**CERTIFICATE**

*This is to certify that Mr. Jhakbahadur Pradhan, a student of the academic session 2061/2063 with Campus Roll No. 13/2061, Exam Roll No. 480149 and T.U. Registration No. 16421-89 has completed his dissertation under my supervision during the period prescribed by rules and regulations of T.U., Nepal. This dissertation entitled "A COMPARATIVE STUDY ON COMPULSORY MATHEMATICS ACHIEVEMENT OF PRIVATE AND PUBLIC SECONDARY SCHOOL STUDENTS IN SCHOOL LEAVING CERTIFICATE EXAMINATION IN POKHARA SUB-METROPOLIS" has been prepared on the basis of the result of his investigation conducted during the period of 2065-2067 under the Department of Mathematics, Prithvi Narayan Campus, Pokhara. I recommend and forward that his dissertation be submitted for the evaluation as the partial requirement to award the degree of Master of Education.*

Pokhara

Date: 2011 April

## **DEDICATION**

*This dissertation is heartily dedicated*

*to*

*the everlasting memory of my dearest son*

*Gagan Pradhan*

## **ACKNOWLEDGMENT**

First of all, I would like to express profound gratitude to Mr. Bibhab Neupane, the Assistant Lecturer of Mathematics, Prithvi Narayan Campus Pokhara, who as my teacher as well as research guide, provided me with all sorts of ideas, techniques and materials essential for carrying out this research work from the very beginning to the end and enabled me to present this dissertation in this form.

My heartily gratitude also goes to Mr. Loknath Adhikari, the Head of the Department of Mathematics, Prithvi Narayan Campus Pokhara, for his invaluable suggestions that led me to carry out this research work successfully.

I am very grateful to Mr. Khem Sharma, District Education Officer and all the staffs of District Education office Kaski for their kind co-operation in the acquisition of achievement scores required for this study. I am highly indebted to my partner Miss Chameli Pradhan who inspired me a lot in this study.

Finally, my obligation to all the friends who assisted me directly or indirectly in completing this study and I would like to express thanks to Mr. Bishwa Sigdel of Image Computer Center for printing and binding in appropriate form of this study that has been computerized by me.

Researcher  
Jhakbahadur Pradhan

## ABSTRACT

Mathematics has been an important place in the curricula of all levels of Nepalese school education as well as plays a vital role in individuals' daily life. Two types of schools, i.e. private and public schools are providing school education with same curricula and qualified teacher but different backgrounds and facilities in Nepal. In comparison with public schools, the private schools have been successful in high scores in SLC examination and effective teaching in the schools.

This study attempts on "A comparative study on compulsory mathematics achievement of private and public secondary school students in school leaving certificate examination in Pokhara sub-metropolis".

This study has been organized into five chapters. First chapter deals with the Background of the study, Statement of problem, Objectives of the study, Significance of the study, Statements of hypothesis, Limitations of the study and Definitions of the terms. Second chapter gives information about different related literatures. Third chapter contains about with Population of the study, Sample of the study, Instrument of the study, Data collection procedure and Data analysis procedure. Fourth chapter presents the Analysis and Interpretation of the data. Fifth chapter discuss the Summary of the study, Findings of the study, Conclusions of the study and Recommendations. At the end, Bibliography and Appendices are incorporated.

This study is conducted on the basis of following objectives:

1. To compare the mathematics achievement of private school students and public school students.
2. To compare the mathematics achievement of students with respect to gender wise in schools.
3. To find out the causes of difference on the mathematics achievement of the students.

This study is limited in Pokhara sub-metropolis. For this study, 7 private secondary schools and 5 public secondary schools are randomly selected. 10 students with 5 boys and 5 girls from each sample schools are chosen by lottery method. The secondary data are obtained by compulsory mathematics scores of selected secondary schools students taken from SLC Mark ledger from the District Education Office Kaski. The primary data are obtained from the responses of mathematics teachers by filling the questionnaire by themselves.

The collected data are tabulated and analyzed with the help of mean, standard deviation and z-value to test the significance difference in compulsory mathematics achievement of students in private secondary schools and public secondary schools. The difference in mean scores is tested at 0.05 level of significance.

On the basis of the findings of the study, the following conclusions have been drawn:

1. The mean score of private school students is greater than the mean score of public school students.
2. The mean scores of students in private schools are greater than the mean scores of students with respect to gender wise.
3. The mean scores of boys and girls in public school are same.
4. The mean scores of boys and girls in private school are same.
5. The surroundings of classroom of private schools are quite but not quite in public schools.
6. The mathematics class of private schools are not crowded but crowded in public schools.
7. The students who failed in mathematics are not upgraded in private schools but upgraded in public schools.
8. The private schools have strict management but the public schools do not have strict management.

Recommendations have been made for the improvement of the education of children who could not afford the fees of private schools to have access to quality education. The study was limited to regional level SLC examination result of academic year 2066 in compulsory mathematics in Pokhara sub-metropolis, similar studies can be conducted to obtain broader and valid generalization for the district and nation.

ACKNOWLEDGEMENT	I
ABSTRACT	II
CHAPTER I : INTRODUCTION	1-9
1.1    Background of the study	1
1.2    Statement of Problem	6
1.3    Objectives of the study	6
1.4    Significance of the study	6
1.5    Statement of Hypothesis	7
1.6    Limitation of the study	8
1.7    Definition of terms	9
CHAPTER II : REVIEW OF RELATED LITERATURE	10-14
CHAPTER III : METHODOLOGY	15-17
3.1    Population of the study	15
3.2    Sample of the study	15
3.3    Instruments of the study	16
3.4    Data collection procedure	16
3.5    Data analysis procedure	17

CHAPTER IV : ANALYSIS AND INTERPRETATION	18-31
4.1 Comparison of compulsory mathematics achievement of private secondary school students and public secondary school students	19
4.2 Comparison of compulsory mathematics achievement of boys in private secondary schools and girls in public secondary schools.	20
4.3 Comparison of compulsory mathematics achievement of girls in private secondary schools and boys in public secondary schools.	21
4.4 Comparison of compulsory mathematics achievement of boys in private secondary schools and boys in public secondary schools.	22
4.5 Comparison of compulsory mathematics achievement of girls in private secondary schools and girls in public secondary schools.	23
4.6 Comparison of compulsory mathematics achievement of boys and girls in private secondary schools	24
4.7 Comparison of compulsory mathematics achievement of boys and girls in public secondary schools	25
4.8 Responses of secondary school mathematics teachers	26
4.9 Analysis of responses of the secondary school mathematics teachers	30
CHAPTER V: SUMMARY, FINDING, CONCLUSION AND RECOMMENDATION	32-34
5.1 Summary of the study	32
5.2 Findings of the study	33
5.3 Conclusions of the study	34
5.4 Recommendations for the further study	34
BIBLIOGRAPHY	336
APPENDICES	37-44
Appendix I Name and address of secondary school in Pokhara sub-metropolis	37
Appendix II Sample secondary schools and mathematics scores of sample students	40
Appendix III Calculation of z-value	41
Appendix IV Responses of secondary school mathematics teachers	43

## LIST OF TABLE

Table	4.1	The mean scores of private school students and public school students	19
Table	4.2	The mean scores of boys in private schools and girls in public schools	20
Table	4.3	The mean scores of girls in private schools and boys in public schools	21
Table	4.4	The mean scores of boys in private schools and boys in public schools	22
Table	4.5	The mean scores of girls in private schools and girls in public schools	23
Table	4.6	The mean scores of boys and girls in private schools	24
Table	4.7	The mean scores of boys and girls in public schools	25
Table	4.8.1	Responses of private school mathematics teachers on physical facilities	26
Table	4.8.2	Responses of public school mathematics teachers on physical facilities	27
Table	4.8.3	Responses of private school mathematics teachers on Mathematics teaching learning process	28
Table	4.8.4	Responses of public school mathematics teachers on Mathematics teaching learning process	29
Table	I.1	Name and address of private secondary schools in Pokhara sub-metropolis	37
Table	I.2	Name and address of public secondary schools in Pokhara sub-metropolis	39
Table	II. 1	Sample private schools and compulsory mathematics scores of sample student	40
Table	II.2	Sample public schools and compulsory mathematics scores of sample student	40
