## **ACKNOWLEDGEMENTS**

This thesis entitled "**study on knowledge, belief and practices of family planning among the visitor of Patan Hospital**" has been written as a prerequisite for M.A. sociology. This study is based on facts collected for visitor of Patan Hospital, Lalitpur. It would have been impossible without the support of various people who have helped me in one way or the other complete this study.

My sincere thanks go to Mr. Chintamani Pokharel who is the lecture of this campus and my best supervisor for showing me the path to write this dissertation from the beginning to an end and for giving me his valuable time. I would like to express my profound gratitude to my respect parents, brothers and friends who had always encouraged me to complete this study.

My special thanks go to my dear friend Mr. Gokul Shrestha who inspired me and helped me in multiple ways to complete this thesis.

I am grateful to my dear brothers and sister Mr. Sasi Chandra and Mrs Shanti pandit for guiding me and supporting me to finish this study. I am also grateful to the staffs of Patan Hospital for allowing me to conduct the study.

And the Last but not the least, my special thanks deserves to those without whom my dissertation will not have been completed.

Susma Shrestha

**LIST OF TABLE**

**LIST OF ABBREVTIONS**

	<b>Chapter I</b>	<b>Page No</b>
<b>1. INTRODUCTION</b>		<b>1-6</b>
1.1 back ground of the study		
1.2 Statement of the problem		
1.3 Objectives of the study		
1.4 Important rationale		
1.5 Organization of the study		
	<b>Chapter II</b>	
<b>2. REVIEW OF LITERATURE</b>		<b>7-17</b>
2.1 Overview of relevant literature		
2.2 Theoretical review		
	<b>Chapter III</b>	
<b>3. Research Methodology</b>		<b>18-19</b>
3.1 Research design		
3.2 Studys area		
3.3 The universe of the study and sample size		
3.4 Nature of data		
3.5 Data collection technique		
3.6 Limitations of study		

## **Chapter IV**

#### **4 STUDY AREA AND SOCIO-ECONOMIC CHARACTERISTICS OF RESPONDENTS**

Background **20-27**

4.1 Study area: An Overview

4.2 Socio-economic characteristics

4.3.1 Caste/Ethnicity

4.3.2 Education

4.3.3 No. of children

4.3.4 Residence

4.3.5 Age

4.3.6 Occupation

4.3.7 Economic condition

Family Planning Method

#### **Chapter V**

#### **5. PREFERENCE AWARENESS AND DECISION MAKING 28-48**

5.1 Women's Awareness Level on Family Planning Method

5.1.1 Age of Marriage

5.1.2 No. Of Children

5.1.3 Contraceptive means

5.1.4 Knowledge about family planning

5.1.5 Sources of Inspiration

5.1.6 Awareness regarding various family planning devices

5.1.7 Importance of family planning method

5.1.8 Sources of learning family planning methods

5.1.9 Problem faced by the respondents

5.2 Most preferred family planning methods

5.2.1 Distribution based on use non-use of family planning methods

- 5.2.2 Methods used by respondents
- 5.2.3 Interval between pregnancies
- 5.2.4 Application of family planning devices in future
- 5.2.5 Methods of preference in future
- 5.3 Decision making level in family planning
  - 5.3.1 Getting help from family planning member in household activities
  - 5.3.2 Source of getting help in house hold activities
  - 5.3.3 Decision making regarding bearing of child
  - 5.3.4 Responsibility of caring and rearing of the child
  - 5.3.5 Decision making for family planning methods
  - 5.3.6 Respondents child of preference
  - 5.3.7 Husband's child of preference
  - 5.3.8 in- laws child of preference
  - 5.3.9 Number of children husband wants
  - 5.3.10 thought of husband regarding interval between two children
