ACKNOWLEDGEMENT

Writing a thesis in M.B.S. (Master Degree's in Business Studies) second year is compulsory work for every student in order to develop research capability and translate theoretical knowledge into the actual practice in analyzing the specific issues related to Nepalese share market concerns such as right share offering. The objective of this thesis is to acquire a practical knowledge, to undertake independent analysis and appraisal to the situation. So, I am thankful to Tribhuvan University Faculty of Management for providing me such opportunity to experience the practical knowledge of my subject. I try my best to give the readers a bird's eye view of this thesis and enable them to locate quickly each section of it to find out the right offering & its impact on stock price in Nepalese Market.

This work would not have come in this form without the precious guidance, continuous recommendation and inspiration of Assistant Dean Dr. Kamal Das Manandhar and Lecturer Shiva Pokherel. Their supervision has highly encouraged me to complete this research, which is ineffable.

I would also like to express my special thanks to the Campus administrative staff and staff of Shanker Dev Campus library members for their kind co-operation. I am also thankful to all the members of Central library T.U., Security Board of Nepal library and Nepal Stock Exchange library for their kind co-operation. I am very grateful to my father Mr. Prayag Man Pradhan and my mother Jamuna Pradhan who gave me a full support to complete my research.

Needless to say "to err is human" and I cannot be the exception. I hope the possible errors would be covered by subsequent studies in the future. I hope this study will be helpful for academicians, student, researchers and other interested persons.

Finally I would like to express my deep appreciation and acknowledgements to all my friends and family for giving full support and courage in writing this thesis.

Ujjwal Man Pradhan
