

CHAPTER ONE

INTRODUCTION

The present study is entitled **Current Practices of Code mixing in Nepali Novel: A Case of Priya Sufi** consists of background of the study, statement of problems, objectives of the study, research questions, significance of the study, delimitations of the study and operational definitions of key terms.

1.1 Background of the Study

Language is the system of communication in speech and written which is used by people. It is very essential in human life. Through language human can communicate to fulfill their needs and get important information. In other words, it is a means of communication through which speakers can express their views, feelings, emotions, thoughts, etc. In this regard Tribus (2017) states, “Language is a vital tool that allows us to connect and command, to warn and welcome, and to anchor abstract thought in concrete words in our pursuit of higher knowledge.” He also says, it is an artistic medium through which we express our humanity. Moreover, it is a god’s special gift to humankind. Without language human civilization as we have today, would have remained impossibility.

Similarly, Trudgill (1983, p.1) argues, “Language is not just means of communicating information. It is a way of establishing and maintaining relationship with other people.” Trudgill’s definition reveals that language is not only used for communication but it is also used as maintaining relationship with people in a society. Language and society are interdependent terms. They cannot be completed if they are fragmented from each other. Society is a group of people who are drawn together for a certain purpose or purposes. Language on another hand is what the members of a particular society speak. It shows that the definition of society and language are not independent. Moreover, the study of language in relation to human society is sociolinguistics.

Sociolinguistics is the discipline which is concerned with investigating the relationship between language and society with the goal of better understanding of the structures and functions of language that are used in social contexts, settings and situations. It also studies how language and varieties of a language functions are used in communication.

As Crystal (2008) argues, “Sociolinguistics is a branch of linguistics which studies all aspects of the relationship between language and society.” Similarly, Giyato (2013) states, “Sociolinguistics refers to the data of the society and analyze to linguistics.” It means that sociolinguistics study about the languages, which are used in society for communication. When people do conversation, they use more than one language. In this kind of situation, they sometimes speak by mixing languages or codes. Moreover, within a society people use varieties of language and at the same time they also deal with the process of code mixing and code switching according to the contexts and situation, which is termed as multilingualism. Most of the people in this world use more than one language in their communication. Similarly, all the people in this universe are multilingual or bilingual. Furthermore, people who are bilingual or multilingual they are familiar with different codes in their daily lives while communicating people also deals with different codes.

According to Wardhaugh (2002), “Code mixing is the juxtaposition within the same speech exchanged of passages of a speech belonging two different systems.”

Similarly, Saddono (2012) suggests that code mixing is the use of two or more languages by inserting elements of a language into another language. Based on Wardhaugh and Saddono definitions it can clarify that code mixing is the mixing of two or more languages in speech. Similarly, code mixing may occur within a multilingual setting where speakers share more than one language. In the multilingual setting or societies, code mixing plays a vital role as a communicative tool. The code-mixing phenomenon is very significant and it

highlights the attempt made by the bilingual or multilingual users for the communication. Moreover, code mixing is very important for everyone, especially for people who live in multilingual society. The present multilingual scenario gives importance to the learning of English language because English has become a language of trade, commerce, industry, aviation, business, IT and others many more fields.

Code mixing phenomenon becomes an interesting topic to be discussed, especially in Nepal, where society uses more than one language. Similarly, the Nepalese condition of multilinguality and multiculturalism necessitates communicating in many languages and makes it almost compulsory to mix several codes of different languages. In addition to the bilingual or multilingual people, several things cause code mixing. According to Sridhar (1996) code mixing is used as an identity marker. One may use certain codes to make certain identities. In this case, Attamimi (2013) states that there are three things behind the occurrence of code mixing: social status, education, as well as social class of language users which are called role factors.

English is worldwide spoken language. It is the most widely taught, read, and spoken language that the world has ever known. In the case of Nepal, English as one of the international languages has great influence to the most Nepalese. In speaking, many people often insert the English expressions into their discourse. However, people communicate to each other is not only by speaking but also by writing. So, due to the use of English codes in writing, we find English mixed codes in Nepali literature too. Especially, those writers who write different literary artifacts for young generation they use English mixed codes according to the situation. Due to the massive use of English language in every field, people use English codes in their everyday life so we find English language in Nepali literature too. It means we have noticed many mixed codes of English in our Nepali literary works.

1.2 Statement of the Problem

Code mixing is an interesting and useful device of communication. It is used in most of the countries in the world. Broadly speaking, code mixing refers to the use of more than one language. In this regard, Hudson (1996, p.53) argues that code mixing as “A case where a fluent bilingual talking to another fluent bilingual changes language without any change in the situation.” Furthermore, he also says that to get the right effect the speakers balance the two languages against each other as a kind of linguistic cocktail. In the process of code mixing, a speaker or writer mix words, phrases, clauses and sentences of one language in the structure of another language. Similarly, Tay (1989,p.408) states that code mixing involves the embedding or mixing of various units, i.e. morphemes, words, phrases, and clauses from two distinct grammatical systems or subsystems within the same sentence and the same speech situation. Code mixing has been the basic needs for every people in present day in their daily communication. Due to the massive use of different codes in every field in multilingual context people trying to preserve their language as well as they also show their identity. Language and literature are the identity of the people. If language is lost, the identity of the people is also lost. Therefore, writers mix codes in one literary artifact to preserve languages and to show their uniqueness in writing style. Nowadays, English language is termed as international language, which has dominated over the other languages in the world. Therefore, majority of the people in the world use English language in their speech and writing.

There are numbers of researches regarding code mixing in Nepali novels. However, no one conducted the research in code mixing in Nepali novel Priya Sufi. Moreover, researches that were already conducted were either focused on fundamental units or major word classes, language contexts, language functions but my study focused on contextual use of mixed codes, word class and use of mixed codes in word, phrase, clause and sentence level. Therefore, this study will be best reference for further researches and unique as well.

1.3 Objectives of the Study

The research study is carried out with the following objectives:

- a) To identify English mixed codes in 'Priya Sufi' in terms fundamentals units of grammatical structure (words, phrases, clauses, sentences) and word class (Nouns, verbs, adjectives, adverbs).
- b) To explore different contexts of mixed codes in the novel 'Priya Sufi'.
- c) To suggest some pedagogical implications based on the findings of the study.

1.4 Research Questions

The following research questions are decided to accomplish the research task and solve the research problems.

- a) What are the mixed codes expressions found in the novel 'Priya Sufi'?
- b) What is the proportion of mixed expressions in terms of their grammatical level?
- c) What is the frequency of mixed English expressions in the novel Priya Sufi in terms of word, phrase, clause and sentence level?
- d) In which context the mixed codes are used in Nepali literary writing.

1.5 Significance of the Study

Every study has its own unique significance and importance. This study has also its own significance in the field of sociolinguistics aspect of language. The study will be helpful to the students of linguistics who are interested in code mixing in Nepali novel.

Similarly, this study will be significant for students and teachers especially for those who are interested in sociolinguistics. Moreover, this study will be useful to the Nepali literary readers to know the contexts of English mixed codes in the field of Nepali literature. Furthermore, this study will help language

teacher, linguist, textbook writers, language planners, syllabus designers, methodologist and sociolinguist, literary writers who have extreme concern in the area of sociolinguistics and code mixing. Finally, this research study will be much advantageous to the prospective researchers who want to carry out research related to this field because this research will explore some of the crucial concepts about code mixing.

1.6 Delimitations of the Study

The proposed research study is mainly limited to the following ideas:

- i) The study is limited on code mixing expressions in the Nepali novel 'Priya Sufi'.
- ii) The study is limited only to the area of code mixing.
- iii) The study is limited only to the frequency occurrence of English expressions in terms of grammatical categories like words, phrases, clauses and sentences.
- iv) Only English mixed codes are studied.
- v) It is limited only to the situational context of mixed expressions in the Nepali novel 'Priya Sufi'.
- vi) The study is limited to survey research design.

1.7 Operational Definition of Key Terms

In my study, the following terms are used as the key terms with the given specific meanings:

Sociolinguistics: - Sociolinguistics explores language in relation to society. In my study it is concerned with language as used for communication amongst different social groups of people in different social situations.

Bilingual: - A person or society who can speak two languages. In my study bilingual refers to the Nepali and English language.

Multilingual: - A multilingual refers to use of different languages while communicate with others according to the situation.

Code: - Any expression of language that is used for mixed in communication. In my code refers to the English and Nepali codes.

Code-mixing: - The term code-mixing in this study refers to the words, phrases and sentences which are mixed in another language while communicating and writing.

Context of language: - Context of language refers to the situation in which language is used.

PriyaSufi: -Priya Sufi is a Nepali novel written by SubinBhattarai published in 2075B.S

CHAPTER TWO

REVIEW OF RELATED LITERATURE AND CONCEPTUAL FRAMEWORK

This part of the study consists of the theoretical literature, review of the empirical literature, implications for the study, and conceptual framework.

2.1 Review of the Related Theoretical Literature

This research is mainly concerned with the mixed English codes in a Nepali novel. This section dealt with the theoretical review of code mixing and different aspects related to code mixing.

2.1.1 Code

In everyday interaction, people usually choose different codes according to the situation of communication. They may choose a particular variety because it makes them easier to discuss on particular topic. When talking about work in different fields, for instance, they may use the language that is related to those fields rather than the language use in daily communication.

A code is a system that is used by people to communicate with each other. When people want to talk with each other, they have to choose a particular code to express their feelings and emotions. According to Wardhaugh (1986.p.27), “A code is a system used for communication between two or more parties used in any occasions.” Similarly, Stockwell (2002) defines code as, “A symbol of nationalism that is used by people to speak or communicate in a particular language, or dialect, or register, or accent, or style on different occasions and for different purposes.” Regarding code, Richards et.al (1999, p.33) say,

“A code is a term which is used instead of language, speech variety or dialect. It is sometimes considered a more neutral term than the others.

People also used code when they want to stress the uses of a language or language variety in particular variety.”

From the aforementioned definitions given by different linguists, it can be said that code is a system that is used for communication between people in different situations. People mixed many codes while talking with people similarly they also switched codes and mixed different codes according to their context and situation.

2.1.2 Bilingualism/ Multilingualism

Most people as speakers usually occupy more than one code and require a selected code whenever they choose to speak with other people. The phenomenon of people having more than one code (language) is called bilingualism or multilingualism. (Wardhaugh, 1986, p.101)

To clarify the term bilingualism and multilingualism, Spolsky (1998, p.45) defines as “A person who has some functional ability in the second language.” It means bilingualism/multilingualism is alternative use of two or more languages by the same individual. Moreover, bilingualism begins when the speakers of one language can produce complete meaningful utterances.

Similarly, Sridhar in McKay and Hornberger (2009, p.50) states,

“Multilingualism or bilingualism involving balanced, native like command of all the languages is rather common. Typically, multilingual have varying degrees of command of the different languages. The differences in competence in the various languages might range from command of a few lexical items, formulaic expressions such as greetings of excellent command of the grammar and vocabulary and specialized registers and styles.”

To be more clear, multilingualism and bilingualism refers to the possession of different languages by a person or community. Furthermore, these two terms are primarily the features of the speech community. There are three reasons why someone becomes bilingual they are; namely membership, education and administration (Hoffman, 1991, p. 3). Based on the above explanation regarding bilingualism and multilingualism it clarifies that the bilingual and multilingual speakers make choice of one language instead of the others languages, being concerned with the type of interaction patterns and domain of language use.

In other words, since the members of bilingual or multilingual community vary in the capacity of mastering the language used in the community, they have to be able to get a condition where they can communicate effectively. This condition leads them to do code switching and code mixing.

2.1.3 Code mixing

Code mixing is the mixing of two or more languages in speech. It occurs within a multilingual setting where speakers share more than one language. According to Grin (2006) code mixing or a mixed codes defines as, “Using two languages such as third, new code emerges in which elements from the two languages are incorporated into a structural definable pattern.” It means the code mixing hypothesis states that when two codes switched languages constituted the appearance of a third code which has structural characteristics special to that new code.

Code mixing has become so common because it helps people for effective communication. Common bilingual people do not only do code mixing but also it is sometimes deliberately used by educated people. Therefore, Bokamb (1989, p.289) argues, “Code mixing is predominantly a communicative behavior of educated speakers.” It shows that code mixing has become a common tendency among bilinguals and multi-lingual’s. Code mixing refers to “All cases where lexical items and grammatical features from two languages

appear in one sentence.” (Muysken 2000, p.1).It clarifies that people use two languages whatever they like according to the situation or contexts within one sentence. Similarly, code mixing occurs on certain contexts, it shows that our different moods make us use different codes.

Code mixing is a result of multilingualism and bilingualism. Grin (2006) says, “Code mixing is necessarily a product of bilingual competence.” Moreover, people use mixed codes while expressing their feelings and emotions.

2.1.4 Types of Code mixing

Code mixing is mixing of two codes or languages, usually without changing the topic. Code mixing often occurs within one sentence; one element is spoken in language A and the rest in language B. Regarding code mixing Nababan (1993) states that, “code mixing is found mainly in informal interactions.” According to Soewito (1983), there are two types of code mixing inner code mixing and outer code mixing:

- a) **Inner code mixing:** - Inner code mixing is mixing language from the original language with all its variation. Inner code mixing shown, if the speaker inserts the elements of his/her own language into national language, the element of dialect into his own language or elements of varieties and style into his dialect.
- b) **Outer code mixing:** - Outer code mixing is mixing of speaker own language into foreign language. In outer code mixing speaker inserts the elements of his/her language into foreign language.

Similarly, according to Muysken (2000) code mixing are of following types:

- a) **Insertion:** - The concept of insertion is defined as insertion of material such as lexical items or entire constituents of one language into a structure of other language. The insertion process always occurs to the base language. In insertion code mixing a constituent is inserted. These inserted constituents are mostly nouns, adjectives and verbs.

- b) **Alternation:** - It is a very common strategy of code mixing. Alternative patterns often show some diversity of elements switched. The content words come in insertion whereas discourse particles and adverbs may be alternations. It is a form of code mixing in which two languages remain relatively separate.
- c) **Congruent Lexicalization:** - Congruent lexicalization is akin to language variation and style shifting. In this type of code mixing a grammatical structure is shaped by language A and B and words from both languages.

2.1.5 Reasons of Code Mixing

Most people as speakers usually occupy more than one code and require a selected code whenever they choose to speak with other people. “The phenomenon of people having more than one code is called bilingualism and multilingualism” (Wardhugh, 2008, p.101). In the bilingual or multilingual context, people mixed the codes while they are engaging in speech or writing activities. According to Wardhaugh (1986, pp.87-90) there are some reasons for code mixing which are:

- i) Solidarity with listeners
- ii) Choice of topic
- iii) Perceived social cultural distance
- iv) Lack of language loyalty
- v) Migration
- vi) Inter-caste marriage

Similarly, According to Hoffman (1991, p.116) there are number of reasons for bilingual or multilingual person to mix their languages, which are:

- a) **Talking about a particular topic:** - People prefer to talk about a particular topic in one language rather than in another. Maximum times a bilingual or multilingual speaker feels free and more

comfortable to express his/her feelings and emotions in another language, which is not his/her mother tongue.

- b) **Quoting somebody else:** - People normally used mixed codes while quote a famous expressions, proverbs, or saying of some well-known figures.
- c) **Being emphatic about something:** - Some people who are talking using language that is not their native language suddenly they want to be emphatic about something at that time, they mixed the codes to feel more convenient.
- d) **Interjection (inserting sentence filler or sentence connectors):-**
Interjection is word or expression that is inserted into sentence to convey surprise, strong emotion, and to gain attention. Interjection is a short exclamation like; hey!, Look! , etc. They have no grammatical value, but speakers use them quite often, usually more in speaking than in writing.
- e) **Repetition use for clarification:** - When a bilingual or multilingual person wants to clarify his /her speech or writing, he/she mixes the codes. For this, speakers or writers should have knowledge of both languages.
- f) **Intention of clarifying the speech content for interlocutor:** - When a bilingual or multilingual person talks to another bilingual or multilingual, there will be lots of code mixing. It means to make content of his/her speech more clear he/she uses mixed codes.
- g) **Expressing group identity:** - In present condition, people use mixed codes to express their identity. While the speaker talks with other which are not belongs to his/her community at that time he/she mixed codes from his/her language to show his/her identity.

From above discussion, it can be said that code mixing is universal phenomenon and people from bilingual and multilingual community use code mixing in their languages while they communicate with others.

Nowadays people use mixed codes in every fields according to the situation in conversation. This all happens due to the rapid development of IT, science, education system, trade and business and so on. According to Aryal (2008,p.40) in the context of Nepal, author's or literary writers generally use English mixed codes in their literary artifacts due to the following reasons:-

- i) Author's English knowledge.
- ii) Author's intention to address new generation.
- iii) Due to the demand of the topic.
- iv) Author's desire to catch the sentiments of young readers.
- v) Due to the lack of equivalent term.
- vi) Due to cultural influence.
- vii) Due to author's desire to give extra flavor on the part of readers.

2.1.6 Purposes of Code Mixing

Bilinguals /Multilingualand language learners mix codes for a numbers of reasons. Sociolinguists have found some common themes in the various purposes code mixing can serve. Code mixing can be used to quote, emphasize, add another level of meaning, clarify or evoke richer images, add humor, irony or wordy language play, mark closeness, emphasize bonds or, on the contrary, mark distance (Cassiellas-Suarez, 2017,p. 154).

Similarly, Humran&Shyamala (2018) discuss purposes of code mixing in their paper are communicating more effectively, showing identity through language, supplementing one's L2, and using L1 as scaffolding for L2.

i) Effective communication: - The first reason why multilingual mix code is for effective communication (Ahire,2015). In a study conducted on code mixing with the Marathi language, the author concluded that code mixing functions to meet the expressive needs of the speaker and the communicative needs of the listener and the speaker both. Similarly, people use mix codes in their communication to make their conversation easy, fruitful and unique.

Furthermore, code mixing is the best way for multilingual people to make their conversation effective.

In a multilingual setting, CM is more convenient than restricting oneself to only one language (Gilead 2016). It clarifies that people of multilingual society feel easy and comfort by using code mixing in their communication .Similarly, CM is used to limit miscommunication when a speaker's competency in a language is low. People who have low language proficiency in their own language they use other languages or mix other codes in their communication to make them competent.

ii) Identity: - For many multilingual, CM is used to show their identity (Daniel, 2016). Language and identity are two major aspects which are consider by people in linguistics and sociolinguistics. One reasons why multilingual code mix is to maintain their identity in both languages while also forming 'hybrid/third space identity' (Cassielles-Suarez, 2017,p.155).

Code mixing is especially common in multicultural or multilingual environments as a reflection of its people's group identity. Code mixing can also display in-group/out-group dynamics, either excluding a certain group of people or being more inclusive through language choice (Al-Azzawi,Saadoon&Mahdi,2017).

iii) Supplementation: - CM can be useful for filling in the gaps in one's speech with words from more than one language (Lu, 2014). Similarly, the use of CM essentially makes multilingual recall quicker by allowing them to choose the word or phrase that comes to mind first rather than limiting themselves to one language (Ahire, 2015).

Multilingual people mixed codes due to incompetence in their primary language to express their feelings, emotions and expressions. When a multilingual is able to code-mix as a way of quickening recall, language learners tend to code-mix because they do not yet have the competency to fully

express themselves in their target language (Keller, 2016). Therefore, they must supplement words they have not learned or do not remember in the target language with words from another language, often their mother tongue.

iv) Scaffolding: - CM can be used as scaffolding for one's TL at the beginning stages of language learning (Keller, 2016). By CM, language learners can use their first language to help them start speaking in second language sooner than they would be able to only using words they know in their L2 (Kustati, 2014). Kustati (2014) says, 'Scaffolding and supplementation are different from each other' where scaffolding is temporary, it mainly occurring at the beginning stages of language learning to assist flow of conversation and get a language learners speaking fast without spending long times in reading vocabulary in the TL. On the other hand, supplementation is permanent, it means people use this technique in communication while they feel difficulty and supplement words, phrases, and clauses of one language into another language.

Similarly, according to Holmes (1992) the purposes of code mixing are:

- i) Expressing solidarity and intimacy
- ii) Asserting status, pride and power
- iii) Lexical needs
- iv) Incompetence
- v) Expressing self emotion
- vi) Being for informative
- vii) Making jokes

2.1.7 Language Context in Relation to Code Mixing

Code mixing constitutes a mixing of two codes or languages, which is usually without a change of topic. It is very necessary for people who are in multilingual or bilingual setting. People in multilingual or bilingual setting use different codes in their conversation according to their situation or context. In

this regard Brown (2004,p. 132) says, “It is the context within which we exist, think, feel and relate to others. It is the ‘glue’ that binds a group of people together. It is our collective identity, our blue print.” Here Brown opines that the context is that where we exist or live. Language is also the glue and binds people through communication. Furthermore, context means situation of using language with different people. People use different codes or languages according to situation because same codes have different meaning. Moreover, context acts an essential role to determine the functions of codes or languages.

Especially, people mixed codes while they get confused and they mixed codes when they have command over multiple languages. In the context of Nepal, according to Niraula (2016) people used mixed codes in following fields.

- a) Science and technology
- b) Literature
- c) Education
- d) Trade and business
- e) Medical and engineering
- f) Tourism

Regarding context of language Thornbury (1999, p.90) states, “A de-contextualize words and de-contextualized sentences loss their meaning”. This definition clarify that all the expressions which are communicated by people are context sensitive and people should analyzed all the words, sentences and expressions according to the contexts because same codes have different meaning in different context.

According to Thornbury (1999) there are three types of contexts, they are:

- a) **Co-text:-** The co-text is the rest of the text that surrounds and provides meaning to the individual language item in the text. It is also known as linguistic context because it depends on the linguistic items on the text.

- b) **Context of culture:** - Context of culture simply refers to the complete meaning of the exponent, which also deals with the cultural aspects of the text.
- c) **Contexts of situation:** - It directly deals with the physical surrounding where the communication takes place.

In general, context of language is divided in three different types; they are linguistic context, situational context and experiential context.

- a) **Linguistic context:** - Linguistic contexts analyze the linguistic elements that are used inside the text. Similarly, in linguistic context people analyze the text before and after the given sentence.
- b) **Situational context:** - Situational context is the physical surrounding where the communication takes place. The situational contexts talk about the outside of the text.
- c) **Experiential context:** - Experiential context refers to the background knowledge of the participants. It is the context inside the participants. It is very difficult to communicate with each other if participants are not familiar with subject matter.

2.1.8 Fundamental Units of Grammatical Structure

Every language has various grammatical units. A grammatical unit in language is the stretch of the language that carries grammatical patterns. Sentences, clauses, phrases, words and morphemes are known as keys of language structure. According to Lyons (1968, p.65), “The relation between five units of grammatical description is one of composition.” It means the expressions that we use while talking and writing depends upon grammatical units. The short description of grammatical units is as follow:

- a) **Morpheme:-** A morpheme is the smallest meaningful unit in the grammar of a language. In this regard, Varshney (1999, p.129) states that, “Morphemes are customarily describes as minimal units of grammatical analysis. The units

of 'lowest' rank out of which words, the units of next 'highest' rank are composed." Based on the above definition it can say that morphemes are the minimal units of grammatical structure from those meaningful words are composed in various ways. Furthermore, it cannot be divided into smaller segments without changing its meaning. There are two types of morphemes:

- i) Free morphemes:* - Free morphemes refer to the meaningful segments that can stand alone with a specific meaning. For examples: open, boy, name, say, etc.
- ii) Bound morphemes:* - Bound morphemes refer to the smaller meaningful segments that cannot stand along with meaning. For examples: farmer, taken, does, etc.

b) Word: -Words are the smallest element that can be uttered in isolation with objective or practical meaning. A word may consist of a single morpheme or several morphemes. According to Bloomfield (1935, p.97), "Words are the minimum free form of a language which are constituted out of morphemes." Based on the morphemes constituents, Jindal et al. (1999, p.64) classify words into the following three types.

- i) Simple words:* - Simple words are those words that consist of a single free morpheme. For examples: good, plays, etc.
- ii) Complex words:* - Complex words consist of a base and derivational affix. For examples: enable, determination, etc.
- iii) Compound words:* -Compound words refer to those words that consists two or more independent words by themselves. For examples: over-ripe, inter-caste etc.

c) Phrase: - A phrase is a grammatical term referring to a group of words that does not include a subject and verb. According to Lyons (1968), "A group of words with its own subject and predicate, if it is included in a larger sentence is called phrase." Moreover, phrase also refers to a small group of words that

form a meaningful unit within a clause. In this regard Aarts and Aarts(1986,p.60) divides phrase in five types which are as follows:

i) Noun phrase: - Nouns phrase are those, which contain a noun – name, place or things and at least one modifier associated to the noun. For example:

He was wearing a black linen shirt.

ii) Verb phrase: - Every sentence will generally contain a verb. But, sometimes the action being described requires a more nuanced multi-words verb phrase. The phrase consists of the main verb and an auxiliary verb is known as verb phrase. For example: The teacher is writing the answer.

iii) Adjective phrase: - An adjective phrase is a group of words that describe noun and pronoun in a sentence. The adjective in an adjective phrase can appear at the start, end or in the middle of the sentence. For example:

The movie was not too terrible.

iv) Adverb phrase: - An adverb phrase is simply a group of two or more words that functions as an adverb in a sentence. For example: I parked the car right here.

v) Prepositional phrase: - Any phrase that consists of a preposition, and the object of the preposition, which will be a noun or a pronoun what we call a prepositional phrase. For example: Students are advised to be on time.

d) Clause:- In language, a clause is the smallest grammatical unit that can express a complete proposition. According to Lyons as cited in Varshney (1999,p.220), “ Any group of word which is grammatically equivalent to a single word and which doesn’t have its own subject and predicate is known as clause.” Functionally clause can be divided into two groups;

- i) **Main clause:** - A main clause is a clause that contains as a subject and an object. Similarly, main clause makes sense on their own. For example: I like bananas.
- ii) **Subordinate clause:** - A subordinate clause contains a subject and a verb, but it needs to be attached to a main clause because it cannot make sense on its own. For example: I first met her in Kathmandu where I live as a small child.

According to Wren and Martin (1994), the types of subordinate clause are as follow:

- i) **Noun clause:** - A noun clause is group of words containing a finite verb and functioning like a noun. For example: He said that he was tired.
- ii) **Adjective clause:** - According to Wren and Martin adjective clause is a group of words which contains a subject and a predicate of its own, and does the work of an adjective. For example: The book that is on the chair belongs to Aamod.
- iii) **Adverb clause:** - An adverb clause functions like an adverb in giving information about when, where, why, or how if an action occurred. For example: When he arrived, we were all sleeping.

e) **Sentence:** - According to Bloomfield (1935, p.111), “A sentence is an independent form, not included by virtue of any grammatical construction in any larger linguistic form. A group of words that are put together to mean something.” Similarly, Grinder and Elgin (1973) state that, “A sentence is a word or set of words followed by a pause and revealing an intelligible purpose’. Based on the above definitions it can be said that a sentence is a group of words that are put together to mean something. A complete sentence has at least a subject and a main verb to state a complete thought. Based on sentence structure they are divided in three types:

- i) **Simple sentence:** - A simple sentence refers to those sentences, which has only one clause and one independent variable. For example: A dog is running.
- ii) **Compound sentence:-** A compound sentence refers to those sentence which has two or more clauses. Similarly, those clauses are joined together with conjunctions, punctuation, or both. For example: The boy is standing, but the girl is sitting.
- iii) **Complex sentence:** - Complex sentence refers to those sentences, which contains a main clause and one or more subordinate clause. For example: The teacher, who is teaching us, is extraordinary.

2.1.9 Word Class (The Major Parts of Speech)

In every language, there are group of words that share grammatical characteristics. These groups are called parts of speech. In this regard Weaver(1996,p. 254) states that, “ A part of speech is a set of words with some grammatical characteristics in common and each part of speech differs in grammatical characteristics from every other parts of speech.” In the other hand major parts of speech refers to the content words that have a specific concrete meaning. Noun, verb, adjective and adverb are known as major parts of speech in grammar.

a) **Noun:** - In many languages, nouns have affixes indicating number, case, possessor and definiteness. Furthermore, Weaver (1996, p.252) stated that, “A noun is defined as a word that names a person, place, thing or idea.” According to Greenbaum and Quirk (1990) the classes of noun is as follow:

- i) **Common noun:** - Common noun refers to the name of any person, place, or thing. For example: - video, woman, basketball etc. There are two types of common noun:
 - 1) **Count noun**
 - i) **Concrete noun** For example: bun, pig etc.
 - ii) **Abstract noun** For example: difficulty, remark etc.

2) *Non-count noun*

i) *Concrete* For example: butter, gold etc.

ii) *Abstract* For example: music, laziness etc.

ii) *Proper noun*: - Proper noun refers to name of particular person, place or thing and begins with a capital letter. For example: Chicago, Ram, Winston Churchill etc.

Besides common and proper noun there are other two types of noun:

i) *Collective noun*: - Collective noun refers to a name of group of people or things. For example: herd, flock, family etc.

ii) *Compound noun*: - Compound noun is a noun consisting of more than a single word. For example: dining room, physical education, book keeper etc.

b) **Verb**: - A word that expresses the action, event or state is called verb. In other words, verb shows action that makes a statement, or show a link between word relationships. There are three types verb:

i) *Helping verb*: - A helping verb assist the main verb in a sentence. There can be more than one helping verb in each sentence. For example:- The members are going to the city tomorrow evening.

ii) *Action verb*: - An action verb tells what action a subject is performing, has performed or will perform. For example: My father delivers packages to department.

iii) *Linking verbs*: - A linking verb connects a subject to a noun or an adjective in the predicate. For example: My sister is a doctor.

c) **Adjective**: - Adjective is a word that modifies a noun or pronoun.

Furthermore, adjectives are words that describe the characteristics or properties of nouns. Therefore, they are also called as quality words. Generally, there are six types of adjectives:

- i) **Descriptive adjective:** - A descriptive adjective is probably what we think of when we heard the word adjective. Descriptive adjective are used to describe noun or pronoun. For example: beautifully, cute, silly etc.
- ii) **Demonstrative adjective:** - A demonstrative adjective refers to those adjective, which referring noun or pronoun. For example: This, that, there etc.
- iii) **Distributive adjective:** - A distributive adjective simply describe specific members out of group. For example: each, every, either, neither etc.
- iv) **Quantitative adjective:-** Quantitative adjective simply describe the quantity of something. For example: many, whole, one etc.
- v) **Interrogative adjective:** - Interrogative adjective simply ask the question and it's interrogate something. For example:- which, what, whose etc.
- vi) **Possessive adjective:** - Possessive adjective show possession similarly they describe to whom a thing belongs. For example: my, his, her, their etc.

d) Adverb: -Adverb is a word used to modify a verb, an adjective, or another adverb. In another word adverb is a word that supplies information about how, where, when, why and to what extent some action occurs. Normally there are five types of adverbs:

- i) **Adverb of time:** -An adverb of time tells us when something is done or happens. Simply we use it at the beginning or at the end of a sentence. For example: He collapsed and died yesterday.
- ii) **Adverb of place:** -An adverb of place tells us where something is done or happens. We use it after the verb, direct object or at the end of a sentence. For example: we can stop here for lunch.
- iii) **Adverb of manner:** -An adverb of manner tells us how something is done or happens. Mostly, adverbs of manner end in -ly such as

happily, sadly, and so on. For example: The brothers were badly injured in the fight.

- iv) ***Adverb of degree:*** -An adverb of degree tells us the level or extent that something is done or happens. For example: It was too dark for us to find our way out of the cave.
- v) ***Adverb of frequency:*** - An adverb of frequency tells us how often something is done or happens. For example: Peter seldom reads the Bible.

2.1.10 Relationship between Literature and Code Mixing

Literature begins in the creative possibilities of human language and in the desire of human beings to use their language creatively. In this regard, Moody (1987) states that, “Literature springs from our inborn love of telling a story, of arranging words in pleasing patterns of expressing in words some special aspects of our human experience”. There are number of branches of literature some of them are drama, novel, poetry and essay. The primary aim of literature is to give pleasure and entertainment. The greatest pleasure and satisfaction to be found in literature when it brings back to the realities of human situation, problem, feelings and relationship.

According to McFadden (1978, p.56), “Literature is a canon which consists of work in language by which a community defines itself through the course of its history.” This definition simply reveals that literature helps people to know about their language and it also helps them to show their identity. Moreover, literature enriches our lives because it increases our capacities for understanding and communication. Therefore, the writers use mixed codes in their literary artifacts to give knowledge about language and to make their literary artifacts unique and understandable. In the context of Nepali literature, the trend of using mixed codes within the same literary artifacts has no long history. Nepal is a multilingual country where people speak different languages within the same community. Due to this situation, the literary writers of Nepal

use mixed codes in their literature. English language is known as foreign language in the context of Nepal. The people of Nepal learn English for reading English books, trade and business, for abroad study and so on. Due to the huge increasing of English speaking people in Nepal the Nepali literary writers motivate to use English mixed codes in their literary writing to get attention of the people towards their literary artifacts.

2.1.11 An Introduction to Novel: Priya Sufi

A novel is a long prose narrative that describes fictional characters and events in the form of a sequential story. Similarly, according to Moody (1987) a novel is an invented prose narrative of considerable length and a certain complexity that deals imaginatively with human experience, usually through a connected sequence of events involving a group of persons in a specific setting. There are different types of novels in the fields of literature and novels are divided according to the writing styles of writers. Some of them are epistolary, picaresque, experimental, novel of manners, sentimental, gothic, historical, social realism and psychological. Every literary genre has some elements, the elements of novel are: plot, theme, setting, conflict, character and point of view.

The novel Priya Sufi is written by Nepali author and columnist Subin Bhattarai. Bhattarai has published many novels in Nepali literature. His first book is 'Kathaki Patra' an anthology of short stories was published in 2011. The stories revolve around the urban youths and love. Then after he wrote novel named 'Summer Love', which is known as commercially successful novel in the history of Nepali literature. After writing Summer Love, he wrote Saya and Monsoon, which are also very famous and loved by Nepali readers. Especially, Bhattarai is instantly popular among youths because he writes related with love, betray, college life and so on.

Priya Sufi is a new novel, which was published in 2075 B.S. The novel is a motivational story about sisters. Considering the rise in suicide rates the

authors tries to address issues related to suicide. In this novel, the writers tried to enlighten the youths about the true aspects of living. The story is all about Sada who was studying Master's Degree in Microbiology. The main characters of this novel are Sada, Sufi, Sarthak and Sada's and Sufi's father. Here in this novel, the readers will find the relationship with sisters, parents and lovers who help people who suffered in their life. The novel also gives powers to the readers being alive though they have suffered from very pitiful condition. Mainly, the novel is written in Nepali language but we find varieties of the English codes used within the Nepali language. In this novel, the writer has showed his magnificent writing ability by using different codes within the same language.

Novel at a Glance

Title:-*Priya Sufi*

Writer:-SubinBhattarai

Primary Language:- Nepali

Publisher:- Fine Print, Books Pvt. Ltd. Bishal Nagar, Kathmandu

Published Date:- 2075

ISBN No. 978-9937-665-59-9

2.2 Review of Empirical Literature

Research is an effort to search new facts, knowledge and principles in a scientific manner. It is discovery of truth with the help of study, observation, comparison and experiment. It requires the knowledge of related field to establish a proper linkage between the principles and practices. This research on code mixing in a Nepali novel helps to find out mixed English expressions in the conversation. Many research works have been carried out related to English code mixing nationally and internationally.

Yadav (2012) carried out research on "English Code mixing in Maithali Dramas: 'Orijnalkam' and 'Shapathgrahan'". The main objective of his study

was to analyze the code mixing in Maithali dramas in terms of major word classes and sentences. He used survey research design to complete his study. The secondary sources were his main source of study. For the population of his study, he used two Maithali novels. As a sample of his study, he used English mixed codes that are used in the novels and for research tools; he used checklist and note taking. On the basis of analysis and interpretation, he has concluded that in Maithali dramas word level mixing was found in the greatest number. Similarly, he had also found nouns were remarkably in the highest position in mixing. Their occurrences were 78.05% in OrijalKam and 85.60% in Shapathgrahan and noun phrases found in the highest position (i.e. 50.00% in OrijalKam) and (85.71% in Shpathgrahan). In clause level analysis, he found that 'finite clause' were in the greatest position (i.e. 44.44%) in Shapathgrahan. In sentence level analyses, he had found that simple sentences were found in greater percent (i.e. 95.66%).

Chhetri (2012) conducted a research entitled "An analysis of English Code mixing in Nepali Film Songs." The main objectives of his study were to find out the English code mixing in Nepali film songs and find out the context and reasons for English code mixing. Here, he used survey research design to achieve his objectives. He used only secondary sources of data. For the population of his study he used one hundred twenty Nepali filmy songs from them he used only twenty Nepali filmy songs as a sample for his study. Similarly, he used observation and checklist as a research tools in his study. Based on analysis and interpretation, he concluded that he found most of the mixed codes belong to the noun category. He had also found that prepositions have occupied the least percentage in the Nepali film songs. Similarly, the study found that the influence of English language as the major cause of code mixing. Regarding context, the study had found that English codes have occurred mainly in persuading, to makes others happy, to establish relationship, while greeting and to describe or praise others.

Karki (2014) has conducted a research entitled “Codemixing: A case of Karnali Blues”. The main objective of his study was to explore the ratio of code mixing at different level of grammar and reasons for code mixing in different contexts. He used both primary and secondary sources for his study. On the basis of analysis and interpretation he had concluded that the ratio of noun words is relatively higher than the verbs. He also found that the ratio of phrases, clauses and sentences is relatively fewer than the ratio of words. Regarding the reasons for code mixing in different contexts writer found that some reasons they are; global spread of English, contextualization, provisions of loan words, writer’s writing style, intelligibility, readers preference and so on.

Yadav (2015) conducted a research entitled ‘Code mixing in LEKHAKKI SWASNI’. The main objective of his study was to find out and analyze English code mixing in terms of word class, context of code mixing and frequency of mixed codes. Similarly, his study also focuses on find out the attitude of literary writers and readers towards code mixing in Nepali novel. He used survey research design for his study. Similarly, he used both primary and secondary sources for data collection procedures. For the completion of his study, he used twenty literary writers and twenty literary readers as a population. Moreover, he used purposive sampling procedures for fixed sample for his study. In his study, he used observation and questionnaire as a research tools. On the basis of analysis and interpretation, he had concluded that word level mixing was found in the highest number. Similarly, he also said that nouns were used highly in terms of word class. Regarding context, he had found that while talking about education, film, vehicle, hotel and food, media and communication English mixed codes are used more. While talking about reasons of code mixing he found linguistic imperialism, influence of western culture and fashion of using English codes in communication.

Punmagar (2016) carried out a research entitled “English Code mixing in Magar Literature: A Case of AachhamChetaika”. His main objective was to find out English codes in novel with situational contexts and try to find causes of code mixing. He applied survey research design and used purposive non-random sampling procedures for secondary sources of data collection. He used both primary and secondary sources for his study. For the population of his study he used all the English mixed codes, which were used in the novel, and as samples, he used sixty mixed codes and five Magar Kham literary figures. He used observation checklist and questionnaire as a research tools for his study. On the basis of analysis and interpretation he concluded that words level codes were found in higher frequency (i.e. 81.33%) whereas sentences were found in least frequency (1.34%). From words, he found noun as higher frequency. While talking about contexts he found most of the mixed codes are used during conflict situation. He also found some causes of English code mixing in Magar Literature that were lack of equivalent terms, advancement of time, lack of language transfer to the younger generation.

Niraula (2016) carried out a study on “English Code mixing in China HarayekoManchhe”. Her objective was to find out English expressions in terms of word, phrase, clause and sentence level. She applied descriptive survey design and only secondary sources of data were used to collect data from novel. She used all the mixed English expressions that were used in the novel as a population for her study and she used purposive sampling for sampling procedure. Similarly, in her study she used observation and diary as a research tools. She concluded that word level mixed codes were found in higher percentage (i.e. 67%). Similarly, most of the expressions at word level used in novel is noun. Nouns covered 85% of the word occurrence, which contained 323 words out of total 381. From the functional point of view all the five different types of sentences except exclamatory had been not mixed in the novel. Similarly, from the structural perspective all the English sentences used in novel were only simple sentences.

Although the research works mentioned above were related to code mixing, no research yet, has been carried out on Current Practices of Code mixing in Nepali Novel : A Case of Priya Sufi. By observing these studies, I knew that the code mixing is common in different modes of communication. Most of the researchers found that English words used in Nepali language. This study was different from other research study in terms of population and data analysis procedures. In my research study, I had examined the English words, which were used in the Nepali novel Priya Sufi and the context in which they were used. Therefore, it was different from other studies under the department of English Education TU.

2.3 Implications of the Review for the Study

All above-mentioned studies were mostly related with my study. From those studies, I had received many insights regarding the formulation of research tools, methodology, and analysis of the data. It means the review of the study helped me in my study a lot. No doubt, literature review plays a crucial role in research process. In the process of reviewing literature, I had gone through different books, journals, literatures, articles and online resources. From reviewing them, I developed ideas on my study, which helped to make my research relevant as well as valid.

Here, Yadav (2015) enlightened me with the idea and knowledge about analyzing mixed codes in terms of word class, frequency of mixed codes, reasons and contexts. Similarly, Yadav's (2012) helped me while formulating research questions and objectives. Chhetri's (2012) research study helped me in data collection procedures as well as in analyzing data in terms of word class and language context. In the same way, Karki (2014) and Punmagar (2016) helped me to familiar with code mixing in the Nepali novel and it also gave me clear ideas related with research design, method, sampling procedures and tools as respectively. Furthermore, Niraula (2016), assisted me in sampling

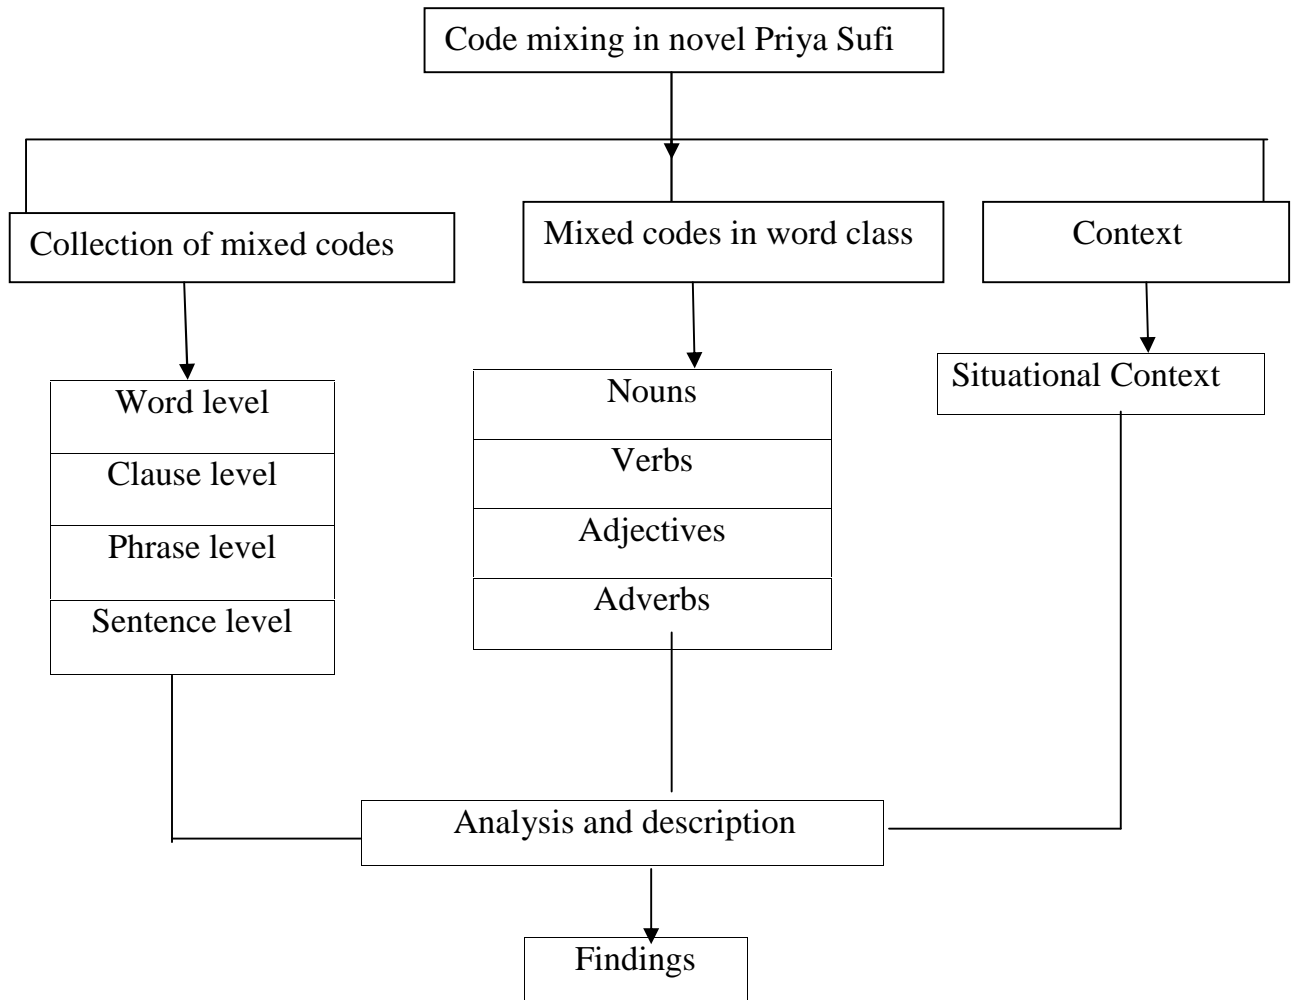

procedures. This study also helped me in data collection procedures and data analysis and interpretation procedures.

Literature review is an integral part of entire research process, which makes a valuable contribution to almost each and every operational steps of study. All the literatures, which were mentioned in this study, said that in Nepali language the English mixed codes were found generally in word level, sentences level and phrase level. Similarly, the above study also said that naming words were more frequently used than adjectives, adverbs and verbs.

Overall, the above review helped me in conceptualizing the theory of code mixing, employing the methodology and generalizing the findings. The study of Niraula (2016), Punmagar (2016), Karki (2014), Chhetri (2012), Yadav (2012) and Yadav (2015) provided me significant inputs to lead this study ahead.

2.4 Conceptual Framework

Conceptual framework is the graphical representation of whole research that shows key factors, concepts or variables and presumed relationship among them in a glance.

CHAPTER THREE

METHODS AND PROCEDURES OF THE STUDY

This section includes the methods and procedures of the study. It includes design of the study, population, sample and sampling strategy, research tools, sources of data, data collection procedures, data analysis and interpretation procedures and ethical considerations.

3.1 Design and Method of the Study

A research design is a procedural plan that is adopted by the researcher to answer the questions validly, objectively, accurately and economically. According to Kerlinger (1986, p.279), “A research design is a plan, structure and strategy of investigation so conceived as to obtain answers to research questions or problem.” This study followed survey research design. Survey research is the most popular design of research in social science including in the field of education.

According to Issac and Michael, (1997,p.136) ,

“Survey research is used to answer questions that have been raised, to solve problems that have been posed or observed, to assess needs and set goals, to determine whether or not specific objectives have been met, to establish baselines against which future comparisons can be made, to analyze trends occurs time, and generally to describe what exists in what amount and in what context.”

Similarly, Hutson (1990) as cited in Ojha and Bhandari (2013), “Survey research is the method of collecting information by asking set of pre-formulated questions in a pre determined sequence in a structured questionnaire to a sample of individual so as to be representative of a define population.”

Survey research entails the collection of data on a number of units and usually at a single time, with a view of collection systematically a body of quantifiable data in respect to a number variable, which are then examined to different pattern of association. The aim of survey research design is generally to obtain a snapshot of conditions, perceptions, attitudes, and events at a single point of time. Survey research can be exploratory, descriptive or analytical. It is useful for gathering information, attitudes and preferences, and, beliefs and predictions. Moreover, Survey is usually done in natural setting. Data in survey design are collected through questionnaires, interviews, test scores, attendance rates, attitude scales, and observation schedules and so on.

Regarding to the survey research, different researchers mentioned different process. According to Brown (2001,p. 8) , the steps or process of survey research can be as follow:

- i) Planning the survey
- ii) Developing the instrument
- iii) Gathering the data
- iv) Analyze the data statistically
- v) Analyzing the qualitatively
- vi) Reporting the results

In the case of my research, I used survey research design and I collected data from observation-checklist and note taking. Similarly, in this study, I used only secondary sources and my study was descriptive.

3.2 Sources of Data

In this study, only the secondary sources of data were used.

3.2.1 Secondary Sources of Data

The main source of data was Nepali novel Priya Sufi written by SubinBhattarai. Some of the books, articles, magazines, journals, thesises

approved from Department of English Education and many other researches related to code mixing were the sources of data for my study.

3.3 Population, Sample and Sampling Strategies

The novel 'Priya Sufi' was selected as the subject of the research. The population of this study were all the mixed English expressions used in the novel Priya Sufi. The sample of the study included 586 mixed English expressions. In order to select the sample for this study, the researcher followed purposive non-random sampling strategies.

3.4 Research Tools

Research tools are important aspects of any research. Research tools help a researcher to gather required information to accomplish the study. In this research, researcher used observation checklist and note taking to collect data.

3.5 Data Collection Procedures

I followed the given procedures for the collection of secondary data for this research study.

- i) First, I went through the novel "Priya Sufi".
- ii) Then, I went through the novel minutely and listed out all the mixed English expressions.
- iii) I read novel repeatedly to make sure that all the data were collected or not.
- iv) Then after, all the data were record in the diary under specific topics with page no. given in the book.
- v) Next, I prepared observation checklist for all the English codes, which were mixed in the novel.
- vi) Finally, I analyzed the data comparatively.

3.6 Analysis and Interpretation Procedures

The collected data were analyzed, tabulated and presented using tables, figures, lists, and so on systematically and descriptively. This research study had followed the qualitative research study to analyze and interprets the data.

In this research study, the systematically collected data were analyzed descriptively being based on percentage and frequency.

3.7 Ethical Considerations

Ethical aspects plays important role while doing a research. Therefore, while conducting research, the researcher should be careful about ethical issues. To maintain the ethicality, I adopted the following ethical considerations:

- i) I did not use the data for any other purpose except for my study.
- ii) I did not change the data, which were collected, for my study.

CHAPTER FOUR

ANALYSIS AND INTERPRETATION OF DATA

4.1 Analysis and Interpretation of Result

Code mixing is a phenomenon that frequently occurs in multilingual society. Nowadays, it has been found that Nepalese who have well command over English often mixed codes English into Nepali. Especially, people who have the passion of learning English used more in their communication. Due to the globalization, people and the communities are being exposed to the external world day by day. By connected with foreign people, Nepalese people are adopting their culture, language and fashion. This all activities play a vital role to increase code mixing especially the English codes. The detailed analysis and interpretation of the collected data has been carried out as below in separate sub-headings.

4.1.1 Holistic Analysis of Mixed English Expressions

This section covered the total English expressions mixed in the novel Priya Sufi. All the mixed English expressions were classified into four categories, which include word, phrase, clause and sentence. But, in this novel there was no code mixing in clause level. So further analysis has not been made any more at the clause level. The following table illustrates the mixed English expressions in the novel Priya Sufi.

Table 1. Holistic Analysis of Mixed English Expressions in Priya Sufi

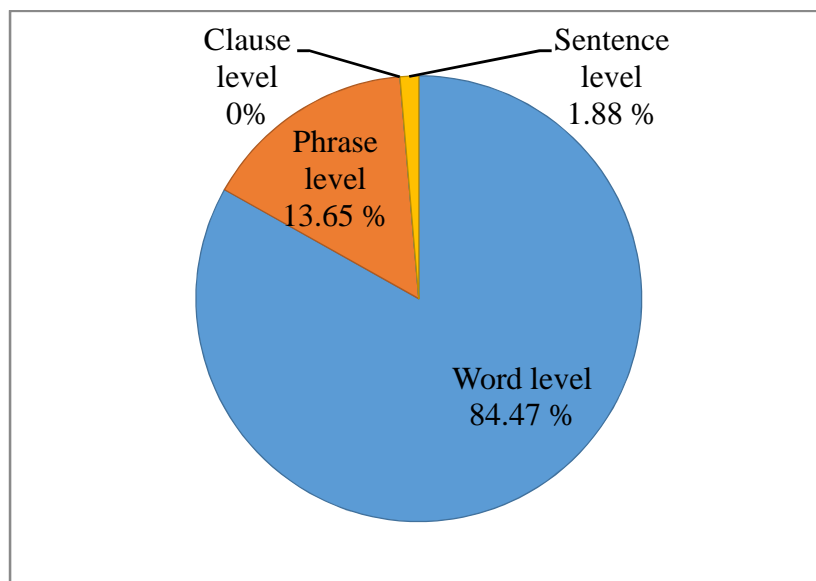

S.N	Expression Category	Number	Percentage
1	Words	495	84.47 %
2	Phrases	80	13.65 %
3	Clauses	0	0 %
4	Sentences	11	1.88 %
	Total	586	100 %

Table 1 shows 586 different English expressions were used in this novel Priya Sufi. Among them, 495 were from word level which occupied (84.47 %) of the total expressions. This is the most frequent category in the comparison to others that follow. Similarly, there were 80 different phrases in the novel occupying (13.65%) of the total. In this novel, the researcher did not find any expressions in the clause level but (1.88%) consisting 11 different expressions were observed in sentence level. The table 1 illustrates that the maximum number of the English expressions mixed in the novel was in word level. The least but significant number of English expressions were found in the sentence level but none of the clause was used in the novel Priya Sufi.

For Examples:

- Sarthakkaba*Chainsmoker*thiya. (page no. 35: Word level)
- Sadaguilt*y feelgardaichup*basi. (Page no. 149: Phrase level)
- Sarthaklethoraihaserabhanyo, ‘*I am proud of you, Sada.*’ (Page no. 309: Sentence level)
- Usko dui barshakopadhail*ossbhayo*. (Page no. 293:Word level)
- Phone ma *message type*gari, ‘*Sadhaisadhailaibida, Sarthak.*’(Page no. 219: phrase level)

Figure 1.Holistic Analysis of Mixed English Expressions in Priya Sufi.

4.1.2 Frequency wise Analysis of Mixed English Expressions

One of the important features of the mixing of expressions in Priya Sufi is their repetitions. Many expressions were found repeated in phrases and words. The frequency of their repetition has been illustrated in the following table.

Table2: Frequency Wise Analysis of Mixed English Expressions

WORDS	S.N	Frequency	Number	Examples
	1	47 times	1	Phone
	2	46 times	1	College
	3	28 times	1	Class
	4	27 times	1	Bike
	5	20 times	3	Toilet, wheelchair, diary
	6	19 times	1	Gate
	7	18 times	3	Taxi, table, office
	8	15 times	1	Exam
	9	14 times	1	Miss
	10	13 times	4	Colour, start, fail, aspirin
	11	12 times	1	Tryptomer
	12	11 times	1	Injection
	13	10 times	1	Mobile
	14	9 times	3	Scorpio, scooter, jeans
	15	8 times	7	Sumo, side, coffee, position, bed,etc.
	16	7 times	9	Pass, number, lipstick, feel, etc.
	17	6 times	14	Call, cinema, canteen, handle, etc.
	18	5 times	16	Lift, juice, school, frock, dating, etc.
	19	4 times	24	Dial, pipe, lab, shirt, stand, top, etc.
	20	3 times	37	Network, break, seat, discount, etc.
	21	2 times	85	Meter, ring, folder, dose, nonstop,
	22	1 times	280	Reptile, love, hammer, firm, cricket
		Total	495	

P	S.N	Frequency	Number	Examples
H	1	4 times	1	Phone switched off
R	2	3 times	2	Second semester, class test
A	3	2 times	16	Result negative, gym join, proud feel, etc.
S	4	1 times	61	Start button, bike start, jam miss , etc.
E		Total	80	
S				

	S.N	Frequency	Number	Examples
SENTENCES	1	1 times	11	Go to hell, I am proud of you, etc.
		Total	11	

As table 2 indicates, maximum numbers of repetitions were found in the word level. The word *phone* was the most frequently used word repeating 47 times in the novel. Similarly, the word *college* was also used frequently by the repeating 46 times. Likewise, the words *class* and *bike* were the frequently used words repeating for more than 20 times. The study found that the list of 280 different English words that were used only once time.

Similarly, in the case of phrases, *phone switched off* was the most frequently used phrase repeating four times. Likewise, the study found that 61 different phrases were used in the novel *Priya Sufi* without any repetition.

Likewise, the researcher observed frequency of repetition in the sentence level too. But, there were no any sentences which were been repeated.

4.1.3. Situational Contexts of Code Mixing

Simply, context refers to the situation where language is used. Similarly, people find the meaning of linguistic units according to the contexts.

Throughout this novel, researcher found different situations where linguistic units were used. The writer of this novel *Priya Sufi* had mixed English words, phrases and sentences in the following situations.

1. While talking about hospital and health

- J Sarthaklepaloaayepachhi OPD *koticketkatidiyo*. (page no. 63)
- J Tintinhaptama*penicillin*lagaununachhutaunu. (page no. 85)
- J Uskorogpuraiaafno*firm* ma thiyo. (page no. 92)
- J Yoekhaptama*progress* hunchha, ma herchhu. (page no. 244)
- J Aausadhileekdamairamro*respondg*aryo. (page no. 290)

2. While talking about education, college and study

- J Uslai*lab* ma eutajuktifurekothiyo. (page no. 17)
- J Pre-board exam ma *classbharimatop three* ma pareradekhau. (page no. 43)
- J Harekkitabpadhda u katipaye*lineharupencilleunderline*gardiraichha. (page no. 73)
- J School
padhdap*principalkokothakobhittamaeutalamofl*extagiyekousledekhekith
i. (page no. 271)

3. While fallen in love and going in dating

- J Sabaibhanda ta Sarthakkoanuharc*utelagthyo*Sadalai. (page no. 8)
- J Uniharuekaichhintehisidimas*idelagerabasye*. (page no. 65)
- J Chaltiko kunai *restaurantbhandakamromantic*maholchhara ? (page no. 101)
- J Sabaibhandanaramrosang*afail*bhayeko u thiyo . (page no. 213)

4. While talking about vehicle and travelling

- J Chalak*Sumokobanotuthayerabigrekokurapattalagaunakhojirahe*kothiyo
. (page no. 1)
- J Bhailaipanialik*refreshment*milchhaki. (page no. 6)
- J Bike gharmaichhodera u *bus station*tiralagyo. (page no. 32)
- J Gadisabikbhandaalikatis*low*bhayo. (page no. 93)

) Tekarbazzarnapugdaijamraichha. (page no. 228)

5. While talking about media and mobile communication

) Dial gariyekonumber ma *phonekoringgayo*. (page no. 1)

) Sarthakkocallaayo. (page no. 130)

) Kati *messagepathai*. (page no. 216)

) Uskofacebook ma dinahusaiyeu*friend request*aunathale. (page no. 305)

) Sada kina *phone switch off*garekithiyu ? (page no. 181)

6. While talking about hotel, coffee shop and food

) Anifarkepachhichurotsalkaudaichiya*order*gare. (page no. 5)

) Tehibelatable ma *coffee*aipugyo. (page no. 23)

) Sarthak le *pizzakoeutaslice, chicken chilli*kakehitukraharu r momokakehidallaharuSadakoplate ma haldiyo. (page no. 102)

7. While talking about dress

) Anitalapattinilo*jeans* lagai. (page no. 299)

) Under wear *trousers*sarakkalagai. (page no. 147)

4.1.4 Analysis of English Codes in terms of Fundamentals units of Grammatical Structure

For the analysis of English codes in terms of fundamental units of grammatical structure, researcher categorized the mixed codes expressions into four groups

i.e. sentences, clauses, phrases and words. The detailed analysis of English codes in terms of fundamental units of grammatical structure as given below:

4.1.4.1 Analysis of English Expressions at Sentence Level

According to Wikipedia, 'A sentence is a textual unit consisting of one or more words that are grammatically linked, expressing a complete thought in non-functional linguistics.' Sentences are divided into various types from different viewpoints. Firstly, in terms of functional viewpoints, they are four types; declarative, imperative, interrogative, and exclamatory. On the other hand, through formation viewpoints sentence are divided into three types; simple, compound and complex.

For the analyses of sentence level expressions, the present study had attempted to analyze the sentences in sentence formation viewpoints.

In novel Priya Sufi there were 11 different sentences. All of them were simple sentences it means there were no any complex and compound sentences which were used as a mixed codes.

The examples of mixed English sentences in the novel Priya Sufi were as follows.

-) Sundarraespastaniloaksher ma cardma '*Admit under my care*'lekhiyekothiyo. (page no. 105)
-) Research kalagi field januchha '*Go to hell*' , bhanera phone rakhi. (page no. 140)
-) Sarthak le thoraihaserabhanyo, '*I am proud of you.*'Sada.(page no. 309)

4.1.4.2 Analysis of English Expressions at Clause Level

The researcher did not find any expressions in this novel with clause level mixing. There were no any clause used distinctly, so further analysis has not been made under this section.

4.1.4.3 Analysis of English Expression at Phrase Level

Simply, phrases can be divided into five types viz. Noun phrase, verb phrase, adjective phrase, adverbial phrase and prepositional phrase. In this novel, there were 80 different phrases which were used and from them majority were the noun phrase. There were 48 different noun phrases, which occupied 60 % of total phrases. Similarly, verb phrase contained 2.5 % of total phrases with 2 different verb phrases. Likewise, there were 30 different adjective phrases, which occupied 37.5 %. Moreover, there were no any use of adverbial phrase and prepositional phrase in novel Priya Sufi.

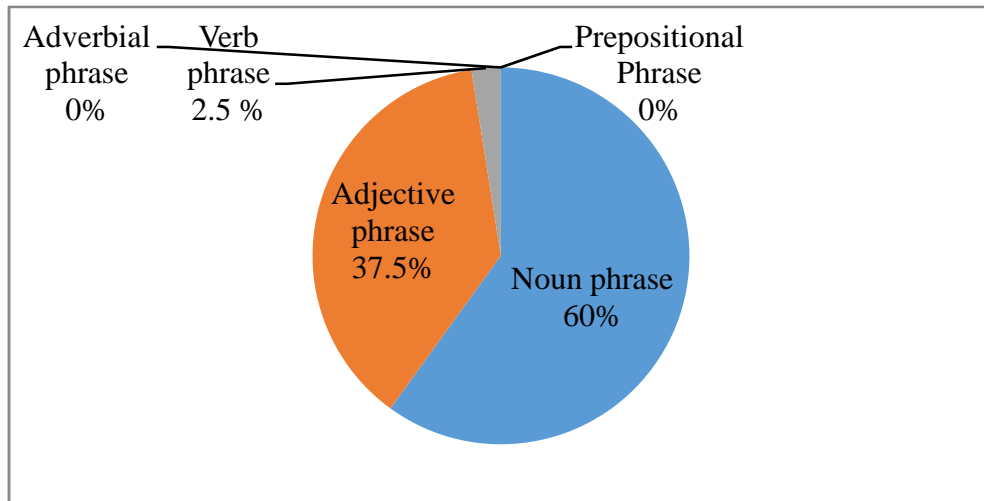

Table 3. Mixed English Phrases in the Novel Priya Sufi

S.N	Phrases type	Number	Percentage
1	Noun Phrase	48	60%
2	Verb Phrase	2	2.5%
3	Adjective Phrase	30	37.5
4	Adverbial Phrase	0	0%
5	Prepositional Phrase	0	0 %
	Total	80	100%

The examples of mixed English phrases in the novel PriyaSufi :

-) *Milaunaaajhaitop eightlau.* (page no. 44)
-) *SadagUILty feelgardaichupbasi.* (page no. 149)
-) *Sadakiasamarthatakalagiparty palace
booknagareragharbataigarinebhayekothiyo.* (page no. 174)
-) *Sabaimakehinakehiego problemhunchha.* (page no. 135)

Figure 2. Mixed English Phrase in the Novel Priya Sufi

4.1.4.4 Analysis of English Expressions at Word Level

This part mainly focused on morphemes constituents classify of words. The author of this novel used different types of words. Altogether, there were 495 different words, which were used in this novel. From them the simple words contained 36.16 % with 179 different simple words. Similarly, the complex words contained 40.60 % with 201 different complex words and 23.32 % occupied by compound words with 115 different compound words.

Table 4. Mixed English Words in the Novel Priya Sufi

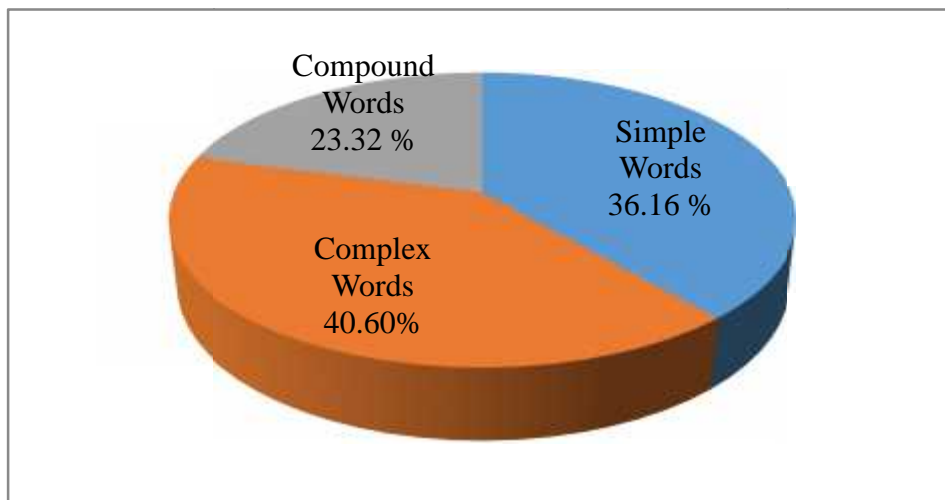

S.N	Word types	Numbers	Percentage
1	Compound words	115	23.32 %
2	Complex words	201	40.60 %
3	Simple words	179	36.16 %
	Total	495	100 %

The examples of mixed English words used in the novel Priya Sufi are as below.

-) Dial gariyekonumber ma phonekoring gayo. (page no. 1)
-) Uslehariyotrouserra pink jumper lagayekithi. (page no. 70)

-) School

Figure 3. Mixed English Words in the Novel Priya Sufi

4.1.5 Analysis of English Mixed Expressions in Terms Word Class

For the analysis of English expressions at word class level, researcher categorized the mixed words in terms of their word class. Simply, word can be classified under major and minor word class. Here, in this study researcher only studied about major word class. It means the researcher only analyzed the expressions which were under major word class used in the novel. In terms of major words class, words can be divided into four types; noun, verb, adjective and adverb. The mixed English words categorized under major classes were presented in the following table.

Table 5. Classify of Words in terms of Word Class

S.N	Word class	Number	Percentage
1	Noun	382	74.46 %
2	Verb	71	13.84%
3	Adjective	54	10.53 %
4	Adverb	6	1.17%
	Total	513	100 %

Table 5 shows that, most of the mixed expressions were at noun, which occupied 74.46% with 382 different noun expressions. Similarly, 13.84 % were occupied by verb with 71 different verb expressions which were used in the novel PS. Likewise, there were 54 different adjectives which contained 10.53 % and finally 1.17 % were contained by adverbs with 6 different adverb expressions which were used in the novel.

The examples of mixed English expressions at word class level used in the novel.

-) Yiniharukodekhbhetclassbhitrajada, niskada,
labtirawacollegekaipranganmakataihunthyo. (page no. 17)
-) Sarthaklenunderpheridialgaryo. (page no. 19)
-) Timiparikchhalu, 'Sarthaklebhanyo, 'A pluslaunekammero.' (page no. 28)
-) Sarthakajhaibargaining komood ma thiyo. (page no. 39)
-) Chadaithikbhayerachhutecosabaipadharecovergarnu. (page no. 87)
-) Dukhaikolevelrathau, dubaihisable. (page no. 143)

Figure4. Classify of Words in terms of Word Class

4.1.5.1 Analysis of Nouns Mixed in the Novel Priya Sufi

Nouns were mostly used word class in the novel Priya Sufi. According to Greenbaum and Quirk the classes of nouns are common and proper. Here, the researcher analyzed the nouns into four types; common, proper, collective and compound. The following table in the study shows the nouns, which were used in the novel Priya Sufi.

Table 6. Analysis of Nouns Mixed in the Novel Priya Sufi

S.N	Nouns	Number	Percentage
1	Proper noun	36	9.42%
2	Common noun	291	76.18 %
3	Collective noun	8	2.09%
4	Compound noun	47	12.30%
	Total	382	100 %

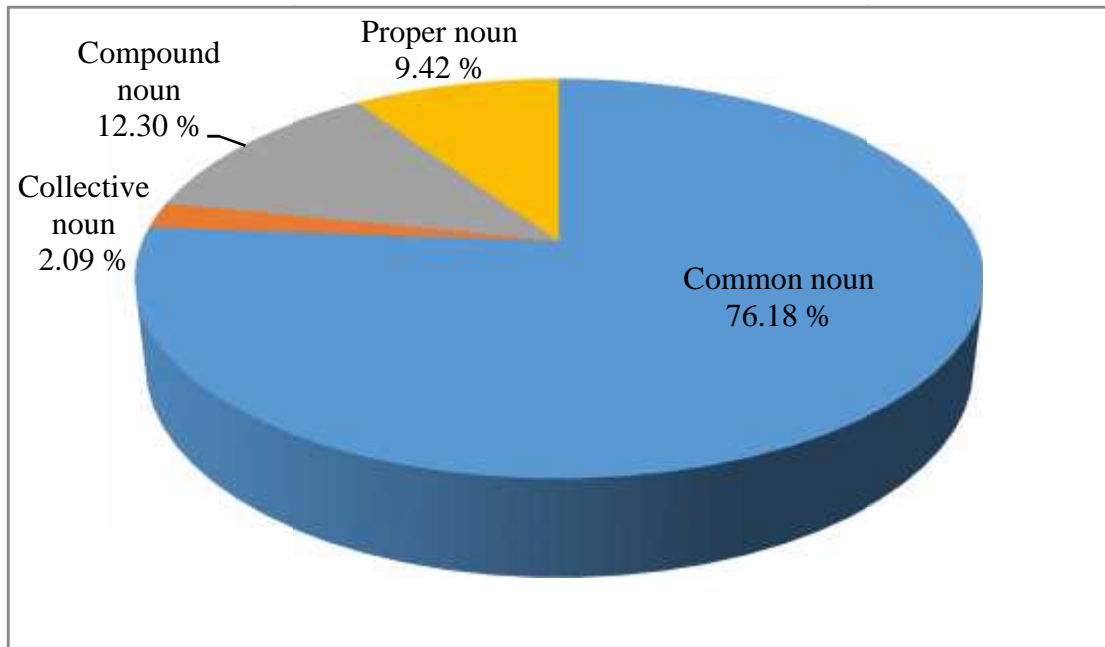

Table 6 presents that there were 382 different nouns, which were used in the novel. From them, proper noun occupied 9.42 % with 36 different proper nouns, which were used in the novel PS. Similarly, common noun contained

76.18 % with 291 different common nouns. Likewise, collective nouns occupied 2.09 % with 8 different collective nouns and finally 12.30 % occupied by compound noun with 47 different compound nouns that were used in the novel.

Here are some examples of nouns, which were used in this novel Priya Sufi.

-) Utheratoiletsammajaneprayasgardathahapai. (page no. 145)
-) Bahiraliving room ma Bhaskar,
Sakuntalaraketakaaamababakokurakanichaldaithiyo. (page no. 171)
-) Uslaitadhalagyo,
kholbhitrarahekoaspirinkonamithochakkibataajibrosammakoduri. (page no. 138)
-) Uniharueutaigroupmathiyo. (page no. 226)
-) Sufikonayafrockdadhisakekothiyo. (page no.55)

Figure 5. Analysis of Nouns Mixed in the Novel Priya Sufi

4.1.5.2 Analysis of Verbs Mixed in the Novel Priya Sufi

Simply, verb is a word which is used to describe an action, state or occurrence, and forming the main part of the predicate of a sentence. Here, in this study the researcher analyzed the verbs in terms of helping verbs, action verbs and linking verbs. In this novel, there were 71 different verbs that were used by the author. While doing analyses the researcher found that there were only used of action verbs. It means there were no any helping verbs and linking verbs, which were used in the novel. Here are some of the examples of verbs, which were used in the novel PS.

-) UsleSarhakoanuharmaherdapaninaheripuraignoregariyekosailimasodhi. (page no. 25)
-) BatocrossgareradubaiBishwojyotitarfalamkiya. (page no. 28)
-) Nimmilaipaniaafnoanubhavsharegarna man lagyo. (page no. 253)
-) Yestomahishabgardaekaidinmabiskosatrabhayekofeeluslaibhayekothiy o. (page no. 257)
-) Anifarkisakepachhichiyaordergare. (page no. 5)

4.1.5.3 Analysis of Adjective Mixed in the Novel Priya Sufi

Adjectives are words that give more information about a noun or pronoun and can go in different positions in a sentence. There were different 54 adjectives, which were used in the novel PS. In this study researcher analysed, the adjectives with different types, they are descriptive, demonstrative, distributive, quantitative and interrogative. There are six types of adjectives but here in this study the researcher only found two types of adjectives. From 54 different adjectives; 3 different adjectives A plus, one and only, and half are belongs to quantitative and others all are belongs to descriptive adjectives. Followings are some of the examples of adjectives, extracted from the novel Priya Sufi.

-) Premmachhubhanyaho, *pregnant*chhubhanyahoina. (page no. 9)
-) Malaipanicutelagchha. (page no. 10)
-) K teslaiajhaipanipsychiatrickokhachochhajastolagchha. (page no. 316)

-) Type garnusanilayunus, *handwritten* ta hamisuikaraigardainau. (page no.299)
-) Barueutaromaticupannyasleknus, chhapnasakinchha. (page no. 297)

4.1.5.4 Analysis of Adverb Mixed in the Novel Priya Sufi

Adverbs were used in few numbers in the novel Priya Sufi. Simply, adverb is a word or set of words that modifies verbs, adjectives, or other adverbs too. Here, in this study researcher tried to analyses adverbs with its five types; they are adverb of manner, adverb of time, adverb of place, adverb of degree, and adverb of frequency. There were only six adverbs that were used in the novel PS. From six adverbs four adverbs were adverb of manner and other two were adverb of place and adverb of degree and there were no any frequency adverb and adverb of time which were used. Here are some examples, which were extracted from the novel Priya Sufi.

-) Uskorogaafno firm ma thiyo, cricket ko kunai khatarnak batsman jhaijostaiballmapaniouthunaimandaina. (page no. 92)
-) ‘Bhandapanilazmarnuchha,
‘adhbaisepuruspatchhiltirataukoghumaudainonstopbhannathale, ‘
-) Yoni
tapaikothulosafaltahohonestlybhannupardasurukodinmatapaiyehaaud
ayophuchhilekelekhilolirabhaneramanmanaisochekothiya. (page no. 301)

CHAPTER FIVE

FINDINGS, CONCLUSION AND RECOMMENDATION

Based on the analysis of data and interpretation of result, the findings of the study were derived. The findings of the study led to some conclusions and recommendation based on the study. So, findings, conclusions and recommendation of the study have been presented in this part of thesis.

5.1 Findings

Some major findings of the study have been listed given below.

- i. There were 586 different mixed expressions in the novel Priya Sufi. Out of them, 84.47 % with 495 mixed expressions were the words, 13.65 % with 80 mixed expressions were phrases and the sentences occupied 1.88 % with 11 mixed expressions.
- ii. There were no uses of any expressions at the clause level in the novel PS.
- iii. The highest numbers of mixed expressions were words, consisting 84.47 % in the novel PS.
- iv. The lowest numbers of mixed expressions were sentences consisting 1.88 % in the novel Priya Sufi.
- v. From the sentence formation perspective, all the English sentences used in the novel were simple sentences. Hence, there were no any compound and complex sentence used in the novel.
- vi. There were 80 different mixed English phrases in the novel Priya Sufi. Out of them, 60 % with 48 mixed different phrase expressions were noun phrase, 37.5 % with 30 mixed different phrase expressions were adjective phrase and the 2.5 % with 2 mixed different phrases were verb phrase. Hence, there were no any use adverbial and prepositional phrase.

- vii. At the word level, most of the mixed expressions were complex words. Complex words contained 40.60% consisting 201 different complex words in the novel PS. Similarly, 36.16 % with 179 different words were simple words and 23.32% with 115 different words were compound words.
- viii. Words were studied in terms of their word class. Only major word class was observed in this study. It means nouns, adjectives, verbs and adverbs were observed in this study.
- ix. At the word class level, most of the mixed expressions were the nouns. Noun covered 74.46 % containing 382 different words out of 513. Similarly, verb occupied 13.84 % with 71 different words. Likewise, adjective occupied 10.53 % with 54 different words and finally adverb contained 1.17 % with 6 different words.
- x. While doing the analysis of noun, there were 382 different nouns used in the novel Priya Sufi. The common nouns were consisting 291 words with 76.18 %. Similarly, compound noun occupied 12.30 % with 47 different words. Likewise, proper noun contained 9.42 % with 36 different words and collective nouns holds 2.09 % with 8 different words. Hence, the common noun was found as the most used noun and the collective noun was least used noun.
- xi. During the analysis of verbs, the researcher found 71 different verbs, which were used in the novel Priya Sufi. All the 71 different verbs were only action verbs it means the study found that there were no any use of helping verbs and linking verbs.
- xii. Under the study of adjectives, the researcher found the use of quantitative and descriptive adjective only. All together, there were 54 different adjectives. From 54 different adjectives, three adjectives were quantitative and others 51 different adjectives were descriptive adjectives. Hence, there was no any use of demonstrative, distributive and interrogative adjective.

- xiii. While doing analysis of adverb, there were only 6 different adverbs which were found in the novel Priya Sufi. From them, 4 different adverbs were under adverb of manner and other two were under adverb of place and adverb of degree. Hence, there were no any use of adverb of time and adverb of place in the novel PS.
- xiv. In terms of frequency, the most frequently repeated expressions were the words. The word phone is the most frequently used word repeating 47 times in the novel. Similarly, the words like college, bike, and class were the frequently used words repeating for more than 20 times. However, 280 different English words were used only once.
- xv. In the case of phrases, phone switched off was the most frequent phrase, which was used for 4 times. However, there were 61 different phrases that had been used only once in the novel.
- xvi. In the case of sentences, there were no any sentences, which were repeated in the novel Priya Sufi. There were 11 sentences that used only once in the novel.
- xvii. There were different 14 situational contexts of mixed codes in the novel. They were; Hospital and health, (education, college and study), love and dating, vehicle and travel, media and mobile communication, (hotel, coffee shop and food), talking about dress, at home, at market, at gym house, at publication house, birthday party and marriage ceremony, remembering past event, telling story.
- xviii. Most of the situational contexts were related to the context of hospital and health and college, education and study. Similarly, the least used contexts were gym house and publication house.

5.2 Conclusion

In the novel Priya Sufi, there are many English mixed expressions, which are used with different situational contexts. Mainly, this study is based on situational context, frequency wise analysis of mixed expressions, English

mixed codes in terms of fundamental units of grammatical structure and word class. Similarly, this study mainly consists of five different chapters with different headings and subheadings. I went through numbers of the related literature including previous thesis's carried out in the department of English Education, TU and other books and articles related to code mixing. This has assisted in my study to construct an effective empirical and theoretical background, which is very essential in research writing process.

Code mixing in Nepali novel is common in the recent context. Mainly, English codes are used in the Nepali novel in order to provide the different flavour of the novel. Moreover, English language is one of the dominant languages in the world affair and the entry of English codes in Nepali novels is the result of domination and massive spread of English language all over the world. Due to the different social media and ICTs, new generations have better exposure to the English language. So, writer may use English language targeting to the new youngsters. If writer writes any piece of literary artifacts using Nepali language only, reader may not enjoy in reading. Therefore, writer may use English codes in number of places taking the interest of the readers into considerations.

During observation, I found that the author inserted English expressions in Nepali novel because of equivalent term and sometimes to show the status of their education and also their social background. Similarly, literary writers used English mixed codes in literary genres because of the need of certain terminology or expressions. Moreover, by the using of mixed codes it can make the message clearer or it also help to make writing unique and attractive. Finally, the trend of code mixing is necessary due to drastic development in science and technology, lingua franca, policies of bilingualism and multilingualism, globalization and so on. At last, it can be said that the writers used English expressions in Nepali novel to express the attitude, the message, the situations and the emotions to make story more expressive and original.

5.3 Recommendations

On the basis of findings and conclusion of the study both policy related and practice related recommendations have been made here.

5.3.1 Policy Related

The policy level implications and recommendations have been listed below based on the study.

1. The findings of this study display that code mixing has general trend in all forms of literature. So the course designer, curriculum developers are suggested to internalize the results and findings of the study.
2. The policy maker should help to bring up the voice of importance of English language and English code mixing and its effectuation at existing context.
3. The syllabus designer and textbook writers should be witted while scheming English mixed texts and writings in various languages.
4. Government and stakeholders should make effective policies for a separate department for language studies.
5. The government should provide trainings to literary writers to lead them towards professionalism.
6. The Nepali literary writers who provide new flavour to the audience by mixing English codes need to be encouraged and rewarded by the governments.

5.3.2 Practice Related

This is the actual level of implementation of the policies to practice. From the findings of the study, following pedagogical implications can be drawn.

- 1) This study is very facilitatory for new growing language teachers, learners, literary writers and literary readers to know about code mixing and related terms with it.
- 2) Findings of the study show that progression of science and technology influence over other languages. Therefore, the language teachers should be aware to use different language terms in appropriate way in the language classroom.
- 3) The result of this research may helpful for the teachers/students to know that English can also be learned by novel.
- 4) By reading this study, the students/teachers can develop the English language easily to face the modern life style.
- 5) The findings of the study help the teachers and the students to learn the contextual use of language in different level of language and apply it in their day-to-day communication.

5.3.3 Further Research Related

Keeping the delimitations of the study in considerations some more topics, areas and issues for further research have been suggested as follows:

- 1) The result of the research can be used as a reference in studying linguistics, especially about code mixing which is employed by the author of the novel.
- 2) The researcher limited his research to the word class, fundamental units of grammatical structure, situational contexts and frequency wise analysis. So, the prospect researchers can conduct research in the functions, reasons, purposes of code mixing and so on.
- 3) This study is helpful for those who want to conduct the research regarding with code switching in the Nepali novel.
