ACKNOWLEDGEMENTS

This research work could never have been completed without the invaluable co_operation and assistance of many individuals and organizations.

First and foremost, I wish to express my sincere and deep sense of gratitude to Head of Research Committee, Balkumari College, Teacher Baburam Panthi, for his valuable suggestions, encouragement and guidance while supervising my research work. He has provided me much of his precious time in the completion of this work. His wise counsel and guidance provided me the inspiration to go ahead with the work.

I am also grateful to all the lecturers, teacher as well as assistant administrator and other staff of Balkumari College, Chitwan, whose suggestions made me able to finalize this thesis.

I gratefully acknowledge the active cooperation receivable in data analysis SPSS program from Rambabu Addikhari, data analyst, and Chitwan Communication Center Narayangarh for computer printing of this thesis correctly and neatly in time.

I must express debt of gratitude to my family members and my friends for this continuous support in my efforts.

I hope this small effort of mine will be great value to those who are involved in capital structure and cost of capital decisions and other future research of this area.

Finally, I wish to record my sincere thanks to all, known and unknown individuals and organizations who helped in my small efforts directly and indirectly.
