Dr. Bishow Kalyan Parajuli

ACKNOWLEDGEMENTS

First of all I extend my sincere thanks and gratitude to all of my respondents of Ghati Patan for their valuable sharing about traditional beliefs and practice about child care and for the genuine love, interest and honest information that was given to me while I was doing this study. I really appreciate the hot cups of tea, coffee and popcorns in those cold days of January during my field visit. Me myself being a mother it was really fun talking about child care, post-partum mother care, in-law issues, delivery and labor pain. These talks will be remembered always

I express my heartfelt gratitude along with deep appreciation to my Research Guide Mr. Ram Chandra Baral, Teacher of Prithvi Narayan Campus, Sociology/ Anthropology Department, for his valuable suggestions, timely guidance and untiring efforts in guiding me to complete the study.

In addition to my research guide, I would like to express sincere gratefulness to Dr. Bishow Kalyan Parajuli, Head of Department of Sociology and Anthropology and Lecturer Mrs. Shanti Bhushal who deserve a special gratitude and appreciation for their intellectual and appropriate consultation in identifying the research topic and going through my proposal.

I would also like to mention here in some of my professors, lecturer from whom I gained many insights about sociological and anthropological theories as a whole and I have a deep appreciation to them for their valuable co-operation and suggestion. Though I am not familiar to them and this is not only the appreciation for appreciation but their lecture has really helped me to understand what sociological and anthropological aspect is all about. Mr. Amrit Bhandari, Mr. Hari Ojha, Mr. Sharad K Paudel, Late K.N. Baral, Dr. Prakash Upadhaya, and Mr. Janardan Thapa deserve the special thanks in this regard.

I wish to express my sincere thanks to all librarians of the Prithvi Narayan campus, Librarian Mokshyada Dhakal of nursing campus Pokhara for their help in getting references.

None of this my learning process would have been possible without the support of my family especially my mother-in law, who helped me all the way from the beginning of the research. Because of her consistent responsive behavior, love and care, I was stress free from taking care of my one and half year little daughter and other daily home issues. I am eternally grateful to my sister in law Mrs. Sulochana Khanal and her husband Dr. Bishnu P. Paudel, who encouraged me to succeed this study and for their sincere support and guidance throughout my research. I would like to express my appreciation to my husband Mr. Shailendra Raj Khanal who was always ready to help me for my research endeavor.

Last but not the least I would like to express my heartfelt gratitude to my external supervisor Dr. Bikash K.C. who helped me to come up with my mistakes and for retouching my thesis.

Rachita Acharya
