## **ACKNOWLEDGEMENT**

At present time, Information is one of the most important resource with which companies could operate smoothly. Disclosed information has an important role for running business successfully. On the basis of information released by the listed companies, shareholders, and investors are able to make rational decisions on whether to invest or not. It is the right of shareholders to be informed thoroughly about the regular transactions of the company. On the other hand it is the major responsibility of those listed companies to inform the shareholders on their current situation. Regular flow of information helps to win the trust of investors and in turn it helps to increase the goodwill of the company.

This study is the result of cooperation and support of many people. First of all I would like to extend my sincere gratitude to my thesis supervisors Prof. Kamal Das Manandhar and Manoj Bhattarai of Shanker Dev Campus for their effective guidance, valuable suggestions, critical comments and continuous cooperation. An also to all the respondents who gave valuable information about the share market and NEPSE.

I am also gratefully indebted to all the staffs of a SEBON, NEPSE, Shanker Dev Library, and Central Library, my family members, friends Mr. Rajan K.C., Mr. Arjun Dhungan, Mr. Prakash Dhakal, Miss Sharmila Parajuli and Miss Pabitra Kafle who helped me.

Finally, I hope this could be useful for further researcher, policy makers, investors, students and the companies who are directly and indirectly related to information disclosure practice. I am also sole responsible for any errors present in this study and extend warm welcome to any comments and suggestions.
