## **ACKNOWLEDGEMENTS**

First of all, I would like to express my sincere gratitude to my thesis supervisor Mrs. Madhu Neupane, the lecturer of the Department of English Language Education, University Campus, Kirtipur for her continuous guidance, enlightening ideas and invaluable suggestions. Without her help, cooperation and regular feedback, I wouldn't have been able to present this thesis in this form.

I would like to acknowledge Prof. Dr. Shanti Basnyat, Department of English Education and Chairperson of English and other foreign languages education subject committee for her invaluable suggestions during my research work.

I am also grateful to Prof. Dr. Jai Raj Awasthi for visualizing the topic of the study in my mind clearly.

I am equally grateful to Dr. Chandreshwor Mishra, the chairperson of Research Guidance Committee, Prof. Dr. Shishir Kumar Sthapit, Prof. Dr. Tirtha Raj Khaniya, Dr. Anjana Bhattarai, Dr. Bal Mukunda Bhandari, Mr. Prem Bahadur Phyak, Mrs. Saraswoti Dawadi, Mr. Bal Krishna Sharma and all my respected Gurus of the Department of English Education for their suggestions and encouragement to carry out this research work.

I am thankful to the principal, Durga Lal Shrestha, of Thankot Secondary School, Thankot, Kathmandu for providing me with students for experimental classes. The students of Grade VII in Thankot School are not beyond my thankful heart for their cooperation with me.

Finally, I would like to express my thanks to my brother, Tulasi Khadka and all my friends who helped me directly or indirectly in the course of the study. My thanks also go to K.M. Computer and Communication Services, Kirtipur for computer typing.

## **ABSTRACT**

This thesis entitled "Teaching Language Functions Through Information Gap in Grade Seven" aims at finding out the effectiveness of information gap technique in teaching communicative functions.

To carry out the research, thirty students of grade VII of a private school from Kathmandu district were taken as a sample population. Only ten functions of English language were taken for this research. A pre-test was taken to test the students' proficiency in communicative functions before applying the technique in teaching language functions. Then, the students were divided into two groups through simple random sampling procedure using fish bowl draw. The group 'A' i.e. experimental group, was taught language functions using information gap technique whereas the group 'B' (controlled group) was taught using usual classroom techniques although the teaching topics, medium, methods and somehow the materials were the same. The experimental teaching lasted about 20 days. Thirteen lesson plans were made and necessary teaching materials were developed during the teaching period. After that, post test was taken and the results of both tests were compared to determine the effectiveness of information gap technique in teaching language functions.

The information gap technique seemed to be a better technique in teaching language functions. The students who hesitated, felt very shy and could not speak a single word in the classroom in previous days showed great enthusiasm in speaking. At least, they could ask others for information and could reply anything (whether it was right or wrong) if they were asked.

The technique always created curiosity among the students. It remained inevitable in teaching language functions. And it will be partial if we don't use information gap during teaching language functions.
