## ACKNOWLEDGEMENTS

All the successful attempts are the result of contribution of some co-operative hands. A number of individuals have helped and encouraged me in various ways in completing this study. Though I may not be able to mention the names of them, I here with wish to express my special gratitude to the following individuals.

First, I am highly indebted to my respected teacher, Mr. Surendra Mishra for his valuable guidance and supervision to conduct and complete the thesis.

I would be failing in my duty if I do not express my gratitude to my parents, whose unending inspiration and immense love have brought me to the present status. Similarly, I am grateful to my friends Mr. Arun Kumar Yadav, Mr. Sunil Kumar Yadav, Mr. Gopal Yadav, Mr Dharbendra Kumar Jha, Mr. Mukesh Kumar Jha, Mr. Mukesh Kumar Yadav, Mr. Kapil Dev Prasad Yadav, Miss Nutan Mukhiya, Mrs. Sarita Kumari Yadav, Mr Shailendra Kumar Yadav and Mr. Upendra Kumar Yadav. I am deeply indebted to Mr.Asafi Sah , the secretary of the Samsi VDC, who helped me in this work right from its inception and whenever I needed the help. I am also greatly obliged to all the respondents who helped me collect the required information. I express my sincere thanks all those who helped me directly or indirectly.

Finally, especially thanks go to maternal uncle Mr. Yogendra Prasad Yadav who inspired me to study the Sociology and Mr. Arun Kumar Yadav for splendid word processing and printing this document.

**Birendra Kumar Yadav**

## ABSTRACTS

The aim of the study is to give a short description of the Chamars, a socially dominated caste group of Nepal, regarding their socio-economic status. They are found mainly in Terai Region. Chamars are poorest and backward caste people in Nepal. They are born in poverty, live in poverty and die in poverty. Their life and socio-economic status is still under the smoke of cloud. So, the question is how deeply these social trends affected their daily livelihood and what change it has brought to their socio-economic status. This research attempts to focus on the various aspects of socio-economic life of the Chamar community.

The general objective of the study is to identify the socio-economic condition of Chamar people and the specific objectives are as follows: To provide an ethnographic study of Chamars, To identify the problems of Chamar community and To explore the cultural pattern of Chamar.

For this purpose, the Samsi VDC of the Mahottari district is selected purposively. There are 90 Chamar households. The total population of those households is 450. The Chamars are, in general, Hindus. They worship Hindu Gods and Goddesses. The festivals of the Chamars are similar with Brahmins and Chhettris. They mainly celebrate Chhath, Dashain, Tihar, Maghe Sakranti etc. They play their traditional and modern types of band (Baja) as well. Therefore, people invite them to play their band on weddings.

The Chamars are poor and exploited by the high caste group like Brahmin, Chhettri etc. Most of them are landless. Therefore, they are backward in every field. They are uneducated and backward. They have forgotten their traditional way of life. In the study area, it is hardly to see their traditional type of occupation, dress and ornaments. Although they have their own native language, they prefer to speak Nepali language.

Though caste based discrimination is not as rigid as it was in the past, some discriminations still exist in the study area. They are not allowed to enter the house of

Brahmins and Chhettris as well as religious places. The water of a well is not used at the same time by the higher caste people and the Chamars.

The conclusions found from the study area as follows:

The economic condition of the Chamars of Samsi is very poor. The majority of Chamars in the VDC consist of the landless, the marginalized or small farmers, who do not have enough land or other means of production for survival. The literacy percent of the Chamars are very low and they hardly complete their schooling. The higher education attended person is nil in the Chamar community. They practise diverse cultural activities; they practise their religion, customs, traditions and their social values in a strong and rigid manner. The Chamars have been subjected to economic exploitation, oppression and poverty. They are still being exploited by the so called non Dalits in many ways; opportunity, status, education etc. Early marriage, unplanned family, economic disability, illiteracy, lack of decision making power, simplicity, landlessness, exploitation, conventional approach in agriculture are the main constraints for the socio-economic development of the Chamars of the Samsi VDC.
