## **ACKNOWLEDGEMENTS**

First and foremost, I offer my sincerest gratitude to my supervisor, Dr. Yogesh Ranjit, Associate Professor who was abundantly helpful and offered invaluable assistance, support and guidance whilst allowing me the room to work in my own way. I attribute the level of my Master's degree to his encouragement and effort and without him this thesis, too, would not have been completed or written. Apart from the thesis work, his practical sense of approach in teaching helped me better understand some key aspects of economics.

I also express my deep gratitude to Prof Dr. Ram Prasad Gyanwaly, Head of Department, Tribhuvan University for his intensive suggestions and support. I would like to express my hearty thanks to the respected teachers and staffs of Economics Department for their co-operation and suggestions.

I am very thankful my brothers Sudarshan, Santosh, Anil and sister Sanju and Niru for their help.

Finally, I wish to express my love and gratitude to my beloved family members for supporting and encouraging me to pursue this degree, for their endless love, throughout the duration of my studies at University and for providing a home in which to complete my writing up.

**Kamal Ghimire**
