Acknowledgements

Though the study on `The Verb Morphology of Byansi Language` took about two years long time which has now come to the end. As a fresh researcher I have been faced with several problems and difficulties to complete it. However the helpful hands extended to me with hospitability and warmth at that moment which will throb in my heart forever.

First of all my deepest debt of gratitude goes to my respected teacher and supervisor Balaram Prasain of central Department of Linguistics, TU, Kirtipur, inspired and advised me patiently to complete this thesis and recommended this language to be studied. Without his valuable suggestions and persistent encouragement this work would not have been completed. I am grateful to Prof. Dr. Yogendra P. Yadava, the Head of the Department, suggested and inspired me to complete this thesis and permitted this language to be studied. I am grateful to Prof. Dr. Madhav Prasad Pokharel, senior professor of the Department, who guided me about phonological rules and analysis. I am indebted to renowned language researcher Sueyoshi Toba, who gave me valuable suggestions and materials related to this language. I am grateful to Central Department of Linguistics and all its members.

To language teachers, Miss Kabita Budhathoki and Gopal Singh Bohara, I owe more than I can say. And finally I am grateful to all my classmates as well.
