Acknowledgements

I have received very useful inputs from different sources while working on this research. I would like to extend my humble gratitude to those individuals who made invaluable contribution in the process of bringing out this dissertation in the present form.

I would like to express my cordial respect and extreme gratitude to Suma Sedhai, Central Department of Population Studies (CDPS), Tribhuvan University, as I owe much for her most competent guidance, encouragement and perennial support during the tedious process of providing concrete shape to my research work. I am extremely grateful to Prof. Dr. Prem Singh Bisht, Head of CDPS, Tribhuvan University, for granting me the opportunity to carry out dissertation under the title **“Knowledge and Attitude on STIs and HIV/AIDS: A Case Study of Primary School Teachers in Tamsariya VDC, Nawalparasi”**.

I am equally indebted to the primary school teachers of Tamsariya VDC, Nawalparasi for sharing their knowledge and attitude on STIs and HIV/AIDS.

Words fail to convey the depth of gratitude to my parents, family members specially my brother Bhim Lal Bhattarai, and friends whose affectionate cooperation enabled me to complete this dissertation. My special regards go to Mr. Dipendra Raj Baral for his helpful advices.

Shiva Lal Bhattarai

Abstract

Present research work entitled **Knowledge and Attitude on STIs and HIV/AIDS: A Case Study of Primary School Teachers in Tamsariya VDC, Nawalparasi** is based on the primary data collected from 91 respondents including 48 male and 43 female teachers. All the respondents have heard about contraceptive means, STIs and HIV/AIDS. Out of different sources of information radio and television remained outstanding sources for dissemination. Respondents said the condom is easily available and pharmacy is the easy location to get condom. Most of the respondents are known about gonorrhoea. Most of the respondents replied that unprotected sexual intercourse is the major cause for transmission of STIs and HIV/AIDS. Majority of respondents said that avoiding multiple sex partner and using condom are the preventive measures for STIs and HIV/AIDS. Majority of respondents strongly agreed to have their influential role to spread knowledge about STIs and HIV/AIDS in the community. Most of the respondents irrespective of their sex have denied the pre-martial sex. There is no significant difference between male and female teachers in acquiring knowledge about STIs and HIV/AIDS.
