 Social Science Baha Library (SSBL) 30
 - 3.4 ICIMOD Library 33

Chapter – Four

4. Focused software under Study 36
- 4.1 Open Source Software (OSS) 36
 - 4.2 CDS/ISIS and WINISIS 37
 - 4.3 KOHA 39
 - 4.4 Greenstone Digital Library Software (GSDL) 42
 - 4.5 Open Journal System (OJS) 45
 - 4.6 Status of OSS used in libraries 47

Chapter - Five

5. Research Methodology 50
- 5.1 Research Design 50
 - 5.2 Population 51
 - 5.3 Sampling Procedure 51
 - 5.4 Data Collection Procedure / tools 51
 - 5.4.1 Questionnaire Method 52
 - 5.4.2 Interview Method 52
 - 5.4.3 Data Analysis Procedure 52

Chapter – Six

6.	Data presentation and analysis	53
6.1	Presentation of the Data	54

Chapter - Seven

7.	Findings and Conclusion	69
7.1	Findings	69
7.2	Conclusion	72

	Bibliography	74
