

CHAPTER ONE

INTRODUCTION

1.1 General Background

Language is a means of communication. It is language that makes human communication possible. Language is a bridge which keeps link between the messenger and the receivers. That is to say, a piece of message is delivered through language.

Language cannot be limited in a single definition. Different scholars define language variously at different time and situation. For Traugott and Pratt (1980, p.1), "It is around us everywhere, in speech, writing, sign language, or simply in our mind as we dream, remember a conversation, or quietly think out a problem. It is a vehicle of power, a means by which we control, create, and preserve." Language is a set of symbols by which we communicate. It has enabled man to establish great civilization. It is responsible for social policy, mobility and stratification. According to Sapir (1921), "Language is a purely human and non-instinctive method of communicating ideas, emotions and desires by means of a system of voluntarily produced symbols." (Pandey, 2008, p.1)

Language is the system of communication in speech and writing that is used by people of a particular country or area. Finochhiaro (1964) defines language as a system of arbitrary, vocal symbols which permit all people in a given culture or other people who have learned the system of that culture, to communicate or to interact. (as cited in Brown 1994a, p.4). Wardhaugh (1972 p.3), defines language as a "system of arbitrary vocal symbols used for human communication".

Richards, Platt and Platt (1985) state, "Language is a system of human communication by means of a structured arrangement of sounds to form larger units, e.g. morpheme, words, sentences" (p. 31).

Language is a very important means of human communication. Gesture, tactile, olfactory, etc. are also the other means of communication. The English language unfolds the barriers laid among people who have different mother tongues and do not understand each other without using signals.

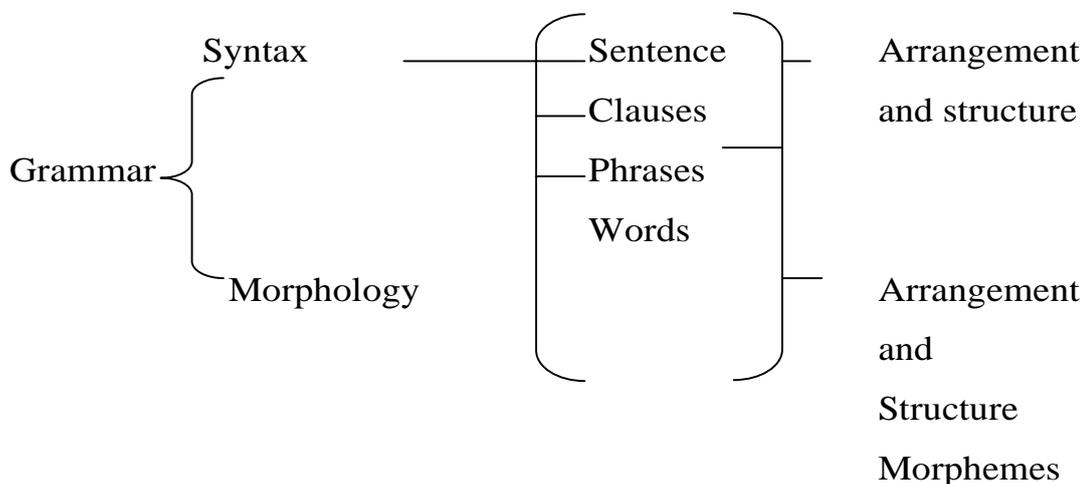

Various researches have been carried out by various scholars in different time span. The previous studies cover the large area of linguistics. A number of studies have been done on language and its usage. The language used in advertisement, posters, the message of congratulation, condolences, newspaper interviews, notices, etc. is easily available since it has already been studied. But it is very difficult to know what language is used in the certificates for none of the studies is centred on this very topic. A certificate contains different kinds of components but we cannot say what they are. We are still in puzzle what a certificate is. How to design a certificate and what language to use in it is the most challenging problem in the present day world. Therefore, the present study has been entitled 'Language used in certificates'. It aims to address the following questions:

- a. What is a certificate?
- b. What are the types of certificates?
- c. What language is used in certificates?
- d. What are the components of certificates?
- e. What is the importance of certificates?

Finally, the researcher believes that this study will be a guide for the language teachers, students, curriculum/ syllabus designers, certificate designers, writers, and the future researchers as well.

1.1.1 Morphology and Syntax

In restricted sense, grammar is considered having two layers, morphology and syntax. Grammar in its restricted sense is diagrammatically presented as follows:

Morphology studies how the words are formed. “Morphology deals with the internal structure of words.” (Lyons, 1971)

Morphology is the study of morpheme and its different categories, their function and formation. It is the study of forms, the internal form or structure of words. Hence it is defined as ‘the branch of grammar which studies the structure or forms of words primarily through the use of morpheme construct.

The word ‘syntax’ means ‘ordering together’. It is the study of sentence-building. Syntax is the grammar of sentences. It is the science of sentence construction. In the words of Fromkin, Rodman and Hyams (2009, P.159), "The part of grammar that represents a speaker's knowledge of sentence and their structure is called syntax." Morphology and syntax are related to each other in the sense that morphology studies how the words are formed and syntax studies how the sentences are formed.

1.1.2 Grammatical Units

Language is composed of various grammatical units viz. morpheme, word, phrase, clause and sentence.

1.1.2.1 Morpheme

Morpheme is the minimal unit of grammatical description in the sense that it cannot be segmented any further at the grammatical level of analysis. Morpheme is linguistic form that bears no partial phonetic-semantic resemblance to any other form. (Bloomfield, 1980) Hockett (1970) opines that morphemes are the smallest individually meaningful elements in the utterances of a language. Morpheme is the minimal grammatical unit.

1.1.2.2 Word

A word is a grammatical unit. Words can be grouped together into word classes.

Aarts and Aarts distinguish the word classes: Major and Minor.

i. Major word classes

Those words which have inevitable role in a sentence are called major words. They are also called open classes. In English, there are four major word classes: noun, adjective, adverb and verb.

a) Nouns

Nouns are words or group of words used as name of a class of people, place, and things or of a specific person, place or things. Traditionally, nouns are defined as words that denote people, animals, things or places. But the traditional definition of noun fails to address small creatures and insects that are different from animals in the world. This definition doesn't give any clear idea about the quality and abstract ideas, such as beauty, pain, expensiveness, peace, etc, as well. Yule (2006, P.74), views nouns are words used to refer to people (boy), objects (backpack), creatures (dog), places (school), qualities

(roughness), phenomena (earthquake) and abstract ideas (love) as if they were all things. Parrott (2010, P.9) states that noun describes a person, place, or thing. In fact we use nouns to express a range of additional meanings such as concepts, qualities, organizations, communities, sensations and events. A noun may be proper (that refers to person, place, institution, etc.), abstract (that refers to abstract ideas / things such as pain, happiness, beauty, etc.), material (e.g. gold, silver, water, etc.), collective (that refers to group name of persons, animals or things e.g. gang of thieves, herd of cows, bunch of flowers, etc.).

b) Adjectives

Adjectives are the words that describe or qualify a noun or pronoun. According to Yule (2006), "Adjectives are words used typically with noun, to provide more information about the 'things' referred to (happy people, large object, cute creature, stupid ideas)"(p.88). Likewise, Richards, Platt and Platt (1999) define, "Adjective is a word that describes the thing, quality, state, or action which a noun refers to." For example, *black in a black hat* is an adjective. (p.8).

Adjective can be identified through its certain characteristics. In this light, Aarts and Aarts (1986) put that:

Adjectives are comparative or superlative, attribute or predicative. We have some examples of adjectives such as beautiful girl, a green car, constructive criticism, honorable, greatest, unselfish, countless, academic, generous very, extremely, less (c.f. very helpful, extremely nasty, less interesting), good-better best, big-bigger-biggest ,etc.(p.28)

c) Adverbs

Adverbs are words that tell something about a verb, an adjective, another adverb or a sentence. According to Parrott (2010, P.61), "Adverbs are the words that modify a verb, an adjective or another adverb." Yule (2006, P.75)

opines that adverbs are words used, typically with verbs, to provide more information about actions, states, and events.

For Richards, et al. (1999),

Adverb is a word that describes or adds to the meaning of a word, an adjective, another adverb, or a sentence, and which answers, such a questions as how? Where? Or when? In English many adverbs have an – ly ending. For example, adverb of manner e.g. carefully, slowly, adverb of place e.g. here, there, locally, and adverb of time e.g. now, hourly, yesterday. (p.9)

d) Verbs

Verbs are words used to show an action which is taking place or to indicate the existence of a state or conditions, or the part of speech to which a word belongs to. Greenbaum (2006) defines, "Verbs (or main verbs) by themselves or preceded by auxiliaries (or auxiliary verb) function as the verb of a sentence or clause" (p.90). Yule (2006, P.75) defines verbs as the words used to refer to various kinds of actions and states involving people and things in events. Certify, like, has, bears, awarded, expresses, organized, passed, are some examples of verb. The forms of the verb are different. There are some derivational suffixes:

- en : broaden, lengthen, darken, and strengthen
- ify : certify, simplify, glorify, nullify
- ize/ise : economize, nationalize, scandalize

Most English verb can add four inflectional morphemes to the base:

1. Third person singular present tense indicative.
He cooks rice.
2. Past tense

He cooked rice.

3. -ed participle.

He has cooked rice.

4. -ing participle.

He is cooking.

ii. Minor word classes

Minor word classes are also called close word classes. In English there are seven minor word classes: Articles, prepositions, conjunctions, pronouns, numerals, quantifiers and interjections.

a) Articles

Articles are words used with noun that specifies whether the noun is definite or indefinite. Cowan (2008, P.211) mentions that articles are members of the larger class of pre-nominal modifiers known as determiners. Likewise, Richards, et al. (1999, P.21) define article as a word which is used with noun, and which shows whether the noun refers to something definite or something indefinite. According to Parrott (2010, P.26), "Articles are the parts of noun phrases and come at the beginning of them, either immediately before a noun or an adjective, or before a combination of adverb, adjective and noun." In the words of Yule (2006, P.75), "Articles are words (a, an, the) used with nouns to form noun phrases classifying those things (You can have a banana or an apple) or identifying them as already known (I'll take the apple)." (English has two types of articles, which function including as constituents of the noun phrase. The definite article is spelled 'the', the indefinite article is spelled 'a' (before consonant) or 'an' (before vowels).

b) Prepositions

Preposition is used with noun, pronoun and gerunds to link them grammatically to other words. According to Greenbaum (2006, P.91), "Prepositions (e.g. of, in) function as the first constituent of prepositional phrases and role typically

followed by noun phrases as their complements. They may be simple (consisting of one word, e.g. of, to) or complex (e.g. according to, as well as)". Yule (2006, P.75) states that prepositions are words used with nouns in phrases providing information about time, place and other connections involving actions and things. Preposition is a word or group of words. It is used before a noun or pronoun or sometimes with gerunds in order to show place, position, time or method of something. It is used to link noun, pronoun or gerunds grammatically to other words. For example:

-) The cat sat on the mat.
-) I am speaking on behalf of NELTA.
-) John was born on 1st April, 2011.

c) Conjunctions

Conjunction is a word that is used to link the sentence, clauses, phrases or words. According to Richards, et al.(1999), "Conjunction is a word which joins, words phrases, or clauses together, such as, but and, etc" (p. 77). Yule (2006, P.75) opines that conjunctions are words used to make connections and indicate relationships between events. So, conjunctions constitute a close class of words which do not vary in form on formal grounds.

d) Pronouns

Pronouns are words which may replace nouns or noun phrases. They are words that substitute for a noun or a noun phrase e.g. 'I', 'you', 'them', 'it', 'ours', 'which', 'myself' and 'anybody. According to Yule (2008), "Pronouns are words (me, they, he, himself, this, its) used in place of noun, phrases, typically referring to things already known"(p.88).

Pronoun is a word that is used to replace a noun or noun phrase to avoid the unnecessary repetitions of them in a sentence. This helps us to make language short, sweet, suit, and clear.

e) Numerals

Numerals are symbols or set of symbols used to present a number, e.g. the Arabic numeral 5, equivalent Roman numeral V, and the equivalent Binary numeral 101. Two sets of numerals can be distinguished: cardinal numerals (1, 2, 3.....100) and ordinal numerals (1st, 2nd, 3rd, 4th100th). Richard, et al. (1999) agrees, "Numeral is a word or phrase which is used to name a number" (P. 252).

f) Quantifiers

Quantifiers indicate the range of individual or items, referred to 'all', 'some' or 'most' with a logical meaning. As defined by Cowan (2009), "Quantifies are set of determiners that indicate an amount or number of something" (p.194). It constitutes a close word classes.

g) Interjections

Interjection is a sound, word, or phrase that expresses a strong emotion such as pain or surprise but otherwise has no meaning. Greenbaum (2006) defines interjections as exclamatory emotive words that are loosely attached to the rest of the sentence, e.g. ah!, ouch!, sh!, wow! (p.91). Interjections are used to express strong emotion such as surprise, disgust, joy, pleasure; pain etc. (Aarts and Aarts p. 59) Interjection has no meaning. Ah!, aha!, eh!, hi!, ugh!, wow!, yippee!, hey!, are some symbols to express the feeling. They are mainly used in informal language.

1.1.2.3 Phrase

A phrase is a group of words. It is one of the major units of grammatical description. Crystal (1985) views phrase as "a term used in grammatical analysis to refer to a single element of structure typically containing more than one word, and lacking the subject predicate structure typical of clause. Aarts & Aarts (p.60) enlist the following phrases:

a) Noun phrase

A noun phrase has a dominant member (the head) which can replace the entire phrase; a characteristic that the noun phrase shares with the adjective phrase and the adverb phrase. Example:

Every boy in my class who has read the article

b) Adjective phrase

An adjective phrase is phrase whose principal element is an adjective. Example:

John is *very worried* about his youngest son.

It was *so cold* that my fingers were numb.

c) Adverb phrase

An adverb phrase is a phrase whose principal element is an adverb. It is group of words which functions like an adverb. Example:

He reads *very quickly*.

She drives *carefully*.

He spoke *hesitatingly*.

d) Verb phrase

A verb phrase is word or a group of words with a verb as headword.

Every verb phrase has a dominant member, which is invariably a lexical verbs, the lexical verb is always the last constituent of the phrase. A verb phrase is a group of verbs that come together.

Example:

The good boys *read* the red book.

The good boys *are reading* the red book.

e) Prepositional phrase

A prepositional phrase can be defined as a group of words that begins with a preposition and ends usually with a noun. Example:

I go to school *by bus*.

The boy followed a girl *with a blue sari*.

1.1.2.4 Clause

A **clause** is a grammatical construction smaller than a sentence and larger than a phrase. It is a grammatical unit at a level between a phrase and a sentence. For Nordquist, (2014), "A *clause* is a group of words that contains a subject and a predicate." (www.grammar.about.com)

A clause is a group of words that includes a subject and a verb, and forms a sentence or part of a sentence. A clause can be classified into main / superordinate, coordinate and subordinate. A main clause can stand alone but subordinate / dependent clause cannot occur alone. It comes with an independent / main clause. Coordinate clauses have equal importance in a sentence: both of them can stand alone. These clauses are joined by coordinate conjunctions. Example:

She arrived. (Main clause)

She arrived after the rain started. (Subordinate clause)

Ram is boy and Sita is a girl. (Coordinate clause)

A clause may either be a noun clause or an adjective clause or an adverb clause. A **noun clause** is a group of words which consists of a finite verb and functions like a noun. An **adjective clause**, which is also known as a **relative clause**, relates back to a noun whose meaning it modifies. An **adverb clause** is a group of words which functions as an adverb. It always gives information about when, where, why, how or if an action occurred. Example:

He said that *he was very tired.* (Noun clause)

The boy who won the match is my brother. (Adjective clause)

When I arrived he was sleeping. (Adverb clause)

Keep it where we can *find it easily*. (Adverb clause)

1.1.2.5 Sentence

A sentence is a group of words, or a single word, that expresses a complete thought, feeling, or ideas. Traditional grammar defines a sentence as the expression of complete thought. In the words of Bloomfield, "Each sentence is an independent linguistic form, not included by virtue of any grammatical construction in any larger linguistic form." Simply, a sentence contains a subject and a predicate. It usually contains an explicit or, implied subject and a predicate containing a finite verb. In this light, Quirk, Greenbaum, Leech and Svartvik (2010), define sentence as:

The highest-ranking unit of grammar, and hence that the purpose of grammatical description of English is to define, by means of whatever descriptive apparatus may be necessary (rules, categories etc), what counts as a grammatical sentence in English. (p.47)

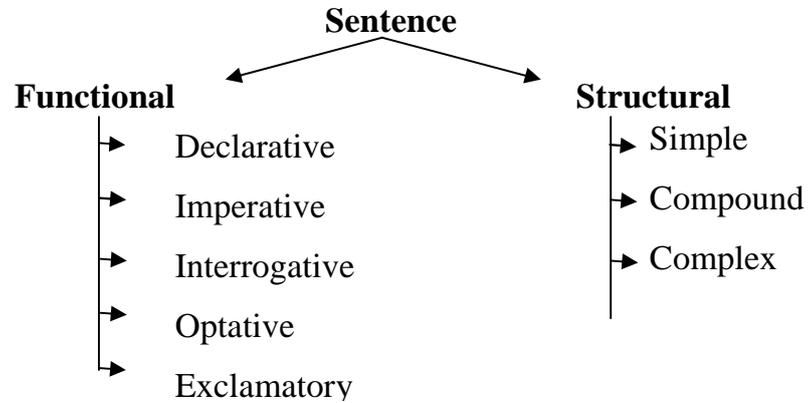

A sentence is the highest grammatical unit. It may be a group of words or even a single word but that is meaningful. It expresses a complete thought.

Aarts and Aarts (1986) are not the exception from above idea and they put that:

The sentence is placed at the other extreme of the rank scale and regarded as the largest unit of grammatical description since it does not function in the structure of a unit higher than itself. To treat the sentence as the highest unit implies that we do not take into account larger stretches of language such as paragraphs and text. (P.79)

Therefore, sentence is the largest unit of grammatical organization within which parts of speech (e.g. nouns, verbs, adverbs) and grammatical classes (e.g. word, phrase, and clause) are said to function. Arts and Arts (1986, p. 80-

95) mention the sentences such as simple, compound, complex, declarative, imperative, interrogative, and exclamatory. They can be categorized in the following groups on the basis of their function and construction:

Sentences can be classified in several different ways. Functionally, they are classified as *declarative, imperative, interrogative, optative and exclamatory*.

a) Declarative Sentence

A declarative sentence is a statement. It may be negative or affirmative. It declares the facts. It ends with a full stop. According to Aarts and Aarts , a declarative sentence always has a subject, which precedes the verb. A declarative sentence states a fact and ends with a period or full stop. It is a sentence in the form of a statement (in contrast to a command, a question, or an exclamation). (p.94)

Examples:

Paris is the capital of France.

Dr. Johnson’s Dictionary was published in 1755.

This passage illustrates his sense of humour.

b) Imperative sentence

An imperative sentence is a sentence that makes commands and requests. Nordquist states that an imperative sentence is a sentence that gives advice or instructions or that expresses a request or command. It typically begins with the base form of a verb, as in 'Go now!' The implied subject 'you' is said to be

"understood" (or elliptical): (You) go now! An imperative sentence ends with a period or an exclamation point. Thoreau states that an imperative sentence is command or a polite request. It ends with an exclamation mark or a period / full stop. e.g. When a dog runs at you, whistle for him. (<http://www.grammar-monster.com>)

What Arts and Arts state is that an imperative sentence contains a verb in the imperative mood. If a subject is present, it is usually 'you' but as a rule the subject is lacking. For example:

-) *Shut the door.*
-) *Find me another pencil.*
-) *Come and sit beside me.*

c) Interrogative: An interrogative sentence is a question type sentence which asks questions. To quote Aarts and Aarts, "An interrogative sentence contains a subject and opens with an auxiliary verb or a Wh-word."

Examples:

Does your mother know about this?

Can you play volleyball?

What did he tell you?

Who wrote this letter?

An interrogative sentence asks a question and ends with a question mark. For example: Who knew that dog saliva can mend a broken heart? (Jennifer Neal).

An interrogative sentence or question is commonly used to request information-Do I have to go to work?

Nordquist defines interrogative sentence as a type of sentence that asks a question. Interrogative sentences are typically marked by inversion of the subject and predicate: that is, the first verb in a verb phrase appears before the subject. An interrogative sentence ends with a question mark. For Shrikes, "An interrogative sentence is one that asks a direct question and always ends in a

question mark." The term interrogative sentence is another name for a question.

For example:

-) Has anyone seen my torch?
-) What's the capital of Peru?
-) Shall we ask Simon or Jonesy?

d) Optative: An optative sentence expresses the desire and mood of the speaker. Nordquist defines optative sentence as a category of grammatical mood that expresses a wish, hope, or desire. An optative sentence is a type of sentence that expresses strong feelings by making an exclamation. In English, Sometimes the subjunctive form of the verb is used in optative expressions, such as "God help us!"

e) Exclamatory: An exclamatory sentence expresses surprise, alarm, pain, indignation and strong opinion. It is an emotional utterance which usually lacks the grammatical full sentence and is marked with strong intonation. In exclamatory sentences, the subject precedes the verb. They are introduced by phrases opening with the words how or what.

Examples:

How beautiful she is!

What a good teacher Jim would make!

What a wonderful sight!

An exclamatory sentence expresses excitement or emotion. It ends with an exclamation Mark. An exclamatory sentence or exclamation is generally a more emphatic form of statement expressing emotion: "I have to go to work!"

For Frost, (2013),

"An exclamatory sentence is used to express a sudden emotion. It could be fear, anger, anxiety, admiration, excitement, etc."

For Labiak, (2014)

People have strong emotions and often show them in the way they speak. When you need to shout out on paper, however, there's only one thing to do: use the exclamation point. Using exclamatory sentences screams at the readers, letting them know the strong emotions behind the sentiment you are writing. Because the exclamation point packs a punch, it is best to use it sparingly. (www.english.answers.com)

An exclamatory sentence ends with an exclamation point. For example:

-) It's alive! It's alive!
-) Have fun storming the castle!

The formal classification considers the form of structure of sentence.

a) Simple sentence

A sentence in which none of the function is realized by a clause is known as simple sentence. It is always an independent sentence that is capable of occurring on its own. For example, *Sita is a teacher*. Cater and McCarthy (2010) quote, "A sentence with one main clause is called a simple sentence" (p. 271).

b) Compound sentence

A compound sentence is one in which two or more sentences have been coordinated and each of them conjoins is independent. For example, *Anita is a teacher, her fame is wide spread*. Cater and McCarthy (2010) quote, "A sentence with two or more main clauses is called a compound sentence" (p.271).

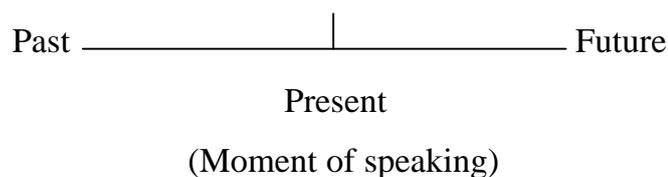

c) Complex sentence

A complex sentence is one in which one or more sentence functions are realized by a clause (finite or non- finite).For example: *I do not mind telling you that I am bored as soon as I come home*. Cater and McCarthy (2010) quote

"A sentence with a main clause and one or more subordinate clauses is called a complex sentence" (p. 271).

1.1.2.6 Tense

Tense indicates the time which is an obligatory category in the finite verb phrase. It refers to the relationship between forms of the verb and the time of action or state it describes. It has three dimensions – present, past and future. These can be represented as in the diagram below.

In fact, however, of the three times shown in the diagram, only two are expressed in English by inflections on the verb – present and past. Cowan (2008, p. 350) concludes that present time, for third person singular is indicated by adding -s to a regular verb and past time is indicated by adding -ed to a regular verb, or changing the form of an irregular verb such as go. Many languages also express future time by changing the form of a verb, but English generally expresses future time with the modal auxiliary verb *will*, or the semi-modal *be going to*. Example:

<i>He helps her.</i>	<i>Present Tense</i>
<i>He helped her.</i>	<i>Past Tense with regular verb</i>
<i>He went to the game.</i>	<i>Past Tense with irregular verb</i>
<i>He will help her.</i>	<i>Future time</i>
<i>He is going to help her.</i>	<i>Future time</i>

Time is also signaled by time adverbs, such as *yesterday, today, tomorrow, at noon, and three O'clock*, and by prepositional phrases, such as *for three years* and *since two O'clock*.

Likewise, Crystal (2003) views tense that it is a category used in the grammatical description of verbs (along with aspect and mode) referring

primarily to the way the grammar works the time at which the action denoted by the verb took place (p.459). Thus, English has two tense systems i.e. the sentence having –ed’ suffix as in 'he convinced me' is the Past tense and rest of other are in non-past tense. Tense is always marked on the first verbal form. For example,

Write	wrote
May write	might write
Has been writing	had been writing

1.1.2.7 Aspect

Aspect is a grammatical category of verb that considers qualities of action independent of tense, e.g. the progressive and perfective in English.

Cowan (2008, p.351-354) opines:

Aspect expresses how the speaker views the action of the verb. For example, an action that is seen as bounded and complete is *perfect* in aspect. If the action is seen as incomplete, it is *imperfect* in aspect; if seen as repeated, it is *iterative*; if seen as occurring regularly, it is *habitual*. English expresses **progressive aspect** by *be + present participle* and **perfect aspect** by *have + past participle*.

Cater and McCarthy (2010) define aspect as "The speaker's/ writer's perspective on the time of an event" (p.223). To clarify the term 'aspect', other grammarians, Richards, et al.(1999) put that:

Aspect is a grammatical category which deals with how the event described by a verb is viewed, such as whether it is in progress, habitual, repeated, momentary, etc. (p.22)

Aspect may be indicated by prefixes, suffixes or other changes to the verb, or by auxiliary verb, as in English. English has two aspects: progressive and perfective. The two aspect constructions of English, the perfective and the progressive can be seen as realizing a basic contrast of aspect between the actions viewed as complete (perfective) and the action viewed as incomplete i.e. in progress (imperfective or progressive).

The sentences in perfective aspect are marked by has/have/had + past participle as in the sentence 'Mahendra had taken initial effort'. In perfective aspect the activity denoted by the verb is completed and is used mostly in narrating the past tense. Sentences in progressive aspect, on the other hand, are marked by *be* + *present participle* as in the sentence 'we are expecting your future success'.

1.1.2.8 Voice

Voice is a linguistic device employed by the language to show the significance of a noun phrase associated with it. It shows whether the subject is the main theme or agent of some action or something is acted upon the agent. Richards, et al. (1999) put voice as the ways in which a language expresses the relationship between a verb and the noun phrase which are associated with it (p.401). Cowan (2008 p.392) talks that active voice has a subject NP followed by a verb and an object NP.

Example:

Anders Celsius invented the centigrade thermometer.

Passive sentences are formed from active sentences by:

-) moving the subject to the end of the sentence and by placing *by* in front of it.
-) moving the object into subject position.
-) changing the main verb to its past participle form and inserting an appropriate form of *be* before it.

Example:

Anders Celsius invented the centigrade thermometer. (Active)

The centigrade thermometer was invented by Anders Celsius. (Passive)

“Passive sentences cannot be formed if the active sentence verb is not followed by an NP, PP, or complement clause.” Similarly, the sequence *be + past participle* does not always signal the passive voice. Some past participles are adjectives.” (Cowan, 2008, P.403)

Example:

He saw that the pitcher was smashed to bits. *Verb + adjective*

The pitcher was smashed to bits by the angry woman. *Passive*

He was placed in the second division. *Verb + adjective*

The passive is more limited than the active voice in that only transitive verbs may be in the passive. In fact, some passive sentences in English have no active counterpart. The *be*-passive can also interact with complements such as *that*-clauses and infinitives, producing complex passives. (Murcia and Freeman, 1999:p.346)

For example;

Mehdi was born in Tehran. (Passive only)

? His mother bore Mehdi in Tehran.

It is rumored that he will get the job.

That he will get the job has been decided.

John is thought to be intelligent.

{
Complex Passive
}

English has two types of voice: Active and Passive. The construction of active voice is preferred to show deeds of person. Sentences in active voice are felt simpler, more different and forceful. They follow the rules of construction in writer discourse. Delivery of message through the sentences of active voice is effective and spontaneous. Passive voice, on other hand, is used to make the

language polite and message focused. The readers feel the language pleasing and indirect also.

1.1.3 Introduction to Certificates

Certificate is a document confirming that someone has reached a certain level of achievement in a course of study or training. It is a document containing a certified statement especially as to the truth of something; *specifically*: a document certifying that one has fulfilled the requirements of and may practice in a field.

The Law dictionary defines certificate as a written assurance, or official representation, that some act has or has not been done, or some event occurred, or some legal formality been completed with. (www.thelawdictionary.org/certificate)

"Certificate is a document that states an official fact or completion of a program." (www.yourdictionary.com/certificate)

It is issued to a person completing a course of study. It is used to prove that the facts it states are true. A certificate is an official document providing that one has completed a course of study or passed an exam, a qualification obtained after a course of study or an exam.

Certificate is a written document. It is an official verification that a condition or requirement has, or has not, been met. It is a written assurance or a document (such as a birth certificate, death certificate) prepared by an official during the course of his or her regular duties, and which may be used as evidence for certain purposes. (www.legaldictionary.thefreedictionary.com/certificate)

Certificate is a formal declaration that documents a fact that sb. has completed a course at a level. It proves that a particular person has completed a particular course of study or training as per the curriculum designed by the concerned board, committee, university, etc. Certificate is a written document that mirrors the qualifications of an individual in details.

1.1.3.1 Language of Certificates

Language is a means of communication. It varies as per the genres. So, the language used in a field differs from the language that of the others.

Certificates, for example, include the following type of language:

Language with Different Sentence Types

-) He /she bears good moral character. (*Simple sentence*)
-) This is to certify that Miss Bimala Aryal daughter of Mr. Durga Prasad Aryal was an inhabitant of Marbhung V.D.C. Ward no. 1, Gulmi read in this institution from 2063/01/20 to 2069/11/30. (*Complex Sentence*)
-) She passed the Annual Examination of class 10th (SLC) in 2069 and was placed in 2nd (ii) division. (*Compound Sentence*)

Language with Different Tenses

-) According to the school record his date of birth is 205208-22. (*Non-Past Tense*)
-) He was regular student of this school. (*Past tense*)
-) This is to certify that Miss Bimala Aryal daughter of Mr. Durga Prasad Aryal was an inhabitant of Marbhung V.D.C. Ward no. 1, Gulmi read in this institution from 2063/01/20 to 2069/11/30. (*Mixed Tense*)

Language with Different Aspects

-) According to the school record his date of birth is 205208-22. (*Simple Aspect*)
-) All the dues (sums) to this school have been cleared. (*Perfective Aspect*)
-) She had been studying here since 2059 B.S. to 2066 B.S. (*Perfect Progressive Aspect*)

Language with Different Voices

-) She passed the SLC held in 2069 in SECOND division. (*Active*)
-) All the dues (sums) to this school have been cleared. (*Passive*)

(*Source: Certificates issued by different institutions*)

1.1.3.2 Types of Certificates

Certificate is an official document that contains the record a person or form or company. On the basis of certificates issued by different institutions and offices, they can be categorized in the following groups:

- a. **Academic certificates:** Academic certificates refer to the documents that certify that a person has received specific education or has passed a test or series of tests. An academic certificate is a document that certifies that a person has received specific education or has passed a test or series of tests. Academic certificates include transfer, character, provisional, migration, original and school / college leaving certificates.
- b. **Experience Certificates:** Experience certificates refer to the certificates which are issued to the individuals after the completion of a task. An experience certificate is a letter that is written by the employer on behalf of an employee to confirm the time the employee was associated with the company, attesting the skills and contributions the latter made towards the growth of the organization. It can be looked at as the shorter version of a reference letter that helps future employers of a given candidate to ascertain whether it is a safe bet to employ him or not. Not only is the experience certificate a very important document when it comes to the closing formalities of an individual with a particular organization, it conveys the most basic work ethics and strengths of the individual to his future employers. An experience certificate consists of some certain components which are as follows:
 -) The date of issuance of the document at the top right corner.

-) The declaration 'To Whom It May Concern' on the certificate, below the date line.
-) The full name of the employee.
-) The exact designation of the employee.
-) The exact tenure of the employee with the company.
-) A description of the work habits and resourcefulness of the employee.
-) The closing sentence should be summarization of the organization's objective impressions of the employee.
-) The certificate should end with 'We wish him every success in life', 'We wish him luck to be successful at any endeavor he embarks upon in future', or something along similar lines.
-) 'Regards' or 'Sincerely' followed by the signature, name of signatory, designation of signatory, company seal, name and address of the organization.

The employer and the employee should always keep it in mind that an experience certificate always has to be printed on the company letterhead and signed either digitally or by hand by an administrative official of the company.

(Source: <http://www.buzzle.com>)

- c. **Training Certificates:** Training certificates refer to the certificates which are issued to the persons after the successful completion of some special sorts of trainings. For example, teacher training, computer training, journalism, and so on. A training certificate is a document issued to employees for completing some training program which certifies that the employee has gone through the stated training program and has performed well. Further, this certificate also words out the purpose of the training program, duration of the training, company information, trainer's name, trainee's name, date of certificate, etc. This certificate can also be designed like any traditional certificate issued by an organization. To make this certificate more professional, logo can be inserted in the background of the

certificate. It must be signed by the authorized person.

(www.wordstemplates.org)

- d. **Administrative Certificates:** Administrative certificates are the certificates of vital registration. They include Birth Registration certificate, Death Registration certificate, Marriage Registration Certificate, Transfer / Migration Certificate, Relationship Certificate, etc. Birth certificate is a document that is used to document birth of a child. It is used as the identification of a person in different fields of life, for instance, taking admission in a school, getting national identity card and number, etc. A birth certificate includes detailed information about new born baby like child's surname, parent's names, date of birth, gender, place of birth, address of parents, signature of the doctors or registrars, etc.

A death certificate is a legal document which lists the location, time, and manner of death for someone who has passed away. Typically, a death certificate is filled out by a doctor or medical examiner. When the cause of death is readily evident, sometimes police officers are also allowed to fill out a death certificate. (National Center for Health Statistics, January 1997, U.S., www.wisegeek.com)

A death certificate is a permanent record of an individual's death. One purpose of the death certificate is to obtain a simple description of the sequence or process leading to death rather than a record describing all medical conditions present at death.

A marriage certificate is an official statement that certifies two people are married. In the words of Sheri and Stritof (2014), "A marriage certificate is an official recorded document issued by a governmental authority that proves that the couple listed on the marriage certificate has a legal marriage." A marriage certificate usually contains who married who, when they were married, where

they were married, who married them, and who was there.

(marriage.about.com)

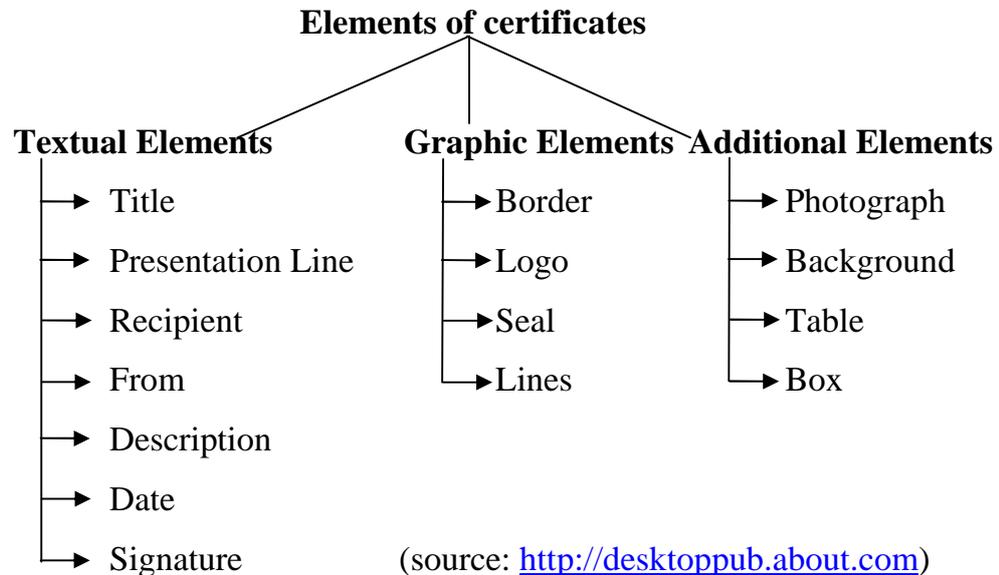

e. Miscellaneous Certificates: Except the above mentioned certificates, some other certificates are also found to be used in the present day world. They are categorized under miscellaneous group.

1.1.3.3 Components of Certificates

Components refer to the different parts or elements of a certificate. Single constituent can never make a complete certificate. The certificate consists of varieties of elements like title, lines (dots), recipient, description, date, signature, etc. Howard (2014) designed his certificate of Award with text and graphic elements. Text elements include Title, Presentation Line, Recipient, From, Description, Date, and Signature. And Graphic Elements include Border, Logo, Seal and Lines. Howard's certificate has 9 of the 11 parts of a certificate.

These components apply primarily to achievement certificates, employee certificates, student, or teacher recognition awards, and participation certificates. Diplomas and similar official documents of certification may have additional elements such as Photograph, Background Pattern, Table, Box, etc. Thus, certificates may have the following elements:

A) Textual Elements

a. Title

Title is the main head line that usually reflects the type of document. It is usually at the top of the certificates.

b. Presentation Line

Presentation line refers to the short line of text which usually follows the title and may say *is awarded to, is hereby presented to or some other variation*, followed by the recipient. Alternately, it may read something like: *This certificate is presented on [DATE] by [FROM] to [RECIPIENT]*.

c. Recipient

Recipient simply refers to the name of the person, persons, or group receiving the award/ certificate. In some cases recipient's name is enlarged or made stand out as much as or even more than the title.

d. From

This is the name of the person or organization presenting the certificates. It may be explicitly stated in the text of the certificates or implied by the signature at the bottom or perhaps by having a company logo on the certificates.

e. Description

The reason for the certificates is explained here. This could be a simple statement (such as a high score in a bowling tournament or successful participation or completion of a degree) or a lengthier paragraph outlining specific characteristics or achievements of the award/ certificate recipient. The best award certificates are personalized to reflect why the recipient is receiving the recognition.

f. Date

The date when the certificate was earned or presented is usually written out before, within, or after the description. Typically the date is spelled out as in *31st Day of October or Fifth Day of May, 2013.*

g. Signature

Most certificates have a space near the bottom where the certificate is signed by a representative of the organization handing out the certificate. The name or title of the signatory may also be included below the signature. Sometimes, there may be space for two signatories, such as the company president and recipient's immediate supervisor.

B) Graphic Elements

a. Border

Border is a frame around the certificates. Not every certificate has a frame or border around it, but it's a common component.

b. Logo

Logo is a printed design or symbol that a company or an organization uses as its special sign. The logo provides the quick recognition of the organization, company, office or firm. They are used in certificates to preserve the identity and reputation of the institution or company. Some organizations may include their logo or some other image related to the organization or subject of the certificates. For example, schools might include their mascot, a club might use a picture of a golf ball for a golf club award or a picture of a book for a summer reading program participation certificate.

c. Seal

Seal is an official design or mark, stamped on a document to show that it is genuine and carries the authority of a particular person or organization.

A certificate might have a seal affixed (such as stick-on gold starburst seal) or have an image of seal printed directly on the certificate.

d. Lines

Lines are the blank spaces where the name, description, date, and signature go. Some certificates may include blank spaces while others will have lines, like a fill-in-the-blank form where the name, description, date, and signature go (to be either typed or handwritten).

C) Additional Elements

a. Photograph

Photographs are the pictures of a person or a certificate receiver.

Pictures give the clear identification of the recipient. The train of issuing certificates with the recipient's photograph is being common nowadays.

b. Background pattern

Background pattern refers to a design on which something is painted, drawn, etc. Not every certificate has an all-over background pattern, but it has become a part of certificates at present.

c. Table

A table is a list of facts or numbers arranged in a special order, usually in rows and columns. Not every certificate has a table, but it has been used in some of the certificates at present.

d. Box

A box is a small square or rectangle drawn on a page to write information in. The following table shows the presence and absence of box in certificates.

(Howard, 2014)

D) Virtual Elements: A certificate is not complete having included the above mentioned elements. It has specific colour, font, its own shape, etc. The researcher has studied these as virtual elements of certificates.

a. Colour: Colour is the appearance that things have that results from the way in which they reflect. The colour is seen in original certificates (but it in copies is rare).e. g.

Colour

Black and white

b. Font: Font is the particular size and style of a set of letters that are used in printing or writing. e.g.

i. Italics: Italics refer to the printed or written letters that lean to the right.

e.g. *This is to certify that*

I wish her bright future.

ii. Roman: Roman type is ordinary printing or writing type which does not lean forward. e.g.

This is to certify that

I wish her bright future.

iii. Cursive: Cursive refers to the printing or writing with the letters joined together. e.g.

Certified that Mr. / Mrs. ...

His/ Her conduct during study period was good.

iv. Bold: Bold is a type of printed words or letters in a thick, dark type. e.g.

This is to certify that

I wish her bright future.

- v. **In- boost letters:** In-boost letters refer to the more increased / enlarged letters than those in normal size in printing or writing. e.g.

- c. **Shape:** A certificate is not merely a plain sheet of paper. It has specific shape. Shape is the form of the outer edges or surfaces of certificates.

e.g. a rectangular shape,

a square shape

1.1.3.4 Importance of Certificates in Present Day World

A certificate is an official document, either printed or handwritten, which is issued primarily to an individual or institutions in order to publicize the facts in details. It is one of the proofs that make sure one's ability, through a very competent way. Certification does not mean merely printed paper or card, signed by some authority, telling about ones expertise. This shows the determination and ability to complete a task. It basically shows that one has accomplished the requirements of, and may perform in an area.

An academic certificate is a qualification attained in education which is offered by a university or other education provider. Certificates usually signify that a student has reached a standard of knowledge about a certain vocational or professional subject. Certificates validate that a student is considered

competent in a certain specific skills. They are considered necessary to continue further education as well. (www.igiworldwide.com)

An experience certificate confirms the time the employee was associated with the company, attesting the skills and contributions the latter made towards the growth of the organization. It can be looked at as the shorter version of a reference letter that helps future employers of a given candidate to ascertain whether it is a safe bet to employ him or not. It conveys the most basic work ethics and strengths of the individual to his future employers.

A training certificate is a document issued to employees for completing some training program which certifies that the employee has gone through the stated training program and has performed well. Further, this certificate also words out the purpose of the training program, duration of the training, company information, trainer's name, trainee's name, date of certificate, etc.

Administrative certificates are the certificates of vital registration. Birth certificate is used to document birth of a child. It is used as the identification of a person in different fields of life, for instance, taking admission in a school, getting national identity card and number, etc. A death certificate is a legal document which lists the location, time, and manner of death for someone who has passed away. A marriage certificate is an official statement that proves the couple listed on the marriage certificate has a legal marriage. In short, administrative certificates indicate the vital registration.

To, sum up, certificate is a document that proves the truth, states the facts, provides us with information and certifies one's ability or skill in the respected field.

1.2 Review of Related Literature

Language is viewed as one of the most important possessions of human being. It is an abstraction based on the linguistic behaviour of its users. Regarding the language use, a number of research works have been

conducted and accomplished by different researchers so far in Nepal and abroad. But no research has been carried out yet particularly on language used in certificates which is quite different from the language of other genres. The study aims to provide enough information to the readers and the future researchers who are interested in the respective field.

Neupane (2006) studied “The Language Used in Notices” aiming to determine sentence patterns of English notices in terms of constructions, tenses and aspects. He also wanted to find out language functions used in notices. In case of constructions, he found that verbless constructions were highly used. In terms of language functions, the requesting function had the highest frequency.

Budhathoki (2007) carried out a research on "Language Used in Vacancy Advertisement". He collected 80 samples of advertisement from the different newspapers. He concentrated his study in exploring the physical features of vacancy advertisements such as various use of headlines, contents, frequency of vocabularies and style of writing (formal and informal). He analyzed and described the features of language used in vacancy advertisements in terms of sentence types, tense, voice and aspect. He found that major word class vocabularies are dominantly used with bullets, table and logos. He also found that complete constructions with simple, compound and complex sentences are highly used in the vacancy announcement.

Dhakai (2008) studied the "Language Used in Posters" to analyze the language used in posters in terms of tense, aspect, voice, and sentence types. He found that simple sentences were maximally used than compound sentences. Regarding the tense and aspect, he found the maximal frequency of non-past tense (in which present reference was mostly found) and non-past simple aspect respectively. Similarly, active voice reserved 89.87% of occurrence.

Pandey (2008) studied the "Language Used in Condolences" aiming to analyze the language of condolences in terms of different variables such as Sentence types, tense, aspect, voice, and length. He also analyzed the

non-linguistic features used in the notice of condolences. (e.g. pictures, place of date, size) and special features of language as well (e.g. way of addressing, title, genre, collocation of words).

Aryal (2009) carried out a research on "Language Used in Newspaper Interviews" purposing to find the type of questions used in interviews (open ended, closed ended, double barreled and lead questions). She analyzed the language used in interviews in terms of sentence types (simple, compound and complex), tense (past and non-past), voice (active and passive) and aspect. She found that open ended questions were maximally used but double barreled and lead questions were used in limited number. Regarding the types of sentences, complex sentences had higher frequency than compound and simple. Her further finding was that active voice and simple aspect were also maximally used in newspaper interviews.

Ghimire (2012) carried out a research entitling "Language Used in Congratulations" aiming to determine selection of dictions and degree of formality. He attempted to find out the characteristic features of language used in the message of congratulations in terms of tense, voice, aspect, sentence structure, sentences length, etc. In order to accomplish his research, he collected 100 messages of congratulations by using simple random procedure from different English books and newspapers. He found non-past tense to be heavily used in all pieces of congratulations. And the non-past tense with present and future time reference was used frequently. Likewise, he found simple aspect to be used most frequently in the message of congratulations.

Although all above mentioned studies are related to language use, no study has been done on the language used in certificates yet. The present study differs from all of the previous studies carried out on language used in different genres because they have studied and analyzed the language in terms of tense, aspect and voice. Some of them have included the study of vocabularies (major and minor word class) which is not so scientific. The present study is obviously a

new topic. Firstly, it aims to categorize the certificates into five different group viz. Academic, Experience, Training, Administrative and Miscellaneous. Secondly, it aims to study and analyze the language used in certificates in terms of sentence types, tense, aspect, and voice. Thirdly, the study aims to determine the components of certificates. Last but not least aim of this study is to suggest some pedagogical implications. Thus, this study is different from those of the above.

1.3 Objectives of the Study

The proposed study has the following objectives:

- a. To analyze the language of certificates in terms of:
 -) Sentence Types (simple, complex and compound)
 -) Tense (past and non-past)
 -) Aspect (simple, progressive, perfective and perfect progressive)
 -) Voice (active and passive)
- b. To determine the components of certificate.
- c. To suggest some pedagogical implications.

1.4 Significance of the Study

This study will be significant for those people who are concerned directly or indirectly with language use i.e. the messengers and the receivers. It is expected that it will be helpful to the people related to group communication. It will also be useful for the language teachers who have to carry out the work in preparing certificates. This will be a guideline for the future research workers who want to study in the field of group communication.

1.5 Definition of the Terms

Aspect: Aspect is a grammatical category of verb that considers qualities of action independent of tense

Certificates: Certificates are the document confirming that someone has reached a certain level of achievement in a course of study or training. They contain certified statements especially as to the truth of something.

Language: Language is a means of communication that makes human communication possible. Language is a bridge which keeps link between the messenger and the receivers. A piece of message is delivered through language.

Tense: Tense indicates the time which is an obligatory category in the finite verb phrase. It refers to the relationship between forms of the verb and the time of action or state it describes.

Voice: The voice is a linguistic device employed by the language to show the significance of a noun phrase associated with it. It shows whether the subject is the main theme or agent of some action or something is acted upon the agent.

CHAPTER TWO

METHODOLOGY

The researcher adopted the following methodology.

2.1 Sources of Data

Sources of data are of two types: Primary and Secondary.

2.1.1 Primary Sources of Data

The researcher did not use any primary sources of data.

2.1.2 Secondary Sources of Data

The researcher used only the secondary sources of data. The secondary sources of data were one hundred certificates viz. academic certificates, experience certificates, training certificates, administrative certificates, and miscellaneous certificates issued by different governmental and non-governmental schools, colleges/ campuses, universities, institutions and offices. In addition, the researcher consulted some books, previous theses, and journal articles related to the research work in order to facilitate the study. Some of them are listed as follows:

i. Previously carried out researches:

-) Aryal (2009)
-) Budhathoki (2007)
-) Dhakal (2008)
-) Ghimire (2012)
-) Neupane (2006)
-) Pandey (2008)

ii. Books:

-) Aarts and Aarts (1986)
-) Cater and McCarthy (2010)

) Cowan(2008)

) Quirk, Greenbaum, Leech and Svartvik (2010)

) Yule (2006)

2.2 Sampling Procedure

One hundred different certificates issued by different institutions and offices were collected using stratified sampling approach and were categorized under the following headings, viz. Academic, Experience, Training, Administrative, and Miscellaneous.

2.3 Tools for Data Collection

The main tools for data collection were the observation and recording of different certificates provided to different individuals by different governmental and Non-governmental institutions and offices of Nepal and abroad.

2.4 Process of Data collection

The researcher visited different individuals having received certificates from different national and international institutions and offices. He told them the purpose and procedure of data collection of this study. He took permission to observe their certificates and asked for a copy of them to maintain the record. After collecting the varieties of samples of certificates issued by governmental and non-governmental schools/ colleges and offices, the researcher classified them under five categories along with number as in the table below:

Table No. 1: Types of certificates

S.N.	Types of Certificates	Number
i	Academic Certificates	57
ii	Experience Certificates	06
iii	Training Certificates	26
iv	Administrative Certificates	05
v	Miscellaneous Certificates	06
Total		100

Then, he analyzed and interpreted the data by tabulating them.

2.5 Limitations of the Study

The present study had the following limitations:

- a. This study was limited to 100 certificates under five categories.
- b. This study was further limited to the certificates issued from Nepalese, Indian and Chinese institutions only.
- c. The study only analyzed the language structure in terms of sentence types, tense, aspect and voice, but not the language function.
- d. This study further bounded to the components of certificates.
- e. This study didn't include the study of any vocabulary items.

CHAPTER THREE

ANALYSIS AND INTERPRETATION OF DATA

This chapter provides a descriptive analysis of certificates issued by different governmental and non-governmental schools, colleges/ campuses, universities and national and international institutions and offices. The data are analyzed and interpreted to determine the characteristic features of language used in certificates in terms of sentence types, tense, aspect, and voice.

3.1 Classification of Certificates

The researcher collected one hundred different certificates issued by governmental and non-governmental institutions and offices. He studied and classified them on the basis of their nature.

Table No. 2: Overall Number of certificates in terms of their Types

S.N.	Types of Certificates	Freq.	percent
I	Academic Certificates	57	57%
Ii	Experience Certificates	06	06%
Iii	Training Certificates	26	26%
Iv	Administrative Certificates	05	05%
V	Miscellaneous Certificates	06	06%
Total		100	100%

The table shows that five different types of certificates are used in the present day world. Among them, academic certificates hold the first position.

Administrative certificates are the least. Experience certificates cover only 6%.

The second position is reserved to the training certificate. They cover 26%.

This research work shows that very few people receive the administrative certificates.

3.2 Language Structure

Language is composed of various grammatical units such as morpheme, word, phrase, clause and sentence. Apart from this, it includes tense, voice and aspect. The researcher analyzed the language in terms of sentence types, tense, aspect and voice.

3.2.1 Sentence

The researcher found the following types of sentences in the certificates:

- i. Simple sentences
- ii. Complex sentences, and
- iii. Compound sentences

Table No. 3: Analysis of Sentence Types in Certificates

Sentences	Simple		Complex		Compound		Total
	Freq.	Percent	Freq.	Percent	Freq.	Percent	
Academic	129	64.17	41	20.39	31	15.42	201
Experience	23	76.66	5	16.66	2	6.66	30
Training	17	50	15	44.11	2	5.88	34
Administrative	1	16.66	5	83.33	-	-	6
Miscellaneous	8	72.72	3	27.27	-	-	11
Total	178	63.12	69	24.46	35	12.41	282

The table shows that there are two hundred and one sentences in academic certificates. Among them, one hundred and twenty-nine (64.17%) are simple sentences, forty-one (20.39%) are complex and thirty-one (15.42%) are compound. Simple sentences are the most and complex sentences are the least. Complex sentences hold the second position. Simple sentences have led ahead. Among thirty sentences in the experience certificates, twenty-three (76.66%) are simple, five (16.66%) are complex and only two (6.66%) are compound sentences. Simple sentences have been dominantly used in these

types of certificates. The table records thirty-four sentences in training certificates. Among them, seventeen sentences (50%) are simple, fifteen (44.11%) are complex and only two (5.88%) are compound. Simple sentences hold the first position in training certificates. And they are followed by complex sentences. The table shows only six sentences in administrative certificates. No compound sentence is used in them. Complex sentences have the leading occurrence with their 83.33% and they are followed by simple sentences (16.66%). There are eleven sentences in miscellaneous certificates. Among them, eight (72.72%) are simple sentences and only three (27.27%) are the complex ones; but none of the compound sentence is found to be used.

The table also shows that the researcher has studied and analyzed five types of certificates. It also shows that there are two hundred and eighty-two sentences altogether. Among them one hundred and seventy-eight (63.12%) are simple, sixty-nine (24.46%) are complex and thirty-five (12.41%) are compound. Administrative and miscellaneous certificates do not include compound sentences. Experience and training certificates also make the least use of compound sentences. Simple sentences have the highest frequency in all sorts of certificates and they are followed by complex sentences. But administrative certificates include the least frequency of occurrences of simple sentences.

a. Simple Sentences:

Simple sentences are found having dominant use in the samples of certificates. Among 282 sentences, 178 sentences are simple sentences. Some examples of simple sentences used in the samples are given below.

1. She was the student of class 10th (S.L.C.).
2. Her date of birth according to school Admission Register is 2052/12/06 V.S.
3. I wish his bright and excellent future career.
4. He/she was a regular student of this school.

b. Complex Sentences:

Complex sentences were found most frequent (69 of occurrences out of 282). Some examples of complex sentences used in the samples are given below.

1. This is to certify that Miss Bimala Aryal daughter of Mr. Durga Prasad Aryal was an inhabitant of Marbhung V.D.C. Ward No. 1, Gulmi read in institution from 2063/01/20 to 2069/11/30.
2. This is to certify that Mr. Gokarna Kunwar Chhetri son of Mr. Gopal Bdr. Kunwar Chhetri and Mrs. Parbati Kunwar an inhabitant of Gulmi district Hastichaur V.D.C. Ward No. 9 village studied in this school from 2063 to 2068.
3. He possessed a good moral character when he was a student of this institution.

3.2.2 Tense

The researcher, after analyzing the whole tenses, classified them into the following types:

- i. Past Tense
- ii. Non-Past Tense

Table No. 4: Analysis of Tense in Certificates

Tense	Past		Non-past		Total
	Freq	Percent	Freq	Percent	
Certificates					
Academic	97	48.25	104	51.74	201
Experience	14	46.66	16	53.33	30
Training	4	11.76	30	88.23	34
Administrative	4	66.66	2	33.33	6
Miscellaneous	2	18.18	9	81.81	11
Total	131	46.45	161	57.09	282

The above table shows that there are two hundred and one sentences in academic certificates. Among them, ninety-seven (48.25%) are in past, and one hundred and four (51.74%) in non-past tense. The table also indicates that non-past tense is the most and past tense is the least. Past tense reserves the second position in academic certificates. The table includes only thirty sentences in the experience certificates. Eleven (46.66%) of them are in past tense, and sixteen (53.33%) in non-past tense. Non-past tense has the highest frequency in the experience certificates. The table records thirty-four sentences in training certificates. Among them, only four sentences (11.76%) are in past tense, and thirty sentences (88.23%) are in non-past tense. Non-past tense has the first position in this sector also. The frequency of past tense is the least in these types of certificates. The table shows that past tense has high frequency of occurrence (4 out of 6 i.e. 66.66%) in administrative certificates. Non-past tense cannot make its widespread occurrence in them. This tense records only 33.33% (2 out of 6) of occurrence. This proves that mostly the administrative certificates are filled up with past tenses. In miscellaneous certificates, non-past tense reserves the highest frequency of occurrence (9 out of 11 i.e. 81.81%). Past tense is rarely used with its 18.18% (2 out of 11) of occurrence.

The above table also shows that the researcher has studied five types of certificates. There are two hundred and eighty-two sentences altogether. Among them ninety-seven (46.45%) sentences are in past tense, one hundred and four (57.09%) in non-past tense. The table shows the non-past tense being dominantly used in the certificates and it is followed by past tense. Non-past tense represents the highest percentage of tenses in the research corpus.

3.2.3 Aspect

The researcher found the following aspects while analyzing the certificates:

- i. Simple aspect
- ii. Progressive aspect
- iii. Perfective aspect

iv. Perfect progressive aspect

Table No. 5: Analysis of Aspect in Certificates

Aspect	Simple		Progressive		Perfective		Perfect Progressive		Total
	Freq.	%	Freq.	%	Freq.	%	Freq.	%	
Certificates	181	90.04	1	0.49	18	8.95	1	0.49	201
Academic	181	90.04	1	0.49	18	8.95	1	0.49	201
Experience	24	80	1	3.33	3	10	2	6.66	30
Training	17	50	-	-	17	50	-	-	34
Administrative	6	100	-	-	-	-	-	-	6
Miscellaneous	9	81.81	-	-	2	18.18	-	-	11
Total	237	84.04	2	0.7	40	14.18	3	100	282

This table shows that simple aspect is used more frequently than any other aspects in academic certificates. It covers 90.04% (i.e. 181 out of 201) of the total sentences. The perfective aspect has occupied the second position with its 8.95% of occurrence. The progressive and perfect progressive aspects hold the last position covering only 0.49 % (1/1 out of 201) which is the least used aspect in academic certificates. In the experience certificates, simple aspect holds the first position with 80% of occurrence. Perfective aspect holds the second position with its 10% (3 out of 30) of the total sentences. The table indicates that progressive aspect is the least used aspect in the experience certificates. In training certificates, the simple and perfective aspects make the equal frequency of occurrence i.e. 50% each. Both of the progressive and perfect progressive aspects are absent in training certificates. The table shows that only the simple aspect has occurred in administrative certificates. The table, in terms of miscellaneous certificates, presents that simple aspect has the highest frequency with its 81.81% of occurrence. Perfective aspect covers the

second position with its 18.18% of occurrence. There is no occurrence of progressive and perfect progressive aspects in the miscellaneous certificates.

The table shows that the researcher studied and analyzed five types of certificates. According to the table, the simple aspect holds the first position in all the certificates. Progressive aspect is the least used aspect (only 0.7%). It is found only in the academic and experience certificates. Perfective aspect records its second position covering 14.18% (40 out of 282) of the total sentences. Perfect progressive aspect has got the third position with its 1.06% of occurrence.

3.2.4 Voice

The researcher found the following types of voices in certificates.

- i. Active, and
- ii. Passive

Table No. 6: Analysis of voice in certificates

Voice Certificates	Active		Passive		Total
	Freq	Percent	Freq	Percent	
Academic	184	91.54	17	8.45	201
Academic	184	91.54	17	8.454	201
Experience	26	86.66	4	13.33	30
Training	24	70.58	10	29.41	34
Administrative	5	83.33	1	16.66	6
Miscellaneous	7	63.63	4	36.36	11

The table given above shows that active voice has occurred one hundred and eighty-four times (91.54%), passive voice has repeated only seventeen times, which makes 8.45% of occurrence. Active voice has the highest frequency of occurrence in academic certificates. In the experience certificates, active voice repeats twenty-four times (80%), passive voice occurs only six times (20%).

Passive voice is the least used voice in the experience certificates and active voice is the most used voice in them. Passive voice seems very restricted in comparison to passive voice in these certificates. The table further presents that the training certificates include 70.58% (24 out of 34) of active voice, 29.41.42% and (10 out of 34) of passive voice. Active voice has the highest percentage of occurrence and passive voice has the lowest occurrence in training certificates. In administrative certificates, active voice occurs five times (83.33%) while passive voice comes only once (16.66%). Active voice leads in these certificates. It is five times more than passive voice. In analyzing the miscellaneous certificates, the researcher has found both types of voices: active and passive. Active voice covers 63.33% (7 out of 11), and passive voice occurs only four times (36.36%). Active voice is the most frequently used voice in these certificates, too. Passive voice reserves the second position.

The table presents that active voice is leading ahead in all sorts of certificates. Passive voice is in second position in the samples. The average percentage of active voice has the highest position covering 87.23% (i.e. 246 out of 282) of the sentences used in the samples. 12.76% (i.e. 36 out of 282) sentences are found to be used in passive voice less frequently than active voice in the certificates.

3.3 Components of Certificates

Certificate is a simple piece of paper. Various parts included in it are its components. There is usually a title and the name of the recipient but there are also a few more components that make up most certificates. Generally, a certificate consists of two types of elements viz. (a) Textual Elements, and (b) Graphic Elements. The researcher observed the other types of components, too – Additional and Virtual. Additional components include photograph, background pattern, table and box. Colour, font, shape, etc. come under the virtual elements.

3.3.1 Textual Elements

a. Title

Title is the main head line that usually reflects the type of a document. It is usually at the top of the certificates.

Table No. 7: Presence and absence of Title in certificates

Certificates	With Title		Without Title		Total
	Freq	Percent	Freq	Percent	
Academic	54	94.73	3	5.26	57
Experience	6	100	-	-	6
Training	21	80.76	5	19.23	26
Administrative	5	100	-	-	5
Miscellaneous	6	100	-	-	6
Total	92	92	8	8	100

The table shows the presence and absence of title in the certificates. There are one hundred certificates. Among them, fifty-seven are academic, six are the experience, twenty-six are training, five are administrative and six are miscellaneous ones. Fifty-four academic certificates (94.73%) out of fifty-seven have included title and only three (5.26%) academic certificates do not have the title. Twenty-one training certificates (80.76%) out of twenty-six are with title but five of them have also been found without the title. All of the experience certificates, administrative and miscellaneous ones have contained the title. 92 percentages of certificates include the title and only 8 percentages of certificates are without the title.

Some of the examples of title found in the samples are as follows:

- a. Transfer & Character certificate
- b. Certificate
- c. To Whom It May Concern

b. Presentation Line

Presentation line refers to the short line of text which usually follows the title and may say *is awarded to, is hereby presented to or some other variation*, followed by the recipient. Alternately, it may read something like: *This certificate is presented on [DATE] by [FROM] to [RECIPIENT]*.

Table No. 8: Presence and absence of Presentation Line in certificates

Certificates	With Presentation Line		Without Presentation Line		Total
	Freq	Percent	Freq	Percent	
Academic	56	98.24	1	1.75	57
Experience	6	100	-	-	6
Training	24	92.30	2	7.69	26
Administrative	5	100	-	-	5
Miscellaneous	5	83.33	1	16.66	6
Total	96	96	4	4	100

The table shows that all of the experience and administrative certificates are always with presentation line. Fifty-six academic certificates among fifty-seven are with presentation line but only one academic certificate is found without presentation line. Among twenty-six training certificates, twenty-four are found with presentation line and only two are without presentation line. Ninety-six certificates out of one hundred include presentation line and only four certificates exclude it. A few of examples of presentation line found in the samples are given below.

- a. This is to certify that Mr.
- b. Certified that Mr.
- c. This certificate is awarded with hearty congratulation to Mr.

c. Recipient

Recipient simply refers to the name of the person, persons, or group receiving the award/ certificate. In some cases recipient's name is enlarged or made stand out as much as or even more than the title.

Table No. 9: Presence and absence of Recipient in certificates

Certificates	With Recipient		Without Recipient		Total
	Freq	Percent	Freq	Percent	
Academic	57	100	-	-	57
Experience	6	100	-	-	6
Training	26	100	-	-	26
Administrative	5	100	-	-	5
Miscellaneous	6	100	-	-	6
Total	100	100			100

The above table shows the occurrence of recipient in the certificates. None of the samples are found without recipient. This result proves that recipient is the most prominent and obligatory element of a certificate. Recipients are usually preceded by the presentation lines. Some of the examples of recipient found in the samples are given below in italics.

- a. It is certified that *Mr. Bishnu Prasad Gautam*.....
- b. This certificate is thankfully awarded to *Mr. Ganga Bahadur Khatri* ...
- c. *Miss Sapana Rana*, resident of Hunga V.D.C. Ward No. 2,
Gulmi.....

d. From

This is the name of the person or organization presenting the certificates. It may be explicitly stated in the text of the certificate or implied by the signature at the bottom or perhaps by having a company logo on the certificates.

Table No. 10: Presence and absence of From in certificates

Certificates	With From		Without From		Total
	Freq	Percent	Freq	Percent	
Academic	57	100	-	-	57
Experience	6	100	-	-	6
Training	26	100	-	-	26
Administrative	5	100	-	-	100
Miscellaneous	6	100	-	-	6
Total	100	100	-	-	100

The table shows that all of the samples have the element 'From'. This indicates that none of the certificates is issued lacking 'From'. A few of examples of from found in the samples are listed below.

- a. Tribhuvan University
- b. English Language Teachers' Association (NELTA)
- c. British Council, etc.

e. Description

The reason for the certificate is explained here. This could be a simple statement (such as a high score in a bowling tournament or successful participation or completion of a degree) or a lengthier paragraph outlining specific characteristics or achievements the award/ certificate recipient. The best award certificates are personalized to reflect why the recipient is receiving the recognition.

Table No. 11: Presence and absence of Description in certificates

Certificates	With Description		Without Description		Total
	Freq	Percent	Freq	Percent	
Academic	57	100	-	-	57
Experience	6	100	-	-	6
Training	26	100	-	-	26
Administrative	5	100	-	-	5
Miscellaneous	6	100	-	-	6
Total	100	100	-	-	100

The above table shows the occurrence of description in the certificates. Among the one hundred samples of different types, cent percent of them have included the description. This provides the fact that every certificate is issued including ‘Description’. Absence of description in any certificate makes it vague and no perfection is found in it. Some of the examples of description found in the samples are given below.

- a. passed the XII Level Examination in first division held in 2066 (2009 AD).
- b.having passed Bachelor’s Degree examination in Education in Second division of the year 2001,
- c. for the successful participation on 12 Day TOT Programme on Teachers’ Professional Development
- d.has successfully completed the computer courses Basic computer courses

f. Date

The date when the certificate was earned or presented is usually written out before, within, or after the description. Typically the date is spelled out as in *31st Day of October or Fifth Day of May. 2013.*

Table No. 12: Presence and absence of Date in certificates

Certificates	With Date		Without Date		Total
	Freq	Percent	Freq	Percent	
Academic	56	98.24	1	1.75	57
Experience	5	83.33	1	16.66	6
Training	15	57.69	11	42.30	26
Administrative	5	100	-	-	5
Miscellaneous	3	50	3	50	6
Total	86	86	14	14	100

According to the table, there are fifty-seven academic certificates. Among them fifty-six (98.24%) certificates include the date, and only 1.75 percentages of certificates (1 out of 57) exclude the date. 83.33% (5 out of 6) experience certificates contain the date and only 16.66% (1 out of 6) of them do not include the date. Fifteen (57.69%) out of twenty-six training certificates have date and eleven of them are without the date. 50% of miscellaneous certificates are with date and 50% of them are without the date. The date reserves its 86% percentage of occurrence in the samples. Only fifteen samples out of hundred do not have the date.

g. Signature

Most certificates have a space near the bottom where the certificates are signed by a representative of the organization handing out the certificates. The name or title of the signatory may also be included below the signature. Sometimes, there may be space for two signatories, such as the company president and recipient's immediate supervisor.

Table No. 13: Presence and absence of Signature in certificates

Certificates	With Signature		Without Signature		Total
	Freq	Percent	Freq	Percent	
Academic	57	100	-	-	57
Experience	6	100	-	-	6
Training	26	100	-	-	26
Administrative	5	100	-	-	100
Miscellaneous	6	100	-	-	6
Total	100	100	-	-	100

The above table shows the occurrence of signature in certificates. The researcher has studied fifty-seven academic certificates, six experience certificates, twenty-six training certificates, five administrative certificates, and six miscellaneous ones. The study shows that all of the samples have included the signature. Signature is the obligatory part of certificates.

3.3.2 Graphic Elements

a. Border

Not every certificate has a frame or border around it, but it's a common component.

Table No. 14: Presence and absence of Border in certificates

Certificates	With Border		Without Border		Total
	Freq	Percent	Freq	Percent	
Academic	30	52.63	27	47.36	57
Experience	-	-	6	100	6
Training	21	80.76	5	19.23	26
Administrative	3	60	2	40	5
Miscellaneous	3	50	3	50	6
Total	57	57	43	43	100

The table illustrates the presence and absence of border in certificates. The study includes one hundred samples of five different sorts of certificates.

Among them, fifty-seven are academic, six are experience, twenty-six are training, five are administrative and six are miscellaneous certificates. The table further illustrates that 52.63%, (30 out of 57) of academic certificates are with border whereas 47.36% (27 out of 57) of them are without border. All of the experience certificates are without border. 80.76% (21 out of 26) of training certificates include the border whereas 19.23% (5 out of 26) of them do not contain the border. 60% (3 out of 5) administrative certificates are found with border whereas 40% (2 out of 5) of them are without border. The percentage of the miscellaneous certificates having border and not having border is equal i.e. 50% (3/3 out of 6). In total, 57% of certificates include border and 43% of them are without border. None of the experience certificates include the border i.e. it is not a part of this type of certificates. The study shows that border is optional in other kinds of certificates, too.

b. Logo

The logo provides the quick recognition of the organization, company, office or firm. They are used in certificates to preserve the identity and reputation of the institution or company. Some organizations may include their logo or some other image related to the organization or subject of the certificate. For example, schools might include their mascot, a club might use a picture of a golf ball for a golf club award or a picture of a book for a summer reading program participation certificate.

Table No. 15: Presence and absence of Logo in certificates

Certificates	With Logo		Without Logo		Total
	Freq	Percent	Freq	Percent	
Academic	47	82.45	10	17.54	57
Experience	5	83.33	1	16.66	6
Training	26	100	-	-	26
Administrative	5	100	-	-	5
Miscellaneous	5	83.33	1	16.66	6
Total	88	88	12	12	100

The observation shows that the researcher has studied one hundred certificates of five different kinds. 82.45% (47 out of 57) academic certificates are with logo whereas only 17.54% (10 out of 57) of them are without logo. 83.33% (5 out of 6) experience certificates include logo whereas 16.66% (1 out of 6) of them are without logo. All of the training and administrative certificates are found with logo. The number /percentage of miscellaneous certificates having logo and not having logo are equal to the number / percentage of experience certificates. In totality, 88% certificates include logo whereas 12% of them exclude the use of logo. It indicates that logo is the major element of certificates despite some exceptions. The table makes us clear that logo is a must in training and administrative certificates.

c. Seal

A certificate might have a seal affixed (such as stick-on gold starburst seal) or have an image of seal printed directly on the certificates.

Table No. 16: Presence and absence of Seal in certificates

Certificates	With Seal		Without Seal		Total
	Freq	Percent	Freq	Percent	
Academic	46	80.7	11	19.29	57
Experience	4	66.66	2	33.33	6
Training	19	73.07	7	26.92	26
Administrative	5	100	-	-	5
Miscellaneous	3	50	3	50	6
Total	77	77	23	23	100

The above table shows the presence and absence of seal in different certificates. 80.7% (46 out of 57) of academic certificates have seal whereas 19.29% (11 out of 57) of them lack the seal. 66.66% (4 out of 6) of experience certificates contain seal whereas 33.33% (2 out of 6) of them do not contain seal. The percentage of training certificates having seal is 73.07 (19 out of 26) whereas

the percentage of not having seal is only 26.92 (7 out of 26). All of the administrative certificates have seal. Among six miscellaneous certificates, three (50%) of them are with seal and other three (50%) of them are without seal. In totality, 77% of certificates have seal whereas 23% of them do not have seal. Seal is optional part of a certificate. But in administrative certificates, seal is a must.

d. Lines

Some certificates may include blank spaces while others will have lines, like a fill-in-the-blank from where the name, description, date, and signature go (to be either typed or handwritten).

Table No. 17: Presence and absence of Lines in certificates

Certificates	With Lines		Without Lines		Total
	Freq	Percent	Freq	Percent	
Academic	51	89.47	6	10.52	57
Experience	5	83.33	1	16.66	6
Training	25	96.15	1	3.84	26
Administrative	5	100	-	-	5
Miscellaneous	5	83.33	1	16.66	6
Total	91	91	9	9	100

The table shows the presence and absence of lines in five different kinds of certificates. There are one hundred certificates altogether. Among them fifty-seven are academic, six are experience, twenty-six are training, five are administrative and six are miscellaneous ones. The percentage of certificates having lines is higher than those of not having lines in them. All of the administrative certificates have lines in them. Among fifty-seven academic certificates fifty-one (89.47%) are with lines and only six (10.52%) are without lines. The number of experience and miscellaneous certificate is equal. Their number of having lines and not having lines is also the same (5/5 out of 6/6

certificates have lines and 1/1 out of 6/6 does not have lines). In totality, 91% of certificates include lines whereas only 9% of them do not include lines in them. Thus, line is the major element of certificates. The tables shows that line is a must in administrative certificates.

3.3.3 Additional Elements

a. Photograph

Photographs are the pictures of a person or a certificate receiver. Pictures give the clear identification of the recipient. The train of issuing certificates with the recipient's photograph is being common nowadays.

Table No. 18: Presence and absence of Photograph in certificates

Certificates	With Photograph		Without Photograph		Total
	Freq	Percent	Freq	Percent	
Academic	17	29.82	40	70.17	57
Experience	-	-	6	100	6
Training	10	38.46	16	61.53	26
Administrative	2	40	3	60	5
Miscellaneous	2	33.33	4	66.66	6
Total	31	31	69	69	100

The above table shows the presence and absence of photograph in the certificates. There are one hundred certificates altogether. Only 29.82% (17 out of 57) of academic certificates are with photograph whereas 70.17% (40 out of 57) of them are without photographs. None of the experience certificates have photographs. Among twenty-six training certificates, only ten (38.46%) have photograph whereas sixteen others (61.53%) do not have photograph. Only 40% (2 out of 5) of administrative certificates are with photograph whereas 60% (3 out of 5) of them are without photograph. The percentage of miscellaneous certificates having photograph is 33.33% (2 out of 6) whereas

the percentage of them not having photograph is double (66.66% i.e. 4 out of 6). Only 31% of certificates include photograph and 69% of them exclude it. Photograph is the minor element of certificates. It is optional.

b. Background pattern

Not every certificate has an all-over background pattern, but it has become a part of certificates at present.

Table No. 19: Presence and absence of Background Pattern in certificates

Certificates	With Background Pattern		Without Background Pattern		Total
	Freq	Percent	Freq	Percent	
Academic	8	14.04	49	85.96	57
Experience	-	-	6	100	6
Training	1	3.84	25	96.15	26
Administrative	-	-	5	100	2
Miscellaneous	-	-	6	100	6
Total	9	9	91	91	100

The table shows the presence and absence of background pattern in different kinds of certificates. There are one hundred certificates altogether. Among them, 14.04% (8 out of 57) of academic certificates are with background pattern whereas 85.96% (49 out of 57) of them are without background pattern. 3.84% (1 out of 26) of training certificates is with background pattern whereas 96.15% (25 out of 26) of them are without background pattern. All of the experience, administrative and miscellaneous certificates are without background pattern. In totality, only 9% of certificates include background pattern and 91% of certificates do not include background pattern. Thus, background pattern is the minor component of certificates.

c. Table

A table is a list of facts or numbers arranged in a special order, usually in rows and columns. Not every certificate has a table, but it has been used in some of the certificates at present.

Table No. 20: Presence and absence of Table in certificates

Certificates	With Table		Without Table		Total
	Freq	Percent	Freq	Percent	
Academic	-	-	57	100	57
Experience	-	-	6	100	6
Training	5	19.23	21	80.76	26
Administrative	1	20	4	80	5
Miscellaneous	1	16.66	5	83.33	6
Total	7	7	93	93	100

The table shows the presence and absence of table in the certificates. There are five kinds of certificates and the number is hundred. Among them, all of academic and experience certificates are without table. Among twenty-six training certificates, only five (19.23%) make use of table whereas twenty-one (80.76%) of them do not make use of table. The percentage of administrative certificates with table is very less. It is only 20% (1 out of 5) whereas 80% (4 out of 5) of administrative certificates are without table. The percentage of miscellaneous certificates having table is only 16.66% (1 out of 6) and 83.33% (5 out of 6) of them are without table. In totality, only 7% of certificates include table but 93% of them do not include table in them. Therefore, table is also minor element of certificates.

d. Box

A box is a small square or rectangle drawn on a page to write information in. The following table shows the presence and absence of box in certificates.

Table No. 21: Presence and absence of Box in certificates

Certificates	With Box		Without Box		Total
	Freq	Percent	Freq	Percent	
Academic	1	1.75	56	98.24	57
Experience	-	-	6	100	6
Training	1	3.84	25	96.15	26
Administrative	1	20	4	80	5
Miscellaneous	-	-	6	100	6
Total	3	3	97	97	100

The table shows that there are one hundred certificates altogether. Among them, fifty-seven are academic, six are experience, twenty-six are training, five are administrative and six are miscellaneous certificates. Only 3% of certificates are with box whereas 97% of certificates are without box. Thus, box is also a minor element of certificates. Box may come in academic, training or miscellaneous certificates but the case is very rare.

3.3.4 Virtual Elements

a. Colour: Colour is the appearance that things have that results from the way in which they reflect.

Table No. 22: Colour in Certificates

Certificates	Colour		Black and White		Total
	Freq.	%	Freq.	%	
Academic	38	66.66	19	33.333	57
Experience	3	50	3	50	6
Training	18	69.23	8	30.76	26
Administrative	5	100	-	-	5
Miscellaneous	2	33.33	4	66.66	6
Total	66	66	34	34	100

The table shows that there are one hundred certificates in total. Among fifty-seven academic certificates, thirty-eight (66.66%) appear in colour and nineteen (33.33%) appear in black and white. 50% (3 out of 6) of experience certificates appear in colour and 50% of them appear in black and white. Among twenty-six training certificates, eighteen (69.23%) appear in colour and eight (30.76%) appear in black and white. All of the administrative certificates appear in colour. 33.33% (2 out of 6) of miscellaneous certificates appear in colour and 66.66% (4 out of 6) of them appear in black and white. To analyze all the samples, 66% of certificates appear in colour and only 34% of them appear in black and white.

b. Font: Font is the particular size and style of a set of letters that are used in printing or writing.

Table No. 23: Font in Certificates

Font	Italics		Roman / Ordinary		Cursive		Bold		In-boost Letters		Total
	Freq.	%	Freq.	%	Freq.	%	Freq.	%	Freq.	%	
Certificates	Freq.	%	Freq.	%	Freq.	%	Freq.	%	Freq.	%	
Academic	26	45.61	16	28.07	15	26.31	57	100	57	100	57
Experience	-	-	6	100	-	-	6	100	6	100	6
Training	12	46.15	11	42.30	3	11.53	26	100	26	100	26
Administrative	2	40	3	60	-	-	5	100	5	100	5
Miscellaneous	1	16.66	5	83.33	-	-	6	100	6	100	6
Total	41	41	41	41	18	18	100	100	100	100	100

The table shows that there are one hundred certificates altogether. Among fifty-seven academic certificates, twenty-six (45.61%) include italics, sixteen (28.07%) include roman and fifteen (26.31%) include cursive font. All experience certificates contain roman font. Among twenty-six training

certificates, twelve (46.15%) include italics, eleven (42.30%) include roman and three (11.53%) include cursive font. Two (40%) of administrative certificates contain italics and three (60%) include roman font. 16.66% of miscellaneous certificate include italics 83.33% of them include roman font. None of the administrative and miscellaneous certificates include cursive font. 100% of all kinds of certificates contain bold and in-boost letters. In totality, the occurrence of italics and roman font is 41% each. The occurrence of cursive font is 18 percentages only.

c. Shape: Shape is the form of the outer edges or surfaces of certificates.

Table No. 24: Shape in Certificates

Shape	Rectangular		Square		Others		Total
	Freq.	%	Freq.	%	Freq.	%	
Academic	49	85.96	8	14.03	-	-	57
Experience	6	100	-	-	-	-	6
Training	26	100	-	-	-	-	26
Administrative	5	100	-	-	-	-	5
Miscellaneous	6	100	-	-	-	-	6
Total	92	92	8	8	-	-	100

The table shows that there are one hundred certificates altogether. Among fifty-seven academic certificates, only eight (14.03%) appear in square shape and forty-nine (85.96%) of them appear in rectangular shape. 100% of experience, training, administrative and miscellaneous certificates appear in rectangular shape. 92% of certificates appear in rectangular shape and 8% of them appear in square.

The research work has been accomplished despite some difficulties and challenges. The researcher collected 100 certificates of different genres. He categorized them into five different groups: Academic Certificates, Experience Certificates, Training Certificates, Administrative Certificates and Miscellaneous Certificates. He analyzed the language in terms of sentence types, tense, aspect, and voice. To study the components of certificates was also the area of study. Being the topic obviously new and unique, it was usual to appear some certain types of problems during the study period. The actual problem the researcher had to overcome was that the reference was very rarely available. Moreover, the researcher attempted to make the study more genuine and error free.

CHAPTER FOUR

FINDINGS AND RECOMMENDATIONS

This chapter presents findings based on the study of certificates issued by different institutions and offices. On the basis of analysis and interpretation of the data collected, the following findings have been drawn and some recommendations are listed based on the findings for further improvements.

4.1 Findings

The study has the following findings.

- i. The sentences have been observed on the basis of their types. Among them, simple sentences are dominantly (59.15%) used in the certificates and they are followed by complex sentences with their 23.85 percentage of occurrence. Simple Sentences are found the highest in the number and compound sentences are found the least in number. No compound sentences can be found in the administrative and miscellaneous certificates.
- ii. Regarding the tense used in the certificates, the non-past tense is used highly in the certificates. It is followed by the past tense.
- iii. Simple aspect is found most frequently (80.6%) in the certificates. So, simple aspect is predominant in certificates rather than any other aspects.
- iv. Perfect progressive aspect is found to be the least used aspect in the certificates. It is used only in the experience certificates.
- v. The average percentage of active voice has the highest position covering 87.23% (i.e. 246 out of 282) of the sentences used in the samples.
- vi. Certificate is composed of different elements. The researcher has found the four main types of components/ elements: Textual, Graphic, Additional and Virtual. Textual elements include title, presentation line, Recipient, From, Description, Date and Signature. Graphic elements

include Border, Logo, Seal and Lines. Photograph, Background Pattern, Table and Box come under the additional elements. Colour, font and shape are included under virtual elements.

- vii. All of the textual and graphic elements are the major and obligatory elements of certificates.
- viii. All of the additional elements are minor and optional elements of certificates although they are commonly used in the present day world.
- ix. 66 % of certificates appear in colour.
- x. Regarding the font, the occurrence of italics and roman is 41% each. The cursive font reserves only 18% of occurrence.
- xi. All of the certificates include bold and in-boost letters.
- xii. 92% of certificates appear in rectangular shape and only 8% of them appear in square.

Various governmental and non-governmental offices and institutions issue various certificates in the present day world. The present study was carried out to discover the different types of certificates that are issued and used in the real life situation. The study has met its goal. It has found five major types of certificates, such as Academic Certificates, Experience Certificates, Training Certificates, Administrative Certificates and Miscillaneous Certificates. The first type includes the certificates that are issued by the academic institutions, such as school, colleges, universities, etc. Transfer/ Character Certificates, Transfer Certificates, Character Certificates, Provisional Certificates, Migration Certificates, Original Certificates and School/College Leaving Certificates fall in this category. The second type includes the certificates, such as Work /Job Experience, Teaching Experience, etc. issued by an academic or non- academic institutions / offices. The third type includes the certificates issued to the individuals after the completion of short-term trainings or long-term trainings such as Teacher Training, Computer Training, Journalism, etc. On the other hand, Birth Registration Certificates, Marriage Registration Certificates, Death

Registration Certificates, Relationship Certificates, Migration Certificates, etc. are included in Administrative Certificates. There are still some other certificates which neither fall in Academic or Experience nor in Training or Administrative ones because of their imprecision. Thus, it is the best idea to put them under the separate category: Miscellaneous.

4.2 Recommendations

This is a descriptive study. However, a few recommendations for pedagogical implications have been suggested as below on the basis of findings of the study.

- i. Certificate is one of the medium of communication. It can be used privately or publicly. That is why this subject should be included in the course of mass media.
- ii. The style of writing in certificates doesn't follow the conventional rules of writing. Therefore, it is recommended that the student of mass communication and the student of English language should be well informed of it.
- iii. The educational planners, syllabus designers, text book writers and language teachers are recommended to include the format of certificates in the course of English from school to university level.
- iv. While designing a certificate, the designers should be aware about the different kinds of linguistic as well as non-linguistic features which have been used in the certificates.
- v. The certificate designers should expose the variety of authentic samples.
- vi. Imprecision in the certificates should be avoided.
- vii. Priority should be given to the short, simple and precise sentences as far as practicable.
- viii. Only one tense (either past or non-past) should be used in the certificates in order to avoid the ambiguity in them.
