ACKNOWLEDGEMENTS

This study entitled “Population Vulnerability for Earthquake Hazard: A Case Study of Ilam Municipality” is carried out for the partial fulfillment of Master Degree in Geography, T.U., Kirtipur, Kathmandu.

At first, I would like to convey my sincere gratitude to Prof. Dr. Bhim Prasad Subedi, Head of the Central Department of Geography, T.U., for permitting me to carry out this research.

I would like to express my heartfelt gratitude to my supervisor Dr. Narendra Raj Khanal, Associate Professor, Central Department of Geography, T.U. for his unlimited support, encouragement, and for priceless guidance in all stages of the study from the field work to the compilation of the work. I also express gratitude to all the teachers of Central Department of Geography for their invaluable suggestions, critical review and readiness to help in this research.

I am extremely grateful to Mr. Ganesh Kumar Jimme, Geographer/Urban Planner, NSET-Nepal for giving all the necessary support during the course work and providing facilities for this research work. I extend also my sincere thanks to Mr. Ramesh Guragain (Director, Earthquake Engineering & Research) Binod Shrestha and Gopi Basyal(NSET-Nepal) for their invaluable guidance throughout the course. Their ever spirited advice has resulted in the completion of this thesis.

I would like to extend my sincere thank to DUDBC, Babarmahal for providing me necessary spatial data for the completion of this research. I am thankful to Rajendra Pradhan for his support and suggestions. I am also thankful to staff of Ilam Municipality, for necessary support.

I am also thankful to my collegeous friends Mr. Nanda Lal Khatiwoda, Mr. Suresh Chaudhary, Mr. Kamal Acharya, Mr. Kashi Ram Dahal, Mr. Jeewan Ghimire, Ms. Bishnu Ghimire, Ms. Chetana Gyawali, Ms. Ganga Aale, and Mrs. Nirmala Sapkota for the fascinating academic and general discussions and of course to complete this research paper.

Dila Ram Sapkota

Chapter I	
Introduction	
1.1 Background	1
1.2 Statement of the Problem	3
1.3 Objective of the Study	3
1.4 Significant of the Study	3
1.5 Limitation of the Study	4
1.6 Selection of the Study Area	4
Chapter II	
Introduction to the Study Area	
2.1 Study Area	6
2.2 Drainage Pattern	7
2.3 Landuse Pattern	7
2.4 Soil Types	9
2.5 Geological Setting	9
2.6 Population Distribution	10
2.7 Climatic Conditions	12
2.8 Road Network	12
Chapter III	
Research Methodology	
2.1 Introduction	14
3.2 Pre Field Work	15
3.3 Field Work	16
3.3.1 Sampling	16
3.4 Post Fieldwork	18
3.5 Use of HAZUS Methods	20

Chapter IV		
Literature Review		22
4.1	Concepts of Earthquake Hazard	22
4.1.1	Previous Studies	24
Chapter V		
Spatial Distribution		27
5.1	Spatial Distribution of Population by Use Types of Floor	27
5.1.1	Residential Use	28
5.1.2	Commercial Use	28
5.1.3	Mixed Use	29
5.1.4	Official Use	29
5.1.5	Population Distribution According to Building Type	30
Chapter VI		
Temporal Distribution of Population		32
6.1	Morning Time	34
6.2	Day Time	35
6.3	Evening Time	36
6.4	Night Time	37
Chapter VII		
Population Vulnerability		38
7.1	Vulnerability Context	38
7.1.1	Low Vulnerability	39
7.1.2	Medium Vulnerability	40
7.1.3	High Vulnerability	41
Chapter VIII		
Injuries and Casualties		43
8.1	Introduction	43
8.1.1	Casualties by Time Period	45
8.1.2	Casualty by Building Use	47
8.1.3	Casualty by Building Types	49

Chapter IX	
Awareness and preparedness	52
9.1 Introduction	52
9.1.1 Knowledge and Awareness	52
9.1.2 Preparedness	54
Chapter X	
Conclusion and Recommendations	57
10.1 Conclusion	57
10.2 Recommendations	58
References	60
Annexes	62
