## Acknowledgements

This dissertation is an attempt to analyze the structure of Dangaura Tharu verb as spoken in Tulsipur municipality of Dang district. A number of people of the Tharu community in Tulsipur municipality and the organization like Backward Society Education (BASE) had a great cooperation in collecting and analyzing the data. I would like to express my sincere gratitude to all the people and institutions who have been involved in one way or the other in the completion of this study.

I would like to express my sincere gratitude to Dr. Dubi Nanda Dhakal, my supervisor, who reviewed all the chapters thoroughly and meticulously and provided me with insightful comments and invaluable suggestions. I am equally indebted to Prof. Dr. Dan Raj Regmi, the Head of the Central Department of Linguistics, for providing me this opportunity to prepare a research report in the form of M. A. thesis. Similarly, I am thankful to Dr. Balaram Prasain, Mr. Krishna Prasad Chalise, Mr. Netra Mani Dumi Rai for their technical guidance that helped me much to manage and analyze the collected data, and all the teachers who taught me at the CDL, Kirtipur. Moreover, I extend my sincere gratitude to Mr. Bhagiram Chaudhary, Tulsipur Municipality, Ward No. 6, Buddhanagar, Dang, Mr. Sushil Chaudhary, Tulsipur Municipality, Ward No. 6, Barwa gau, Dang, Mr. Defulal Chaudhary, Mr. Maya Ram Chaudhary and Mr. Yagya Raj Chaudhary all related to the BASE office, Dang for their assistance in collecting texts and related data.

I would also like to thank all the administrative staff at the Central Department of Linguistics who supported me during the preparation of this thesis. Finally I express my sincere acknowledgements to all the authors and researchers whose insights I have shared in this thesis.

Krishna Prasad Paudyal

## Abstract

"Dangaura Tharu Verb Morphology" is basically a descriptive presentation of the structure of Dangaura Tharu verbs, though insights from functional typological perspective have also been taken into consideration. It presents the internal structure of the Dangaura Tharu verb and analyzes the morphological alternations during the inflectional processes. The data for the study were collected in Tulasipur municipality of Dang district during my one month's stay there in 2070 V.S.

Dangaura Tharu is a variety of Tharu language spoken in the Terai and inner Terai districts of Mid- and Far-Western regions of Nepal. It is an Indo- Aryan language comprising the SOV constituent order. The structure of Dangaura Tharu verb is quite complex. The infinitival form of the verb ends with *-na* as in Hindi. The inflectional suffixes that mark the agreement with the subject argument are unique in this language. The agreement markers in Dangaura Tharu are *-i*, *-ya*, *-o*, *-a*, *-e* - which are separable from tense markers. Dangaura Tharu verbs agree with the number, person, gender, and honorificity of the subject argument. The language, like most of the NIA languages, exhibits three tense system- present, past, and future - with distinct tense markers for each tense. It employs different tense markers for verbal predicates and nonverbal predicates in the present tense. The verbal predicates employ *-t*, whereas the nonverbal predicates use *-n* as present markers. The past tense is characterized by *-n* in the first person singular and *-l* elsewhere. Similarly, it employs *-m* in the first person singular, *-h* in the third person, and *-b* elsewhere to indicate future tense. The progressive aspect is marked by *-ti*. Dangaura Tharu employs periphrastic structure for perfective aspects- participial form plus copula verb. It has peculiar particle *h* to mark Hearsay and a peculiar suffix *-s* added to the root form to mark desiderative function of the verb.

Moreover, Dangaura Tharu exhibits two different copula verbs: *ba*, and *hui* in present, *r h* in past, and *hui* in future. In the present tense, the locative and adjectival predicates share the copula form *ba*, whereas the nominal predicates use *hui*. However, such a distinction is not attested in the past and future tenses.
