NUMERAL SYSTEM IN MAITHILI

A Thesis

**Submitted to Central Department of Linguistics
Faculty of Humanities and Social Sciences, Tribhuvan University
In Partial Fulfillment of the Requirements for
Master's Degree
in
Linguistics**

By

Om Prakash Yadav

Exam Roll No.: 281865

T.U. Regd. No. : 6-2-12-488-2003

**Central Department of Linguistics
Tribhuvan University, Kirtipur, Kathmandu**

2011

LETTER OF RECOMMENDATION

This is to certify that **Mr. Om Prakash Yadav** has completed this thesis on the topic **NUMERAL SYSTEM IN MAITHILI** under my guidance and supervision. I recommend this thesis for evaluation.

ACKNOWLEDGEMENTS

First and foremost, I owe a great deal to Dr. Dan Raj Regmi, the Head of the Central Department of Linguistics, T. U. for his constant guidance, insightful comments and genuine encouragement in preparation of this thesis. Therefore, I would like to extend my hearty gratitude to him time and again.

Likewise, I would like to extend my most sincere gratitude to my guru Prof. Dr. Yogendra Prasad Yadava for providing valuable materials, necessary suggestions, cooperation, creative appreciation and perennial inspiration. I am indebted to Prof. Dr. Yadava, whose inspiration, encouragement, enforcement, and feedback proved a boon to me for the preparation of this dissertation.

I can't forget the inspirations and guidelines of Prof. Dr. Madhav P Pokhrel, Mr. Balaram Parsain, Mr. Ram Raj Lohani, Mr. Bhim Lal Gautam, and Mr. Dubinand Dhakal, and all the teachers as well as staff of Central Department of Linguistics for their helps and support.

Similarly, I would like to thank informants' Mr. Dev Narayan Yadav, lecturer of the Patan campus, Mr. Indresh Thakur, Dharmendra Yadav, Santosh Yadav and Aditya Pal and my colleagues Binod, Surya, Sudip, Rajeev, and Asokanand for their direct and indirect contribution and suggestions. I should also mention the help of Amita Madam of the Department library of the Central Department of Linguistics, and the personnel of the Central Library of Tribhuvan University.

My spouse Anju also deserves my special thanks for her love and various types of help she made in the preparation of this work. There are many people who have helped me in this work. I must not fail to appreciate their help.

Finally, I express my deep gratitude to my parents, grandparents, uncle, aunt, my brothers, and all the members of my family whose incessant blessings and support are the sole source of inspiration to me to have this position.

Om Prakash Yadav

ABSTRACT

This work entitled 'Numeral system in Maithili' attempts to describe the phonological, morphological, syntactical, and semantically analysis of numerals in Maithili.

The whole study consists of four chapters whereby the first chapter presents the introduction of the Maithili language. Maithili is a New Indo-Aryan language with SOV word order. It is spoken by a total of about 30 million people in the eastern and north regions of the Bihar state of the north India and south eastern plains, known as the Tarai of Nepal. It is the second major language of Nepal. This first chapter consists of statement of the problem, objectives of the study, review of the literature, significance of the study, and the organization of the study.

The second chapter presents the concept of conceptual background of the numeral system for Maithili. Normally, numeral is a symbol, a word or group of symbols, a word or a figure in a natural language that represents a number, 0, 1, 2, 3, 4, 5, 6, 7, 8, and 9. The third chapter deals with phonological, morphological, syntactic, and semantic analysis of numeral in Maithili. The Maithili cardinal numbers respond to the vowel-raising rule of generative phonology that raises a mid-low or a mid-high vowel one notch up (viz. E, O, e and o → e, o, i and u respectively) which is followed by a high vowel (viz. i or u) in the immediately following syllable. The permissible syllable cannon in Maithili numeral is CCVC. The Maithili morphology is classified into two categories-basic and derived. There are two classifiers: *-tā* and *-got* and two clitics: *-e* and *-o* in the Maithili language. The Maithili syntactic in/definiteness construction involving cardinal number classifiers, numerals and their order reversal in terms of three points in/definiteness scale, viz. definiteness, antidefiniteness, and indefiniteness have also been discussed in this chapter. In Maithili, the semantics of cardinal numbers expresses three types of concepts: exact quantification, approximate quantification, and non-quantification. This chapter also analyzes the regarding numbers; these can be classified according to their use in Maithili. The last chapter summarizes the whole thesis and presents a brief conclusion.
