## ACKNOWLEDGEMENTS

This study is designed to highlight the importance of Sources of government internal debt in term of Nepal. I am especially thankful to my respected supervisor **Mr. Kiran Thapa** and Mr. K.D. Manandhar, Shanker Dev Campus, for their scholarly and constructive guidance and suggestion. Their guidance and help has been a great source of encouragement and inspiration to me. Without their valuable insight and time, I would not have been able to complete it.

I would like to express my heartily thanks to management of Ministry of Finance and Nepal Rastra Bank Limited for providing various information for the study. I express my thanks to my friends for their credible help and co-operation.

I am very grateful to all of those who have helped me especially all the member of my family who provided regular inspiration and continuous contribution and support for my success.

The acknowledgement remains incomplete without special thanks to Mr.Ramesh Shrestha (Global Books and Stationery, Campus Road, Minbhawan) for taking a good care of the technicalities of computer typing and setting.

## Annexure- 2

**The percentage change calculation by using following formula.**

percentage of debt in .....years with respect to total internal debt =  $\frac{\text{total debt in ... year}}{\text{Total internal debt}} * 100$

so,

percentage of debt in 2000 with respect to total internal debt =  $\frac{54879.7}{755431.00} * 100$   
= 7.3%

Percentage of debt in 2001 with respect to total internal debt =  $\frac{66590.5}{755431.00} * 100$   
= 8.9%

Percentage of debt in 2002 with respect to total internal debt =  $\frac{79518.3}{755431.00} * 100$   
= 10.6%

Percentage of debt in 2003 with respect to total internal debt =  $\frac{84645.3}{755431.00} * 100$   
= 11.2%

Percentage of debt in 2004 with respect to total internal debt =  $\frac{86133.7}{755431.00} * 100$   
= 11.4%

Percentage of debt in 2005 with respect to total internal debt =  $\frac{87565.3}{755431.00} * 100$   
= 11.6%

Percentage of debt in 2006 with respect to total internal debt =  $\frac{89564.9}{755431.00} * 100$   
= 11.9%

Percentage of debt in 2007 with respect to total internal debt =  $\frac{99303.8}{755431.00} * 100$

$$\begin{aligned} & 755431.00 \\ & = 13.2\% \end{aligned}$$

Percentage of debt in 2008 with respect to total internal debt = 107229.5 \*100

$$\begin{aligned} & 755431.00 \\ & = 14.2\% \end{aligned}$$
