## ACKNOWLEDGEMENT

This dissertation has been completed with great deal of support and guidance from many people and organizations. It was impossible to complete this without their valuable inputs. Now I am taking this opportunity to express my sincere acknowledgement for the input.

First of all I would like to express my gratitude to my supervisor Mr. Sanjiv Kumar Yadav, The Lecturer Head, Assist lecturer Manoj Chaudhary and Birendra Karki, Health and Physical Education Department, Janata Multiple Campus Itahari, Sunsari for his support advice, encouragement and friendly behavior through out the course of the study. As writing progressed, he was unstinting in this encouragement and careful perusals of each chapter. Without his competent guidance and inspiration he present dissertation could not be completed. I am highly obliged to all my respectable lecturer of Janata Multiple campus Itahari, Sunsari for their consistent inspiration during the study. I wish to express my sincere thanks to all the respondents of Inarawa municipality of ward no. 6 for providing me their valuable personal information. I am also deeply indebted to me entire friends Mahes Poudel, Gobinda Chaudhary, Jamuna Katwal, Sandip Rai for helping me in collecting data and translating. The manuscript has been carefully typed Mr. Dee narayan Chaudhary to who my thanks are also due. Lastly, my deep sense of respect goes to my father Gokul Bd. Niroula and mother Sabitra Niroula and husband Rajendra Ghimere and all of my family members for their regular encouragement and help in every step of my study up to this level. Finally, I am ever grateful to all those other seen and unseen hand, who helped me to carry to this study successfully. April, 2018

## ABSTRACT

This thesis entitled " A domestic violence against women and its impact on health in Chamar community" is under the syllabus of M.Ed 2<sup>nd</sup> year. T.U. Education faculty. It was prepared for the fulfillment of our curriculum 598 marks. This study find out that, the domestic violence upon the women, physical, mental and sexual problem upon them from violence. Then, It was the purpose to find out the women's problem by the descriptive pattern. The women who were selected the sunsari district, Inaruwa Municipality and ward no. -6, who were 145 women for the purposive sampling. For the analysis of this statistic, I did tabulation, Pie-Chart and bar-chart

Because of the domestic violence most of the people has lost their physical, mental, all round development. In this way they spent their life in troublesome. At that time, they need proper care, useful skill in life. In this study, the women who are under violence they are not respected. In place of respect, they are suffering from pain in their life. This study tries to show that, the women who are under violence, their condition, problem, result, cause of violence etc . There are 61.38 percent women are under violence in which place I studied. Most of the voilences are beating, dominant, discrimination, traditional social evil and Alcoholism etc They are balmed by their family in different things. Like, eating, visiting , talkative , witch, thieffer etc . They are feeling economic crisis who are unemployed for their Children's care and education. Because of the domestic violence 84.82 percent women are going to become the vitim of different disease. Among them, they have 36.14 percent UTI. They are becoming feeling weakness day by day. Like mental problem, tension, eye problem. Among all violent women 63.45 percent women falls under family violence and 74.48% women had increased their negative thinking. The women who are dominated they feel hopeless because they are illiterate, unemployed, poverty and suffering family violence etc.

Due to the family violence 73.01 percent children are suffering different problems. Like, physical , mental, educational etc. They used to go government hospital when they became sick due to the lack of money. There are 40.69 percent women are found in

hospital. Because of the violence the women's daily life is becoming too problematic.

By the change of time, along with the modern time, people want to live in single family. In comparisons of single family, the women who live in big family, they feel problem with their family members. they are dominated by their family in different things. Because of these family violence, the women lost their hope, mental balance, they feel terror, they broke down the parts of the body, they leave their house they did murder etc. These above mention are the fact event which are happening in our society as well as whole country.
