RECOMMENDATION

This is to certify that the thesis

Submitted by

Ramkripal Mahato

Entitled

Fertility Behaviour of Kami Community

is Recommended for External Examination

Prof. Dr. Ram Sharan Pathak

(Thesis Supervisor)

.....

Date: July 2011

VIVA-VOCE SHEET

We have conducted the viva-voce examination of the thesis

Submitted by

Ram Kripal Mahato

Entitled

Fertility Behaviour of Kami Community

and find that the thesis to be an independent work of the written according to the prescribed format. We accept the thesis as the partial fulfillment of the requirements for Master of Arts in Population Studies.

Evaluation Committee:

Prof. Dr. Prem Singh Bisht

Head, Central Department of Population Studies

Pro. Dr. Ram Sharan Pathak

Thesis Supervisor

Mr. Bijaya Mani Devkota

(External Examiner)

Date: July 2011

ACKNOWLEDGEMENTS

I am perfectly indebted to Dr. Ram Sharan Pathak, Professor, CDPS, for his guidance and co-operation. Without his intellectual guidance, accomplishment of this task would have been beyond the imagination.

I would like to express my sincere gratitude to Prof. Dr. Prem Singh Bisht, head of the Central Department of Population Studies, T.U. for his encouragement and valuable suggestion for completing this dissertation.

I express my gratitude to external examiner, Mr. Bijay Mani Devkota who helped me grateful suggestion to accomplishing of the study and further, I am also thankful to Mr. Govinda Subedi, Lecturer, CDPS, for his enthusiastic encouragement and other faculty members of CDPS for their help in various stages of this study.

My thanks goes to librarian, Giriraj Dahal, Indra Giri, Bheshraj Gautam and my classmates for their co-operation during the completion of this dissertation.

Last but not least, I must pay my gratitude to my wife Kamala Mahato and my loving daughter Nisha Mahato who provided opportunities and helped me to collect data and all those who helped me to carry out this work.

July 2011

Ram Kripal Mahato

ABSTRACT

The study aims to examine the fertility behaviour of Kami Community a socio-economically and politically impoverished caste/ethnic group of Nepal scattered in the hill belt. It presents the findings from analyses of interviewed data from Phungling VDC, Taplejung district. The study sample induced 134 eligible women of reproductive age group from total 132 household of Kami with 721 entire family members. Data were obtained on household and individual information related to explain fertility performance from the survey conducted during January, 2011.

Analysis of fertility behaviour were carried out by using cross tables, mean tables with selected dependent and independent variables. Children Ever Born (CEB) is used as an indicator of fertility behaviour.

Among the total Kamis male constitutes 49.24 percent and the sex ratio is 96.94. High concentration of population seems in the age group 10-14 years, 15-19 years and 5-9 years i.e. 13.73 percent, 13.31 percent and 13.18 percent respectively. About 57 percent people were in the married category having about 1 percent higher of females. Out of the total eligible women, 31.35 percent were married within the age of 15-16 years. The literacy rate of Kami was 77.16 percent of this VDC but only 59.70 eligible women were literate. Out of literate eligible women 22.5 percent had informal education and 30 percent had primary education. The people were dominantly involved as wage labour in agricultural and non-agricultural sectors both, Out of total eligible women, 79.10 percent had knowledge about family planning method. 70.15 percent were found current users any one of the method of contraception out of total ever users 63.21 percent.

High fertility culture was shown by Kami People women of age group 45-49years had 3.33 mean CEB. Lower fertility behaviour was associated with literate and having higher age at marriage. Higher fertility behaviour was associated with wage labour and contraception use showed lower mean CEB.

It is argued that fertility remains high due to high child mortality. High fertility has ensured high dependency and burden. Similarly current distribution of population towards the younger ages would result high fertility level in some years to come.

CHAPTER ONE

INTRODUCTION	1-6
1.1 Background to the Study	1
1.2 Statement of the Problem	3
1.3 Significance of the Study	4
1.4 Objectives of the Study	5
1.5 Limitation of the Study	6
1.6 Organization of the Study	6

CHAPTER TWO

LITERATURE REVIEW	7-16
2.1 Theoretical Literature	7
2.2 Empirical Literature Review	10
2.2.1 Age at Marriage and Fertility	10
2.2.2 Education and Fertility	12
2.2.3 Occupation and Fertility	12
2.2.4 Child Loss and Fertility	13
2.2.5 Contraceptive Use and Fertility	14
2.3 Conceptual Framework	15

CHAPTER THREE

RESEARCH METHODOLOGY	17-19
3.1 Selection of the Study Area	17
3.2 Sample Selection	17
3.3 Source of Data	17
3.4 The Respondents	18
3.5 Questionnaire Design	18
3.6 Data collection	19
3.7 Data Processing and Presentation	19

CHAPTER FOUR

AN INTRODUCTION OF STUDY AREA AND CHARACRERISTICS OF THE STUDY POPULATION	20-39
4.1 Location and Physiography	20
4.1.1 Wardwise distribution of household	20
4.1.2 Distribution of female headed household	21
4.1.3 Climate and Precipitation	22
4.1.4 The economy	22
4.1.5 Health	22
4.1.6 Education	23
4.2 Demographic Characteristic	23
4.2.1 Age Sex Composition	23
4.2.2 Sex Ratio	24
4.2.3 Population Pyramid	26
4.2.4 Cultural and Spatial Distribution	27
4.2.5 Nuptiality Characteristics	28
4.2.6 Marital Status of Eligible Women	28
4.2.7 Age at Marriage of Eligible Women	29
4.3 Socio- Economic Characteristics	30
4.3.1 Educational Characteristics	30
4.3.2 Occupational Status of the Study Population	31
4.3.3 Occupational Status of Eligible Women	32
4.3.4 Husband's Occupation	33

4.3.5	Distribution of Household by Income	34
4.3.6	Access to Drinking Water and Sanitation Facility	35
4.3.6.1	Source of Drinking Water	35
4.3.6.2	Latrine/Toilet Facility	35
4.4	Family Planning Characteristics	35
4.4.1	Contraceptive Knowledge of Respondents	35
4.4.2	Source/Media of Knowledge about Family Planning Method	36
4.4.3	Use and Non use of Family Planning Method	37
CHAPTER FIVE		
FERTILITY LEVEL BY DEMOGRAPHIC AND SOCIO- ECONOMIC CHARACTERISTIC		40-48
5.1	Mean CEB by Current Age	40
5.2	Mean CEB and Literacy Status	42
5.3	Mean CEB and Age at Marriage	42
5.4	Mean CEB by Occupation	43
5.5	Mean CEB and Use and Non-use of Contraception	44
5.6	Mean CEB and Child Loss Experience of Respondent	45
5.7	Mean CEB by Ideal Number of Children	46
5.8	Mean CEB by Husband's Occupation	47
CHAPTER SIX		
SUMMARY, CONCLUSIONS AND RECOMMENDATIONS		49-54
6.1	Summary	49
6.2	Conclusion	51
6.2.1	Age at Marriage and Fertility	52
6.2.2	Child Loss and Fertility	52
6.2.3	Literacy Status of Women and Fertility	52
6.2.4	Occupation of Women and Fertility	52
6.2.5	Ever User of Contraception and Fertility	52
6.3	Recommendations	52
6.3.1	Recommendation for Policy Implications	53
6.3.2	Recommendation for Future Research Issues	54
