## ACKNOWLEDGMENTS

Simple words cannot express my profound and spontaneous feeling of deep gratitude, obligation, regard and indebtedness to my worthily revered and learned guide Associate Lecturer who in spite of his busy schedule and commitments had extended careful guidance, precious advice and constructive feedback along with invaluable tips and remained as a constant source of inspiration throughout this work. For his affectionate treatment and inspiring guidance formal expression of gratitude is a poor substitution.

I also owe my gratitude to all the lecturers of Central Department of Sociology/Anthropology and Non-teaching staff without their direct or indirect help this work would not have been completed.
