ACKNOWLEDGEMENT

This study strives to identify the financial signals emitted to the capital market by debt-financing (debenture issues) and equity-financing (rights issues) in the Nepalese context.

I extend my profound gratitude to Prof. Dr. K.D. Manandar and Kiran Thapa of Shanker Dev Campus for their instructions, advice and guidance to complete this study. I am deeply indebted to all the authors whose writings have enriched my study by availing me with the necessary materials and invaluable ingredients.

I am thankful to the staff of the library of Shanker Dev Campus for their helpfulness and patience in browsing and providing me with the available books I asked them for. Similarly, I thank the staff of Social Science Baha and Nepal-India Library for their assistance in course of the material collection. I owe earnest appreciation of the officials of SEBON, Nepse, and all the selected sample companies for providing me with required information and including journals and annual reports.

I express my sincere thanks to my colleagues Buddha Dahal, Tulasi Dahal, Ambika, Padham, Hem, and CM for extending to me their helping hands in course of the preparation of the thesis. I am especially thankful to Papu for his continual encouragement to complete the study in time. Similarly, all my family members deserve my heartfelt gratitude for their patience and support during the course of the study.

Having put sincere efforts to minimize errors, I owe any remaining inaccuracies in the calculation and description in this dissertation as I hope the subsequent researchers would rectify them in the future.
