

**EFFECT OF SOCIO-ECONOMIC STATUS ON MATHEMATICS  
ACHIEVEMENT OF SECONDARY LEVEL STUDENTS**

- DHANLAL DHITAL

1244

**A  
THESIS  
BY  
DHANLAL DHITAL**

**FOR THE PARTIAL FULFILMENT OF REQUIREMENTS FOR THE  
DEGREE OF MASTER'S IN MATHEMATICS  
EDUCATION**

**SUBMITTED  
TO  
DEPARTMENT OF MATHEMATICS EDUCATION  
CENTRAL DEPARTMENT OF EDUCATION  
UNIVERSITY CAMPUS  
TRIBHUVAN UNIVERSITY KIRTIPUR,  
KATHMANDU**

**2019**

EFFECT OF SOCIO-ECONOMIC STATUS ON MATHEMATICS ACHIEVEMENT OF SECONDARY LEVEL STUDENTS

### **Recommendation for Acceptance**

This is to certify that Mr. Dhan Lal Dhital has completed his M. Ed. thesis entitled **“Effect of Socio-economic Status on Mathematics Achievement of Secondary Level Student”** under my supervision during the period prescribed the rules and regulations of Tribhuvan University, Kirtipur, Kathmandu, Nepal. I recommend and forward his thesis to the Department of Mathematics Education to organize final viva-voce.

## **Letter of Approval**

This thesis entitled “**Effect of Socio-economic Status on Mathematic Achievement of Secondary Level Student**” submitted by Mr. Dhan Lal Dhital in partial fulfillment of the requirements for the Master's Degree in Education has been approved.

### **Viva-Voce Committee**

### **Signature**

Assoc. Prof. Laxmi NarayanYadav

.....

(Chairman)

Prof Dr .Hari Prasad Upadhyay

### Letter of Certificate

This is to certify that Mr. Dhan Lal Dhital, a student of Academic Year 2070/71 with Campus Roll No: 283, Thesis No. 1244, Exam Roll No: 280409 and T.U. Regd. No. 9-2-812-5-2008 has completed his thesis under the supervision and guidance of Mr. Lok Nath Bhatarai during the period prescribed by the rules and regulations of Tribhuvan University, Kirtipur, Kathmandu, Nepal. This thesis entitled on **“Effect of Socio-economic Status on Mathematics Achievement of Secondary Level Students”** has been prepared based on the results of his investigation. I, hereby, recommend and forward that his thesis is submitted for the evaluation as the partial requirements to awards the degree of Master of Education.

## **Acknowledgement**

I am heavily indebted to my respected supervisor, Mr. Lok Nath Bhattarai, Lecturer of Mathematics Education, Central Department of Education, T.U. Kirtipur, Kathmandu. His valuable and constructive suggestions, instructions and scholarly guidance that have become great property of this thesis. Without his constant supervision and intellectual guidance, this study would not have been appeared in this form. Therefore, I have not found any such words to express my deeper gratitude to him for his kind help.

I feel immense heartiest pleasure in expressing my gratitude to Assoc. Prof. Laxmi Narayan Yadav, Head of Department of Mathematics Education, for his Constructive and Valuable suggestions. My sincere appreciations go to my respected Prof. Dr. Binod Dhakal, Dr. Bed Raj Acharya, Dr. Ekaratna Acharya and all respected teachers of Department of Mathematics Education, FOE, TU for academic inspiration, encouragement, supports and suggestions to complete this thesis.

I would like to thank to the principals, mathematics teachers, and students of sampled schools for their help for collection of data and participated throughout my study. Without their participation and support, my research study would not have been possible.

Finally, I specially express my heartiest gratitude to my family members and my friends for their kind cooperation.

## **Abstract**

This is a survey study entitled “Effect of Socio-economic status on Mathematics Achievement of Secondary Level Students”. The objective of this study was to find the effect of socio-economic status on mathematics achievement at secondary level students. The sample of study included 120 students of grade IX from six government schools of Banke district were selected through simple random sampling method. An achievement test paper and questionnaire was the main instrument for the study. The mean, standard deviation, correlation and co-efficient of regression tools were used for analysis of data.

Mathematics achievement was explained by four explanatory variables entered the multiple equation respectively. The variables parents’ educations, family income, family size, were found to be most strongly associated with the mathematics achievement of boys and girls respectively. The mean score of educated parent’s children is higher than mean score of literate and illiterate. Students of educated family have relatively good achievement in mathematics rather than literate and illiterate family. Similarly, the variable parents’ occupation was found to be positive influence on boy’s mathematics achievement and family income was strongly negative influence on girl’s mathematics achievement. Most of the children parents are engaged in the agriculture. There is more variability in the achievement of job occupation parent’s children than the agriculture and business occupation parents children. There is more variability in the achievement of low income and middle-income family’s children than high-income family children. Achievements of mathematics students were found to be positively associated with the parents’ education, parents’ occupations, parents’ income and family size.

On the basis of above findings, the researcher concluded that the socio-economic status of the student affects directly in the mathematics achievement. Parents’ Education status was found

to be most strongly associated with mathematics achievement. In addition, family income and family size are low associated with mathematics achievement. Other socio-economic related variables parents' occupation had a negative effect on the mathematics achievement. The family education is found to be highly signification in mathematics achievement in boy where as family size in girls.
