RECOMMENDATION LETTER

This thesis entitled **Impact of Deficit Budget on Economic Growth in Nepal: An ARDL Approach to Bound Test** has been completed by **Mr Tilak Kshetri** under my guidance and supervision. Therefore, I recommend this thesis for examination by the thesis committee as partial fulfilment of the requirements for **the Degree of Master of Arts in Economics**.

APPROVAL SHEET

We clarify that this thesis entitled **Impact of Deficit Budget on Economic Growth in Nepal: An ARDL Approach to Bound Test** submitted by **Mr Tilak Kshetri** to the Central Department of Economics, Faculty of Humanities and Social Sciences, Tribhuvan University, in partial fulfilment of the requirements for the Degree of **Master of Arts in Economics** has been found satisfactory in scope and quality. Therefore, we accept this thesis as a part of the degree.

DECLARATION

The thesis entitled **Impact of Deficit Budget on Economic Growth: An ARDL Approach to Bound Test** is conducted under the supervision of Shiva Raj Adhikari, PhD. Professor of Economics at Central Department of Economics, Tribhuvan University.

I declare that the information reported in this thesis is the result of my own work, except where due to reference is made. The thesis has not been accepted for any degree and is not concurrently submitted to any candidature for any other degree.

ACKNOWLEDGEMENT

First of all, I would like to express my deep sense of gratitude to Professor Shiva Raj Adhikari, PhD. I am heavily indebted for his skilful, genuine, scholarly and affectionate guidance at every stage of this research work. He has been a true person and a constant source of inspiration and encouragement. I feel proud of being his student.

In particular, I would like to thank Prof. R. K. Shah, PhD. for useful direction, inspiration and scholarly views in my research work. Similarly, I would like to thank Prof. Sohan Kumar Karna, PhD. the Head of the Central Department of Economics, and other respected Professors, lecturers and staffs of the CEDECON for their respective assistance.

I would like to express my deep gratefulness to the family members who have been always motivating, inspiring and facilitating me to do well. Finally, I also want to express my gratefulness to all those scholars whose published and unpublished materials have been used while conducting this task.

Tilak Kshetri

ABSTRACT

The thesis entitled **Impact of Budget Deficit on Economic Growth: An ARDL Approach to Bound Test** has based on descriptive and analytical research design with the main objective of to find the relationship between deficit budget and economic growth in Nepal. All the required information are collected from the secondary sources, particularly from the Ministry of Finance, GoN, and World Bank.

The researcher has employed the Gross domestic product as a dependent variable and the budget deficit as an independent variable whereas, current expenditure and gross private capital formation has been applied as a supportive variable. The researcher has found that the nominal and real gross domestic product, government recurrent and capital expenditure, budget deficit and gross private capital formation has an upward trend during the study period.

To find the empirical relationship between economic growth and deficit budget, the researcher has applied the ADF test to find the nature (stationary and non-stationary) of data and found the series has non-stationary. The researcher has employed the ARDL approach to bound test to identified the short-run and long-run relationship between underlying variables. The empirical analysis shows, there is a significant positive relationship between gross domestic product and government deficit budget in both the short-run and long-run. And there is also a significant positive relationship between gross domestic product and supportive variable in both the short-run and long-run except for gross private capital formation. Although, there is a significant positive relationship between gross domestic product and gross private capital formation in the long-run.
