

**Taxonomic Studies on Dung Beetles (Coleoptera:
Scarabaeidae: Coprinae) of Dhanusha District,
Nepal**

THESIS

**Submitted to the Central Department of Zoology, Institute
of Science and Technology, Tribhuvan University,
Kathmandu, Nepal
for the degree of
Doctor of Philosophy
in
Zoology**

**By
Shyam Prasad Mahto
November, 2010**

CERTIFICATE

This is to certify that **Mr. Shyam Prasad Mahto** worked under my supervision and guidance for the Ph.D. degree on the problem entitled "**Taxonomic Studies on Dung Beetles (Coleoptera: Scarabaeidae: Coprinae) of Dhanusha District, Nepal**". This is his original work and not submitted in any journals of other publication or for awarding any other degree.

(Dr. V.K. Thapa)

Professor

Central Department of Zoology

Tribhuvan University

Kathmandu, Nepal

ACKNOWLEDGEMENT

I am greatly indebted to Dr. V.K. Thapa, Professor (Retd.), Central Department of Zoology, Tribhuvan University, Kathmandu, Nepal, under whose able guidance the present study was carried out. I thank him for his inspiring and helping attitude and for sparing his valuable time for constructive criticism throughout the study.

I am indebted to Prof. Dr. B.N. Upreti and Prof. Dr. G.P.S. Ghimire, former Deans and Prof. Dr. Mukund Prasad Gajurel, Dean and Mr. Shri Bhadra Acharya, Deputy Administrator, Dean's Office, Institute of Science and Technology, TU, Kirtipur and other higher authorities for granting study leave and scholarship for the present work.

I am also grateful to Prof. Dr. T.K. Shrestha, Prof. Dr. S.B. Karki, Prof. Dr. Jiwan Shrestha and Prof. Dr. A.S. Tamrakar, former Heads and Prof. Dr. Ranjana Gupta, Head, Central Department of Zoology, TU, Kirtipur for their precious suggestions in the course of this work.

I am highly obliged to Dr. J.R. Alfred, Director, Zoological Survey of India, Kolkata for providing laboratory and library facilities.

I am very much obliged to Dr. P. Mukhopadhyay, Scientist-E, O/C, Coleoptera Section and Mr. S.K. Chatterjee, Zoologist, Coleoptera Section, ZSI, Kolkata for helping in verification and identification of dung beetles collected for the present work.

Thanks are also due to the authorities of Coprinid dung beetles in different countries who helped me by sending their most valuable research papers without which my work would have been incomplete.

A lot of thanks to my brother Dr. R.B. Mahato, friends Dr. V.K. Mahaseth, Mr. N.K. Prasad, R.P. Yadav and Mr. K.R. Mehta for their valuable suggestions and help.

I would like to express many thanks to my son Chandradeep Kumar Mahto and grand son Bipin Kumar Mahto, who helped me a lot during collection of beetles.

I would like to express many thanks to my daughter Nilam Mahto, who helped me a lot in setting and preserving the beetles.

At last, I would like to express many thanks to my wife Gulab Mahto, who encouraged me at every step of this work.

S.P. Mahto

ABSTRACT

The present paper deals with 45 species of 12 genera of Coprinae under Scarabaeidae from Dhanusha district of Nepal. A check-list of 104 species under 17 genera of dung beetles is presented from Nepal. Out of 45 species, 40 species under 12 genera are recorded for the first time from Dhanusha district. One genus, *Chironitis* Lansberge is recorded for the first time from Nepal. Sixteen species under seven genera (*Gymnopleurus parvus* Macl., *Catharsius birmanensis* L., *C. capucinus* F., *Copris magicus* Har., *C. sinicus* Hope, *C. repertus* Walk., *Phalops divisus* Wied., *Onthophagus tarandus* F., *O. sternalis* Arrow, *O. atropolitus* d' Orb., *O. armatus* Bl., *O. purpurascens* Bouc., *O. mopsus* F., *O. duporti* Bouc., *Onitis philemon* F., and *Chironitis indicus* Lansb) are recorded for the first time from Nepal,. Out of total 17 genera, the genus *Onthophagus* Latr. appears to be the most predominant in Nepal being represented by 51 species, while some of the genera *Scarabaeus* L., *Gymnopleurus* Illg., *Sisyphus* Latr., *Heliocopris* Burm., *Phalops* Er., and *Drepanocerus* Kirby appear to be extremely uncommon, each being represented by only few species. Detailed descriptions of the genera, species and keys for identifications have been given in the text along with suitable illustrations.
