ACKNOWLEDGEMENT

Commercial Banks are the principal agent of Money Market and they are considered to be the major instrument of the financial system as well. They take about 81% of the deposits held by entire depository institutions and lend about 71% of the total Loans and Advances. Thus, commercial Banks and their deposit mobilization transactions obviously affect the national economic system. Moreover, Lending and Borrowing transactions that take place through the commercial Banks influence the daily livings of people of each sector in the nation. In this way the relationship among Lenders (Depositors), Commercial Banks, and the Borrowers might be considered to be an enthusiastic subject to study.

On behalf of the report, I want to extend my gratitude to all who helped me in the preparation of this research report. Special thanks to respective head of the research department and thesis supervisor **Mr. Dinesh Man Malego** for his final and valuable suggestion to prepare this thesis.

Last but not least, I am indebted to all the authors whose Books, Journals and Thesis have been consulted during the preparation of this Thesis and all the staffs of related commercial banks and all of my friends for their valuable suggestions, guidance and providing me the necessary data and information regarding this research. I would like to express heart-full thanks to my friend Mr. Basanta Singh for providing the most valuable suggestion and some information for the presentation of this research report.

I look forward to receiving any comments and suggestions on the Thesis from all the interested readers for further improvement.
