ACKNOWLEDGEMENT

The presented study A Study on Investment Pattern of Joint Venture Banks of Nepal is prepared for the partial fulfillment for the requirements of Masters Degree in Business Studies (MBS). Fund mobilization means to flow the funds in different sectors for profit motive. Investment in its broadest sense means, the subsequent use of the financial resources in expectation of profits. Joint venture banks have to mobilize the available funds on the appropriate manner in order to achieve the targeted objectives. In this study, three joint venture banks are selected as sample by considering their homogeneous nature in terms of market coverage, popularity and market performance. The comparative position of investment and fund mobilization pattern is evaluated by the use of various statistical and financial tools.

I am extremely grateful to my respected thesis supervisor Ass. Prof. **Ruchila Pandey** of Shanker Dev Campus for the proper guideline and excellent supervision of this research work. Words of gratitude are not sufficient for his kind co-operation and valuable suggestions. At last, but not least, I would like to express my sincere thanks to all my friends, staffs of Shanker Dev Campus library, staffs of central library, staffs of banks and all the respondents for helping me from different aspects to complete the study on time.

Thank you

Upendra Joshi
