ACKNOWLEDGEMENT

Writing a thesis in M.B.S. (Master Degree's in Business Studies) second year is compulsory work for every student in order to development research capability and translate theoretical knowledge into the actual practice in analyzing the specific issues related to Nepalese share market concerns such as right share offering. The objective of this thesis is to acquire a practical knowledge to undertake independent analysis and appraisal to the situation. So, I am thankful to Tribhuvan University Faculty of Management for providing me such opportunity to experience the practical knowledge of my subject. I try my best to give the readers a bird's eye view of this thesis and enable them to locate quill each section of it to find out the right offering & its impact on stock price in Nepalese Market.

This work would not have come in this form without the precious guidance, continuous recommendation and inspiration of Prof. Dr. K. D. Manandhar and Dhurba Subedi. Their supervision has highly encouraged me to complete this research, which is ineffable.

Finally I would like to express my deep appreciation and acknowledgements to all my friends and family for giving full support and courage in writing this thesis.

Kiran Mahajran
