LETTER OF RECOMMENDATION

This thesis entitled **Public Expenditure and Economic Growth in Nepal** has been prepared by Mahesh Acharya under my supervision. I hereby recommend this thesis for examination by the Thesis Committee as a partial fulfilment of the requirements for the Degree of Master Degree in Economics.

Kirtipur, Kathmandu

APPROVAL LETTER

We member of thesis committee, evaluated the thesis entitled **Relationship between Public Expenditure and Economic Growth of Nepal** prepared by Mahesh Acharya to the Central Department of Economics, Faculty of Humanities and Social Sciences in partial fulfilment of the requirements of the Master Degree in Economics have found satisfactory in scope and quality. Therefore, we accept this thesis as a part of the Degree.

ACKNOWLEDGEMENTS

This thesis entitled **Relationship between Public Expenditure and Economic Growth in Nepal** has been prepared for partial fulfilment of the requirements for the Degree of Master of Arts in Economics.

I am deeply indebted to my thesis supervisor Tara Prasad Bhusal, Associate Prof. Central Department of Economics (CEDECON), TU Kirtipur, for his constant encouragement, creative comments and suggestion to bring this thesis in this form. It would not have been possible for me to complete my study without his supervision, advice and direction. I would like to thank head of the department Prof.Dr.Ram Prasad Gyanwaly for his co-operation, suggestion and information.

Similarly, I express my great thanks to all my teachers from Central Department of Economics for their teachings, suggestions, guidance and care to me during my study of economics.

Finally, I thank my friends and family members for their strong help and support during my study.

Mahesh Acharya

November 2016

ABSTRACT

The debate over the role of the government in the economy has lasted for many decades, dating back to the times of the predominantly laissez-faire and classical economy policies. Role of public expenditure has shown mixed result around the world.

The general objective of the thesis is to find out the relationship between the government expenditure and economic growth in case of Nepal. Other objectives of the thesis are to find out the trend of the public expenditure and the economic growth of the Nepal from 1975 to 2015 and to find out the causality between the public expenditure and economic growth in Nepal.

ARDL techniques of cointegration and ECM transformation of the ARDL has been used for the long run and short analysis of the relationship between the public expenditure and economic growth. CUSUM and CUSUM square has been used to check the stability of the coefficient. Trend of public expenditure and economic growth has been analysed through the help of the descriptive analysis. Granger Causality test is used to check the causality between the variables.

It found that both the public expenditure and economic growth has increasing trend over the study period. From the results of ARDL and ECM model it is concluded that there is positive and significant relationship between the public expenditure and economic growth in Nepal both in short run and long run. It is found that the government expenditure, annual rainfall, openness of trade are the short run determinants of the GDP; rainfall do not affect the GDP in the long run and interest rate is a factor that effects GDP in long run but not in the short run.

LETTER OF RECOMMENDATION	i
APPROVAL LETTER	ii
ACKNOWLEDGEMENTS	iii
ABSTRACT	iv
TABLE OF CONTENTS	v
LIST OF TABLES	viii
LIST OF FIGURES	ix
ABBREVIATIONS	x
CHAPTER I: INTRODUCTION	1-4
1.1. Background of the Study	1
1.2. Statement of the Problem	2
1.3. Objectives of the Study	2
1.4. Hypothesis of the Study	3
1.5. Significance of the Study	3
1.6. Limitations of the Study	3
1.7. Organization of the Study	4
CHAPTER II: REVIEW OF LITERATURE	5-22
2.1. Theoretical Concept	5
2.1.1. Classical View on Public Expenditure	5
2.1.2 Keynesian View on Public Expenditure	6
2.1.3. Role of Public expenditure in the Neo-Classical Growth Theory	7
2.1.4. Role of Government expenditure in the endogenous growth model	7
2.1.5. Peacock and Wiseman hypothesis	8
2.1.6. Colin Clark hypothesis	9
2.1.7. Baumol's Hypothesis	9
2.1.8. Stanley Please Hypothesis	10
2.1.9. Rahn Curve	10
2.2. International Context	10
2.3 Nepalese Context	18

CHAPTER III: RESEARCH METHODOLOGY	23-36
3.1. Research Framework	23
3.2 Research Design	24
3.3. Sources of Data	24
3.4 Explanation of variables	24
3.5 Tools of Data Analysis	25
3.5.1 Unit Root Test	26
3.5.2 Cointegration Test	27
3.5.2.1 Autoregressive Distributed Lag Model (ARDL) Lag Model to Cointegration Analysis	27
3.5.2.2 Error Correction Modelling	28
3.5.3 Bound Test (F-Version)	29
3.5.4 Recursive Residuals, CUSUM Test and CUSUMSQ Test	30
3.5.4.1 CUSUM Test	30
3.5.4.2 CUSUMSQ Test	31
3.5.5 Granger Causality Test	31
3.5.6 LM, Normality and Heteroscedasticity Test	32
3.6 Specification of Model	32
3.6.1 Model Selection Criteria	33
3.6.2 Relationship between public Expenditure and Economic Growth	33
3.6.2.1 Hypothesis	34
3.6.3 Causal Relationship between Public Expenditure and Economic Growth	35
3.6.3.1 Hypothesis	35
CHAPTER IV: PRESENTATION AND ANALYSIS OF DATA	37-57
4.1. Nature and Trend of Government Expenditure and GDP	37
4.1.1 Trend of Ratio of Government Expenditure to GDP	39
4.1.2 Trend of Government Expenditure to Government	40
4.2 Relationship between Public Expenditure and Economic Growth	46
4.2.1 Graphical Representation of Public Expenditure and Economic Growth	48
4.2.2 Autoregressive Distributed Lag Model to Cointegration	50
4.2.3 Error Correction Version of ARDL	52
4.2.4 Stability Test	54
4.3 Causal Relationship between Public Expenditure and Economic Growth	56

CHAPTER V: SUMMARY CONCLUSIONS AND RECOMMENDATIONS	58-59
5.1 Summary	58
5.2 Conclusions	59
5.3 Recommendations	59
APPENDICES	60-68
