Acknowledgement

Conducting a research is always a matter of interest and pride. A good research requires an adequate body of knowledge, information search, effective analysis and good organization of the study and findings. All of those requires a lot of perspiration and guidance; specially, for a new researcher like me.

Selecting a topic of stock market analysis was never new. But the way of analysis and the findings of the fact make this study different than others. The guidance of Mr. Kishor Maharjan, my thesis supervisor, has been vital to bring this study to a successful finishing.

Further, I am thankful to Mr. Uday Niraula, CIT College, Mr. Ramesh Niraula, Nepal stock market investor and some of my friends for their co-operation and valuable suggestions.
