LETTER OF RECOMMENDATION

This thesis entitled **Determinants of Government Expenditure and Its Relation with National Income in Nepal** has been prepared by Mr. Deepak Raj Awasthi under my supervision. I hereby recommend this thesis for examination by the Thesis Committee as a partial fulfilment of the requirements for the Degree of Master of Arts in Economics.

.....
Prof. Dr. R.K. Shah
(Thesis Supervisor)

Date: 2074/11/08 B.S.

APPROVAL LETTER

We member of thesis committee, evaluated the thesis entitled **Determinants of Government Expenditure and Its Relation with National Income in Nepal** prepared by Deepak Raj Awasthi to the Central Department of Economics, Faculty of Humanities and Social Sciences in partial fulfilment of the requirements of the Degree of master of Arts in Economics have found satisfactory in scope and quality. Therefore, we accept this thesis as a part of the Degree.

Thesis Committee

.....
Prof. Dr. Kushum Shakya
(Head of the Department)

.....
Prof. Dr. Om Sharma
(External Supervisor)

.....
Prof. Dr. R.K. Shah

ACKNOWLEDGEMENTS

This thesis entitled **Determinants of Government Expenditure and Its Relation with National Income in Nepal** has been prepared for partial fulfilment of the requirements for the Degree of Master of Arts in Economics. I am deeply indebted to Prof. Dr. R.K. Shah, my thesis supervisor, for his constant encouragement, creative comments and suggestions to bring this thesis in this form. Similarly, I would like to thank Prof. Dr. Kusum Shakya, Head of the Department, for her co-operation and suggestion. Similarly, I would like to thank Prof. Dr. Om Sharma, external supervisor, for his constructive suggestions.

I would like to express my cordial gratitude to all my teachers from Central Department of Economics for their teachings, suggestions, guidance and care to me during my whole period of master's study.

Similarly, I would like to express my sincere thanks to Tribhuvan University Central Library for available me the required study materials. And, I would like to express my sincere thanks to all my family members, friends and relatives for their help during my study period.

Deepak Raj Awasthi

ABSTRACT

This thesis empirically examines the determinants of government expenditure growth and its causal relationship with national income in Nepal. The study employs a Least Square Multiple Regression Model to analysis the determinants of government expenditure growth in Nepal. Subsequently pair wise Granger Causality test has been used to test the causality between government expenditure growth and GDP growth in Nepal, and finally government expenditure elasticity with respect to GDP in Nepal. The analysis has been done by using time-series secondary data from FY 1974/75 to 2016/17.

The research study used chooses the explanatory variables by considering three broad areas. They are economic, demographic and political. Under economic areas the four variables have been used. They are real GDP, real tax receipt, inflation and real foreign assistance. And population growth and political instability have been used as a demographic and political variables respectively.

The result of multiple regression shows that real foreign assistance growth and inflation has significantly impact or determine the total government expenditure growth in Nepal. All remaining variables do not have any significance impact on government expenditure in Nepal. Again, the result of causality test shows that there has unilateral causality between government expenditure growth and GDP growth. It means that the government expenditure growth does causes GDP growth but GDP growth does not cause government expenditure growth in Nepal. Finally, the result of government expenditure elasticity with respect to GDP in Nepal is less then unitary. It indicates that the GDP is less responsive to change in government expenditure in Nepal.
