## ACKNOWLEDGEMENTS

Many thanks go to my reverend Guru Komal Dhital, Associate Professor, Central Department of Economics who graced me with precious support to complete my research. I am also indebted to all teachers of Central Department of Economics well.

Further, since this research is an aftermath of consolidated contribution of the various government institutions, both in Sikkim (Central State Library of Sikkim) and Nepal, I would like to express my gratitude towards them. Nevertheless, I would like to express the same to all those households which provided useful information requisite for making this thesis worthy.

I am also thankful to Mr. J. R. Subba, Principal Director of Horticulture (Government of Sikkim), who supported and provided various materials without which this thesis would had been blurred in spirit. I would further, like to thank my intimate colleagues for their priceless support and encouragement in this thesis work. In this regard I acknowledge the incessant assistance, both physical and mental, that I received from my friend Mr. Santosh Upadhyay and Mr. Uttam Kumar Rai.

The real importance of various institutions and organizations which I could come to know was only during my research in this paper. Many institutions in both Kathm-ndu and Sikkim are salubrious in this regard.

Finally, I would also like to express my gratitude towards my loving parents, Uncle Mr. Raju, Aunt Mrs. Babita Limboo and my family for their valuable support, encouragement and provision of suitable environment, especially my younger brother Mr. C. S. Limboo.

**Bhim Bahadur Limboo**
