

CHAPTER-ONE

INTRO vii TION

1.1 General Background

Language is generally defined as a systematic means of communicating ideas and feelings through the use of linguistic signs. It exists in different forms such as in speech, in writing, in signs like gestures, and simply in our minds as we dream, remember or quietly think out an issue. According to Sapir (1978: 8) “Language is purely human and non-instinctive method of communicating ideas, emotions and desires by means of a system of voluntarily produced symbols.”

People are using a number of languages in the world. Among them, English is the most widely used language because it has gained the status of international language. Because of the richest vocabulary, the areas covered by it, the numbers of users, the status of using it, the English language is taken as the richest language in the world. It is the common language of the world. The English language is the most widely used in the UN Forums, too. It is the language of the world politics, science, technology, medicine, economics, mass media, marketing trade and so on. It is claimed that over 50% of the world newspapers, over 50% of the world's scientific and technical periodicals and more than 60% of the world's radio stations use English as a means of communication. English is taken as a passport to travel the whole world. It is taught in different parts of the world.

English has a significant influence in the education system of Nepal. A good number of books, newspapers, magazines are found in English in Nepal. English is taught as a compulsory subject from class one to bachelor

level. At university level, most of the prescribed and reference books are available in English medium. It is spoken as a second but prestigious and significant language. Most of the private schools use English as a medium of instruction inside the classroom as well as school compound except while teaching other language subjects. It is also used as a means of instruction and evaluation at the higher levels of education. Health, Population and Environment is an English medium book used in private schools of Nepal, which is originally written in Nepali by Janak Education Materials Centre Ltd. (JEMC) and later translated by same centre, JEMC.

1.1.1 Levels of Language

Levels of language refer to a major dimension of structural organization held to be susceptible of independent study. The most widely recognized levels of language are phonology, grammar and semantics, but often phonetics is distinguished from phonology, lexical from semantics and morphology and syntax are seen as separate levels within grammar. Pragmatics is also sometimes described as a level of language. The short description of four levels of language is given below.

1.1.1.1 Phonology

Phonology is a branch of linguistics that studies the sound system of particular human language like English, Nepali and Latin. In phonology sounds are organized into a system of contrast and analyzed in terms of phonemes. The aim of phonology is to demonstrate patterns of distinctive sounds found in a language. Phonology is concerned with the functional aspects of speech sounds i.e. the working or functioning of speech sounds in a language or languages. In other words, phonology deals with the sound system of language: how sounds are combined to form larger units?, how do they change?, how are they deleted or assimilated? etc. are studied at this

level of language. Phonology differs from phonetics in the sense that phonology studies the features of particular language on the other hand phonetics studies the features of all human speech sounds.

Generally, two branches of phonology are recognized: segmental phonology and supra-segmental phonology. Segmental phonology analyses segmental sounds, such as, phonemes and supra-segmental phonology analyses those features which cannot be segmented as an individual sounds. Intonation, pitch etc. are the examples of supra segmental sounds.

1.1.1.2 Morphology

Morphology is the branch of linguistics which deals with word structure. Crystal (2003: 301) defines morphology as "the branch of grammar which studies the structure or forms of words." It is generally divided into two categories: the study of inflections (inflectional morphology) and of word formation (lexical or derivational morphology). According to Lyons (1968: 52) "Morphology deals with the external structure of words."

1.1.1.3 Syntax

Syntax is the study of grammatical relationship between words and other units within the sentence. It accounts for the ways in which words are put together to constitute phrases, clauses and sentences. It is concerned with their order and arrangement, the way changes can be made, and the formal relationship between them established.

1.1.1.4 Semantics

Semantics is also the branch of linguistics that deals with 'sentence' meaning. Semantics helps us to know how the semantic relation of lexical items is embedded with the syntactic order. In other words, it studies the meaning of individual words in relation to the meaning of other words which

are used in different situational expressions. For example "run" has at least two meanings 'run' - 'move fast' and 'organize'.

1.1.2 Defining Vocabulary

According to Harmer (1997), language structures make up the skeleton of language, then it is vocabulary that provides the vital organs and flesh. It is the most important unit of language without knowing the words of language we cannot express our thoughts and feelings and roughly be defined as the words we teach in the foreign language. Without knowing the words of language we cannot express our thought and feeling. Vocabulary roughly is defined as the words we teach in the foreign language. The term vocabulary is defined differently in different books.

According to Richards et al. (1985: 307) "Vocabulary refers to a set of lexemes including single words, compound words and idioms." Similarly, Hornby (1998: 721) defines vocabulary as "a collection or lists of words with brief explanation of their meanings, now esp. a list of this kind given in an elementary grammar or reading book of foreign language."

According to Harmer (1997) "if language structures make up the skeleton of language, then it is vocabulary that provides the vital organs or flesh."

Regarding vocabulary, Celce-Murcia and Larsen-Freeman (1983: 29) say "We take a considerably broader view of the lexicon: we consider it to comprise not only single words but also word components and conventionalized multiword forms."

By analyzing the above definitions we can conclude that vocabulary can be single word or group of words that take a single meaning. For example, 'post office' and 'sister in law' which are made up of two and three

words respectively but express a single idealized meaning. It provides the vital organs and flesh on the skeleton of language.

Language learning is a systematic process. Systematic procedures and techniques are required to learn it. Language is also a vast ocean. No one can learn all of it. So, we should select necessary part of language from the vast ocean. So, there is a great requirement of systematic analysis and evaluation of vocabulary items because it is the most important parts of language learning. Without vocabulary nothing can be expressed.

Vocabulary is an important aspect of language. Vocabulary items are the building blocks of language which are must for learning language. Though we may have a good knowledge of structures, we cannot express our feelings, thoughts and wants without having the knowledge of proper words. A good store of vocabulary is crucial for understanding and communication. Learning a foreign language is basically a matter of learning the vocabulary of that language. So, there is a great requirement of systematic analysis and evaluation of the vocabulary.

1.1.2.1 Types of Vocabulary

Arts and Arts (1986: 229) classify words into two types: Major and minor word classes. Major words classes are called open classes and minor word classes are also called closed classes. Major words have their lexical meanings whereas minor words have only grammatical meaning but not lexical meaning. Nouns, verbs, adjectives and adverbs are major words and all other parts of speech like helping verbs, prepositions, articles, conjunctions, numerals, pronouns, quantifiers and interjections etc. are minor words.

Similarly, Harmer (1997: 159) classifies vocabulary into two types: active and passive. In simple words common words are active vocabulary

and the words which are rarely used are called passive vocabulary. In the field of language teaching, active vocabulary refers to vocabulary the students have been taught or learnt, and which they are expected to be able to use and passive vocabulary refers to words which the students will recognize but will probably not be able to produce. But no vocabulary is active or passive in itself. Vocabularies are active or passive to a person or to a learner.

On the basis of the types of meaning they convey, vocabulary can be classified into two categories: concrete and abstract. If any word refers to an object with a concrete shape, it is called concrete vocabulary e.g. pot, cow, table etc. If a word signifies something which has no different shape size or measurement and is entirely depend on our personal imagination, it is called abstract vocabulary e.g. love, affection etc.

Words are classified into three types on the basis of the structure: Simple, compound and complex. Simple word consists of a single free morpheme followed, or not by and inflectional affix such as read, reads etc. Compound words consist of two or more than two free morphemes e.g. class teacher, car driver etc. Complex words consist of a root plus one or more derivational affixes, e.g. boyhood, information, etc. To conclude, a word is a smallest meaningful bit of speech that occur in isolation. According to Todd (1991: 49-50) words is used for following five senses.

i) Orthographic word

An orthographic word refers to the word in its conventional alphabetical writing and has space in either side e.g. dance, write, etc.

ii) Phonological word

It is the word in spoken form which is preceded and followed by pause or silence in speech. It is used as phonetic alphabet e.g. (kæt).

iii) Morphological words

Morphological word only considers the form of word but not meaning. e.g. the word "Ball" has two meanings, a spherical object used in games and formal social gathering for dancing but it is a single morphological words.

iv) Lexical word

A lexical word is also called lexeme. It is abstract unit which underlies many morphological forms such as sing, sings, singing, song and sung represent a single lexeme.

v) Semantic word

A semantic word considers the meaning of a linguistic unit. The one morphological word "ball" represents two semantic words because it has two unrelated meanings.

1.1.2.2 Importance of Teaching Vocabulary

Word is probably the most important unit of language. It is the meaningful unit of language. Communication is not possible without word. With word we can send and receive messages. Though we have good knowledge of phonological and grammatical systems, no message can be transferred. For the effective communication right choice of word is required. So, teaching vocabulary is essential.

Grammar and vocabulary are important for successful communication. Here, a vital question arises, which of the two is more important: grammar or vocabulary? In this regard Wilkins (1972: 111) says: "Without grammar very little can be conveyed, without vocabulary nothing can be conveyed." Thus, vocabulary teaching is essential.

When we want to express our feelings, thoughts, ideas, etc we need vocabulary power. When we do not have vocabulary power, we fail to communicate the ideas.

Hearer is the person who evaluates our language. If we select the right word according to proper field and situation we can create good impression to the hearer. Otherwise, our conversation will not be effective. So, vocabulary teaching is essential to the students.

Learning a word is often considered learning the meaning but it is not true. In order to truly know how to use a word appropriately in English, a speaker or writer would need to know much more than simply the meaning of the word.

When we learn a language, we learn vocabulary automatically. To engage in communication adequate numbers of vocabularies are required. Due to the lack of vocabulary, people often get frustrated while expressing thoughts in the target language.

1.1.3 Word classes

In a language there can be many words. These all words can be grouped in a few groups according to their characteristic features which are traditionally called parts of speech but modern grammarians prefer to call them word-classes. Modern grammarians classify words into word classes by considering their formal and functional characteristics. The main criteria for classes should be their formal structures and functional characteristics.

We should assign words to various classes considering how they are built and what role or roles they play in the structure of phrases. They are described below in brief.

i) Noun

Traditionally 'noun' is defined as a naming word for place, person or thing. It is only associated with the notions. But modern definition of noun is associated with formal and functional criteria of morphology and syntax.

Adams (1973: 17) says “Among the features that we expect of noun are the ability to take the plural and genuine inflection to take certain characteristic suffixes like 'er' and 'ance', 'ness', 'ism' to be preceded by determiners like a, the, this, my, another, to follow prepositions to all as the subject or object of a sentence.”

Nouns are identified on the basis of typical derivational suffixes which are mentioned below.

dom-	freedom, kingdom
ee-	payee, divorcee
age-	coverage, postage
ation-	information, transformation
ance-	acceptance utterance
eer-	engineer, mountaineer
ence-	difference, existence
ess-	actress, murderers
ette-	cigarette, maisonette
hood-	childhood, parenthood
ism-	idealism, modernism
ist-	royalist, specialist
ment-	amendment, commandment
ness-	bitterness, whiteness
ship-	friendship, scholarship

or- actor, tutor

ii) Verbs

Verb is traditionally defined as doing or action word. Modern linguistics does not accept this concept because some verbs like 'seem' 'be' do not show any action. Crystal (2003: 490) says "the formal definition of a verb refers to an element which can display morphological contrasts of tense aspect, voice, mood, person, and number. Functionally, it is the element which singly or in combination with other verbs (e.g. as a verb phrase) is used as the minimal predicate of a sentence, co-occurring with a subject."

On the basis of Crystals view, a verb can be defined in terms of both form and function. There are three derivational suffixes that are typical of the class of verb.

en- broaden, darken
ify- simplify, glorify
ze/se- economize, nationalize

iii) Adjective

According to Crystal, an adjective is a term used in the grammatical classification to refer to main set of items which specify the attributes of noun. Adjective can be identified on the basis of the formal and functional criteria. The following are some typical derivational suffixes of adjectives.

able- communicable, visible
al- functional, formal
ic/ical- economic(al), linguistic
ile- hostile, mobile
ive- productive, massive
less- endless, thoughtless
like- warlike, ladylike

ous- continuous, dangerous
y- happy, dirty

iv) Adverb

Adverb is a word that modifies all the words except noun and pronoun, specially it modifies a verb, adjective, another adverb or a whole sentence. According to Crystal (2003), a term used in the grammatical classification of words to refer to a heterogeneous program of items whose most frequent function is to specify the mode of action of the verb. Typical derivational suffixes for adverbs are:

ly- badly, wisely
word(s)- upward (s), homeward(s)
wise- lengthwise, clockwise

v) Pronoun

Pronoun refers to the closed set of items which can be used to substitute for a noun phrase (or single noun). For example,

The boy runs.

He runs.

There are various subclasses of pronouns such as:

- 1) Personal pronoun
 - 1st person- I, we
 - 2nd person- You
 - 3rd person- He, she, it, they
- 2) Possessive pronoun- my, yours, their etc.
- 3) Demonstrative pronouns- this, these etc.
- 4) Reflective pronouns- myself, himself, themselves etc.
- 5) Distributive pronouns- all, both, each etc.
- 6) Indefinite pronoun- some, any etc.

vi) Preposition

A preposition is a functional or structural word that belongs to a class in English which is followed by a noun or a pronoun. Crystal (2003) says that a preposition is a term used in the grammatical classification of word referring to the set of items which typically precedes noun phrase (often single noun or pronouns) to form a single constituent of structure. Prepositions are free morphemes.

e.g. he goes to school.

Goma brought a book for her sister.

vii) Conjunction

Generally, a conjunction is a joining word whose primary function is to connect words or other constructions. For example: Black and White, open the door and closed the window, etc.

From the functional point of view there are two types of conjunction.

i) Coordinating conjunction and

ii) Subordinating conjunction

viii) Interjection

Interjections are closed class items which are very limited in numbers. These are also known as 'exclamation'. It is defined as an involuntary utterance expressing certain emotions and feeling such as surprise, fear, joy, grief etc. According to Crystal interjection refers to a class of words which are unproductive, do not enter into syntactic relationship with other classes, and whose function is purely emotive. For instance;

What a beautiful you are!

Hey, don't eat that dirty food!

What a pity?

1.1.4 Aspects of Language

Language is a vast ocean. No one grips with this vast totality. Teaching a language refers to help the learner for learning it. Teaching therefore, should be geared to facilitating language learning on the part of the learners. The most important question regarding the language learning is what are the things that a language learner needs to learn?

Language learner needs to learn pronunciation, vocabulary, grammar and other different skills. Thus, aspect of language refers to things that a learner of language needs to learn. According to Harmer (1997), the aspects of language are pronunciation, grammar, vocabulary, discourse and skills. Each of the aspects is briefly described below.

i) Pronunciation

A language learner needs to learn various sounds which occur in a language. We should be able to differentiate between these sounds and understand certain sound rules. For example, how they are pronounced and where they are stressed. We should be able to know intonation patterns, rhythm and relationship between pitch and intonation. We study these under phonetics and phonology.

2) Grammar

Grammar is another aspect of language. It is the important aspect of language. To enable the students to use the language, we should teach grammar. But grammar should be taught indirect and interesting way.

3) Vocabulary

Vocabulary provides vital organs and the flesh of language. Thus, we need to learn pronunciation, meaning, spelling and use of words. Words occur in context, so the meanings of words need to be taught according to the context where they are used.

4) Discourse

Language is used differently in different situation. So language user should be able to use language according to situation. We need to know formal and informal language and different functions of it.

5) Skills

Listening, speaking, reading and writing are four language skills. If a learner develops language skills, he/she can approach the foreign language with more confidence.

1.1.5 Aspects of Words

There are different aspects about vocabulary. According to Harmer (1997) the following aspects are crucial in vocabulary.

I. Word Meaning

Words have more than one meaning which is difficult to separate in isolation. Word needs context in which it is used. For example the word 'bank' has two meanings; side of river and a commercial organization. Thus, the meaning of the word cannot be deciphered in isolation, but it needs context in which it is used.

There are other facts about meaning, too. Sometimes, words have meaning in relation to other words. For example, the word 'vegetable' describe anyone of a number of other things. e.g. potatoes, carrot, cabbages etc. 'vegetable' has general meaning where as potatoes is more specific. We also understand meaning a word like 'good' in the context of a word like 'bad' (antonyms) and so on.

II. Word Use

A word meaning can be changed, stretched or limited by how it is used. It is frequently stretched through the use of metaphor and idioms. For example, the word 'hiss' describes the noise that snake makes. But it

stretches its meaning to describe the way people talk to each other. This type of use is important. Word meaning is also governed by collocation, style and register. Thus, students need to recognize metaphorical language use and they need to know how words collocate. They also need to know what stylistic and topical contexts words and expressions occur in.

III. Word Formation

Words can change their shape and their grammatical value too. Students need to know facts about word formation and how to twist words to fit different grammatical contexts. Students also need to know how suffixes and prefixes change the shape and meaning of the words. For example, we preface one with 'im' and the other with 'in' but both of them are prefixes having same meaning.

Students need to know how words are spelt and how they sound. Word formation 'then' means knowing how words are written and spoken and knowing how they can change their forms.

IV. Word Grammar

Words not only change according to their grammatical meaning but they can also trigger the use of certain grammatical patterns. For example, countable nouns can be both singular and plural (one house; two houses) but an uncountable noun can only be singular. We cannot say two 'furnitures'. These two differences are reflected in grammatical rules; the word 'house' can be collocated with plural verbs whereas the word furniture never can. So we need to know much more grammatical behaviour of words. While teaching vocabulary we should treat all the aspects of each and every vocabulary items.

1.1.6 The Structure of the Word

A word consists of one or more than one morphemes. A simple word consists of a single morpheme as the root. For example, cow, marry, beauty etc.

A word may consist of a prefix, the root and a suffix. We can present the following structure below.

- i) Root- press
- ii) Prefix + root= impress
- iii) Prefix+ root + suffix= Impression
- iv) Prefix + root + suffix + suffix= Impressionistic
- v) Prefix + root + suffix + suffix + suffix= Unimpressionistic

We can sum of the structure of the words as below

(prefix) + Root (suffix)

The prefix and suffix are optional. They may occur or not, but the root is essential. On the basis of the word structure, we can classify them into three types: simple words, compound words, and complex words. The short description of each of them is given below.

I. Simple Words

The word which consists of only one free morpheme is called a simple word. e.g. eat, play, cow etc.

II. Compound words

The words which are combination of free morphemes or combination of words are called compound words. They involve nouns, verbs, adjectives and adverbs. They can be formed by the combination of these major word classes e.g. day light, duty free, car-park, heavy-weight, take-over, under-world etc.

III. Complex Words

The words which are formed by a process of "affixation" are called complex words. It means that the words formed by adding prefix or a suffix to root or to a word that has already undergone a word formation rule are called complex words. e.g. unhealthy, surprisingly etc.

1.2 Review of the Related Literature

In the Department of English education, various researches have been carried out as a practical study in different fields. Some of the researches which are more or less related to this study can be observed as follows.

Chudal (1997) has in his M.Ed. thesis, studied the vocabulary achievements of the students of grade six. The objectives of this study were to investigate the student's achievement of English vocabulary used in English textbook for grade VI. The study found that the achievement level was poor.

Lamichhnane (1999) conducted a research in his M.Ed. thesis and studied the vocabulary achievement of the students of grade six. He has done his study to find out the extent to which objectives set out in the curriculum related to skills, speaking, and writing are reflected in the English textbook for grade eight.

Khatri (2000) has studied vocabulary achievement of grade eight. The objective of this study was to investigate the achievement of English vocabulary of the students of grade eight. The percentage of the total achievement in nouns and verbs were 67.9% and 59% respectively.

Tiwari (2001) has studied the vocabulary achievement of the students of grade 'X'. The objective of this study was to investigate the achievement of English vocabulary used in the new English textbook for grade 'X'. His

study has presented that 43% of the vocabulary items were quite difficult for the level of grade X and 52% of the total students were below average.

Upadhyaya (2002) carried out a research on 'A Study on Achievement of Phrasal Verbs of the Students of Higher Secondary Level'. The objectives of the study were to find out the proficiency levels of the students of four streams (arts, commerce, education and science). The study found that the total achievement was satisfactory. Similarly, the percentages of total achievement of the students of four streams were 51.38% in arts, 56.6% in education, 79% in science and 83.24% in commerce etc.

Bohara (2004) carried out a research on 'A Descriptive Study on the English Textbook for Grade 1'. He found that 217 vocabulary items were found in the text. The vowel sound /ao/ and the consonant /z/ were not found in the language used in the textbook.

Dawadi (2004) has analyzed that new English textbook for grade seven. Her study has shown that the subject matter was free from sex bias. It was interesting for the students to read as it provided new information. It did not contain all contents expected by curriculum. The studies mentioned above are related to textbooks analysis and vocabulary achievement.

No one has done a research on the analysis of the vocabulary used in health, population and environment textbook for grade X. That is why the researcher has been interested to carry out a research on it.

1.3 Objectives of the Study

The objectives of the study were as follows:

1. To describe the vocabulary used in the Health, Population and Environment textbook for grade X in terms of the following variables:
 - i. Total number

- ii. Parts of speech
- iii. Frequency
- iv. Morphological structure
- v. Level of difficulty

2. To list some pedagogical implications.

1.4 Significance of the Study

Vocabularies are the building blocks of language. There is no existence of language without vocabulary. Similarly, unlimited number of vocabularies are used in a language. This unlimited number of vocabularies cannot be taught within limited time. Thus, we should select the essential vocabularies according to the needs of the learners. Before selecting the vocabularies we have to analyze and evaluate them. So, the title is very important since it is about the analysis of the vocabulary. Similarly, the research will be significant to the other researchers who are interested in the analysis of vocabulary items. It is also significant to the syllabus designers, textbook writers, teachers, teacher trainers, students and so on.

1.5 Definition of Specific Terms

Abbreviated Forms: Abbreviated forms refer to the short form of words. e.g. TV

- i. **Affix:** A letter or group of letters added to the beginning or end of a word to change meaning function of the word.
- ii. **Contracted Forms:** It refers to the items, which have become shorter due to the deletion of some letters. e.g. isn't is the contracted form of is not.
- iii. **Conventionalized multiword forms:** Group of words that occur together and serve specific functions.
- iv. **Corpus:** The total collection of written words.

- v. Lexemes: Lexemes are the vocabulary items that are listed in the dictionary.
- vi. Frequency: It refers to the occurrence of words.
- vii. Mono-morphemic words: Words with only one morpheme.
- viii. Morpheme: A minimal linguistic unit which can be used independently such as cow, cat etc.
- ix. Parts of speech: A term used to describe the different types of words that are used to form sentences such as noun, verb, adjective, adverb, preposition, conjunctions, interjections etc.
- x. Poly-morphemic words: words with more than one morpheme.
- xi. Quantifier: A word or phrase which is used with a noun and which shows qualities e.g. little, many.
- xii. Root: It is the basic form of words, which cannot be further analyzed without total loss of identity.
- xiii. Suffix: An affix attached after a root or stem or base such as 'ly' as in 'quietly'.

CHAPTER-TWO

METHODOLOGY

Research work is a complex phenomenon. So, certain patterns and procedures are entire to carry out the research work. The process is known as methodology. This chapter deals with the sources of data, process of data collection and limitations of the study. The researchers adopted the following methodology to accomplish the present study.

2.1 Sources of Data

To carry out this research work and to get factual information secondary sources of data are used. The data are as follows.

2.1.1 Secondary sources

The researcher used secondary data only. The researcher consulted all the vocabulary items used in the Health, Population and Environment textbook. Similarly, previously carried out researches related to vocabulary and textbook analysis and various articles, journals and textbooks are the secondary sources of data for this study.

2.2 Process of Data Collection

The following procedures were adopted in the process of data collection by the researcher.

Firstly, the researcher listed all the vocabulary items and classified all the vocabulary items into word forms and abbreviated forms.

Secondly, the word forms were classified into eleven different groups namely, noun, pronoun, verbs, adjectives, adverbs, preposition, articles,

numerals; quantifiers and interjections in terms of parts of speech and kept them alphabetically.

Thirdly, the researcher counted the frequency of occurrence of each and every vocabulary items. To count the frequency of occurrence of vocabulary items the researcher used the following procedures;

While counting the frequency of occurrence of nouns, the researcher wrote first noun as it was in the list when the same word was repeated +1 mark was assigned after the noun written and total number of frequency of occurrence was counted. When variant forms of the same noun were appeared, frequency was counted using the same procedures and the frequency was added to the previous noun. While counting the frequency of noun, compound nouns were counted as a single word. Nepali nouns and name of the place and person which were presented in the textbook were not included in the data. Apostrophe's' was excluded from the noun and counted as a single word in the possessive case of the noun. E.g. student's= student.

While counting the frequency of occurrence of verbs, the first verb which was written in the text was written as it was in the list. When the same verb was repeated +1 mark was assigned after the written verb and total number of frequency was counted. When variant forms of the same verb appeared, frequency was counted using the same procedures and the frequency was added to the previous one. In the data only numbers of the frequency were presented but various forms of same lexeme were not included. While counting the frequency of verbs, multi-word verbs were counted as a single word. E.g. cut down. Contracted forms were separated and counted as two different words. (e.g. 'is' not equal to 'is' and 'not').

While counting the frequency of the occurrence of adjectives, the first adjective which was written in the text was written as it was in the list.

When the same adjective appeared +1 mark was assigned after the written adjectives and total number of frequency was counted.

While counting the frequency of occurrence of adverbs, pronouns, prepositions, articles, conjunctions, numerals quantities, introjections and abbreviated forms, the above mentioned procedure was applied.

Fourthly, morphological structure of the nouns, verbs, adjectives and adverbs were observed in terms of derivational and inflectional affixes. While analyzing the morphological structure of the verbs, auxiliary verbs were not included.

Fifthly, the researcher randomly selected four hundred forty words from the text and prepared two separate text items per eleven students and used them to find out the level of difficulty. The researcher implemented the test items to the students of White Hills Higher Secondary School, Salleri, Solukhumbu.

Lastly, the collected items were tabulated and analyzed and interpreted descriptively using statistical tools eg. table and bar-diagram.

2.3 Limitations of the Study

The study was limited in the following ways:

1. The study was limited to the vocabulary items used in the Health, Population and Environment textbook of the English version for grade X in Nepal, produced by Janak Education Materials Centre, Ltd.
2. The study was limited to the analysis of the number of morphemes in term of derivational and inflectional affixes.
3. The study was limited to the analysis of the vocabulary items in terms of total numbers, part of speech, frequency of occurrence, morphological structure and level of difficulty.

4. Regarding the word classes the syntactic distribution of a word has been the sole criterion for the classification.
5. While identifying the level of difficulty of the vocabulary items, the study was limited to the students of grade X of White Hills Higher Secondary School, Salleri, Solukhumbu.

CHAPTER- THREE

ANALYSIS AND INTERPRETATION

The aim of the research was to analyze the vocabulary items used in 'Health Population and Environment textbook for Grade X in English medium private schools published by Janak Education Materials Centre. So under this topic the researcher has attempted to analyze the collected data (i.e. all the vocabulary items) in terms of total numbers, parts of speech, frequency of occurrences, level of difficulty and morphological structure. Word forms were subdivided into eleven different groups namely nouns, verbs, adjectives, adverbs, pronouns, prepositions, conjunctions, articles, interjections, quantifiers and numerals and analyzed them in terms of the following variables:

- i) Total number
- ii) Parts of speech
- iii) Frequency of occurrence
- iv) Level of difficulty
- v) Morphological structure

3.1 Analysis of Vocabulary Items in Terms Parts of Speech

Altogether 46878 different vocabulary items were found to be used related to different parts of speech (See Appendixes). The total numbers of vocabulary items related to different parts of speech are presented in the following table:

Table No. 1

Analysis of Vocabulary Items in Terms of Parts of Speech

S.N.	Parts of speech	Number of words	Percentage
1	Nouns	15205	32.43
2	Verbs	8191	17.47
3	Adjectives	4570	9.75
4	Adverbs	1619	3.45
5	Pronouns	2404	5.13
6	Prepositions	7120	15.20
7	Interjections	02	0.004
8	Articles	4013	8.56
9	Quantifiers	358	0.76
10	Conjunctions	3108	6.63
11	Numerals	288	0.61
Total		46878	100

Note: Abbreviated forms are not included in this table.

The above table shows that there are 15,205 nouns used in the textbook which have covered 32.43%. Similarly, there are 8191 (17.47%) verbs, 4570 (9.75%) adjectives, 1,619 (3.45%) adverbs, 2,404 (5.13%) pronouns, 7,120 (15.20%) Prepositions, 02 (0.004%) interjections, 4,013 (8.56%) articles, 358 (0.76%) quantifiers, 3,108 (6.63%) conjunctions and 288 (0.61%) numerals.

3.2 Analysis of the Vocabulary Items in Terms of the Frequency of Occurrence

While counting the frequency of occurrence of word forms, they were categorized into eleven different groups in terms of eleven parts of speech and analyzed under the following sub headings:

3.2.1 Frequency of Occurrence of Nouns

15205 nouns were found to be used in the textbook which has covered 32.43% in total words. Both single and compound nouns were used in the textbook. Similarly, both singular and plural forms of the nouns were used with various numbers of frequency of occurrence (See Appendix I).

The frequency of occurrence among noun is unbalanced. The word ‘family’ has the highest number of frequency. It has occurred 422 times in the textbook, 394 times as a singular form and 28 times as a plural form. Out of 15205 nouns 382 have occurred only one time in the textbook. Similarly, 191 nouns have been used twice and 112 occurred thrice respectively. In the same way, some other nouns have occurred four times, five times and so on. More than 30 nouns have occurred more than hundred times. The most frequent 30 nouns which have occurred in the text are presented in the following table with their frequency of occurrence.

Table No. 2

Nouns with their Frequency of Occurrence

S.N.	Nouns	Frequency
1	family	422
2	health	421
3	development	397
4	People	264
5	life	287
6	area	222

7	activity	220
8	Quality	216
9	earth	195
10	conservation	193
11	region	180
12	child	170
13	environment	170
14	food	168
15	effect	164
16	resource	147
17	animal	140
18	education	140
19	Water	130
20	care	123
21	Aspect	127
22	man	126
23	country	127
24	service	119
25	land	111
26	materials	110
27	Biodiversity	108
28	parent	106
29	plant	104
30	population	104

The above table shows that among the most frequent 30 nouns, the noun ‘family’ has the highest number of frequency of occurrence. It has occurred 422 times in the textbook. Similarly, the noun 'health' is used 421 times and ‘development’ is used 397 times in the textbook.

The nouns used in the textbook are related to Health, Population and Environment field; they also showed the social reflection. But the frequency of occurrence among them is unbalanced. Some of the nouns are not concrete which create difficulty for students to comprehend. (The total

number of nouns, their frequency of occurrence both in singular and plural forms are presented in appendix I).

3.2.2 Frequency of Occurrence of Verbs

Altogether 8191 vocabulary items related to verbs were found to be used in the textbook. It has covered 17.47% in the total . Both auxiliary and lexical verbs are used in the textbook. There are 2185 auxiliary and 6006 lexical verbs. Various forms of the lexical verbs are used in the textbook (See Appendix II).

There is no balance of the frequency of occurrence of verbs, too. The auxiliary verb 'is' has the highest number of frequency which occurred 776 times in the text. Out of 8191 verbs, 162 have occurred only one time in the textbook. Similarly 185 verbs have occurred twice and 41 verbs have occurred thrice respectively. In the same way, the other verbs have occurred four times, five times and so on. The most frequent 20 verbs which have occurred in the textbook are presented in the following table with their frequency of occurrence.

Table No. 3
Verbs with their Frequency of Occurrence

S.N.	Verbs	Frequency
1	is	776
2	be	671
3	Are	671
4	should	442
5	have	431
6	make	209
7	use	207
8	can	205

9	will	202
10	get	98
11	provide	95
12	develop	93
13	conduct	88
14	create	78
15	conserve	75
16	take	72
17	do	69
18	find	63
19	become	62
20	bring	61

The above table reflects that among the 20 most frequent verbs the auxiliary verb 'is' has the highest number of frequency of occurrence. It has occurred 776 times in the text. Similarly, the verb 'Be' and 'are' have occurred 671 times. Among the verbs, lexical occupied more space than auxiliary in the textbook but the frequency of occurrence of auxiliary is higher than lexical .

The same words such as 'plan', 'list' etc. were found to be used both as nouns as well as verbs.

Present forms, continuous forms, past forms and past participle forms of the verbs are found to be used in the textbook. The past participle forms of the verbs were highly used in comparison to past forms of the verb. The same verb is sometimes used as past form and sometimes as past participle form in the textbook. (The total number of verbs, various forms of the verbs and their frequency of occurrence is presented in appendix II).

3.2.3 Frequency of Occurrence of Adjectives

Altogether 4570 vocabulary items related to adjectives were to be used in the textbook which has covered 9.75% in total. All three degrees of comparison of adjectives were found to be used in the textbook, however positive degrees of adjectives were most highly used in the textbook (See Appendix III).

The adjective ‘natural’ has the highest number of frequency. It has occurred 140 times in the textbook. Among the 557 adjectives, 133 have been used only one time in the textbook. Similarly 73 adjectives have been used twice and 51 adjectives have been occurred thrice in the textbook. In the same way, the other adjectives have occurred four times, five times and so on. The 20 adjectives with high frequency of occurrence are presented in the following table with their frequency of occurrence:

Table no. 4
Adjectives with their Frequency of Occurrence

S.N.	Adjectives	Frequency
1	natural	140
2	Social	107
3	following	103
4	available	86
5	economics	85
6	cultural	84
7	due	81
8	physical	76
9	important	74
10	different	74
11	living	68
12	sustainable	65
13	basic	64
14	standard	59

15	local	57
16	major	55
17	appropriate	51
18	negative	51
19	environmental	48
20	good	48

From the above table, it becomes obvious that the adjective ‘natural’ has the highest number of frequency of occurrence. It has occurred 140 times in the text. Similarly, the other two adjectives with high frequency of occurrence are 'social' and 'following', they have occurred ‘107’ and ‘103’ times respectively. The same word is sometime used as a verb and sometimes as a adjective. e.g. organized.

3.2.4 Frequency of Occurrence of Adverbs

Altogether 1619 adverbs were found to be used in the textbook, which has covered 3.45% in total .The negative particle ‘not’ has the highest number of frequency. It has occurred 235 times in the textbook. Among the 153 adverbs 53 have occurred only once in the textbook. Similarly 20 adverbs have occurred twice and 18 have occurred thrice in the textbook. In the same way, the other adverbs have occurred four times, five times and so on. Twenty adverbs with relatively high frequency of occurrence are presented in the following table:

Table no. 5

Adverbs with their Frequency of Occurrence

S.N.	Adverbs	Frequency
1	Not	235
2	Also	175
3	There	136
4	Therefore	96
5	All	74

6	After	56
7	Only	54
8	Here	44
9	Even	35
10	Thus	32
11	Period	27
12	Similarly	27
13	How	23
14	Since	22
15	Any	20
16	Most	19
17	Enough	17
18	Gradually	16
19	Together	12
20	Physically	12

The above mentioned table shows that the adverb ‘not’ has the highest number of frequency of occurrence. It has occurred 235 times in the textbook. Similarly, the other two adverbs which have highly occurred in the text are ‘also’ and ‘there’. ‘Also’ has occurred 175 times and ‘there’ 136 times in the textbook. (For all adverbs and their frequency of occurrence see Appendix IV)

3.2.5 Pronouns with their Frequency of Occurrence

Altogether 2339 vocabulary items belonging to pronouns were found to be used in the textbook. Pronouns found in the textbook are tabulated below with their frequency of occurrence.

Table no. 6
Pronouns with their Frequency of Occurrence

S.N.	Pronouns	Freq.	S.N.	Pronouns	Freq.
1	each	17	21	our	105
2	everybody	01	22	ourselves	03
3	every one	01	23	own	31
4	every where	02	24	them	106
5	he	21	25	themselves	10
6	she	07	26	these	149
7	herself	01	27	they	129
8	him	03	28	who	13
9	himself	04	29	your	66
10	his	26	30	yourself	03
11	her	06	31	us	20
12	I	10	32	those	20
13	it	428	33	anyone	01
14	itself	06	34	anything	02
15	Other	112	35	Such	65
16	others	32	36	All	20
17	What	64	37	You	13
18	Which	57	38	That	22
19	Ours	2	39	Their	273
20	Its	169	40	another	18

The above table shows that the pronoun 'it' has the highest number of frequency. It has occurred 428 times in the textbook. Similarly, the other two pronouns with high frequency of occurrence are 'their' and 'its'. They have occurred 273 and 169 times respectively.

3.2.6 Frequency of the Occurrence of Articles

Both definite (the) and indefinite ('a' and 'an') articles were found to be used in the textbook. Articles with their frequency of occurrence are presented in the table below:

Table no. 7

Articles with their Frequency of Occurrence

S.N.	Articles	Frequency
1	The	3157
2	A	734
3	An	122

The table shows that the definite article ‘the’ has the highest number of frequency then the others. It has occurred 3157 times in the textbook. Indefinite articles ‘a’ and ‘an’ have occurred 734 and 122 times respectively. The greater disparity is also seen in the frequency of occurrence of articles. So, both definite and indefinite articles should be used in a balanced way.

3.2.7 Frequency of the Occurrence of the Conjunctions

Altogether 3108 vocabulary items belonging to conjunctions were found to be used in the textbook. They are presented with their frequency of occurrence in the following table:

Table no. 8

Conjunctions with their Frequency of Occurrence

S.N.	Conjunctions	Freq.	S.N.	Conjunctions	Freq.
1	Although	08	12	so	28
2	And	2148	13	until and unless	01
3	As	308	14	in order to	27
4	Because	33	15	in spite of	01
5	But	49	16	not only- but also	05
6	If	129	17	that	98
7	or	85	18	because of	06
8	than	26	19	whether	03
9	unless	13	20	while	32
10	until	09	21	due to	72
11	whereas	13			

The above table shows that the conjunction 'and' has the highest number of frequency. It has occurred 2148 times in the textbook. The other two most frequent conjunctions are 'as' and 'if'. They have occurred 308 and 129 times respectively.

3.2.8 Frequency of Occurrence of Quantifiers

Eleven different quantifiers were found to be used in the textbook. They are presented with their frequency of occurrence in the following table:

Table no. 9

Quantifiers with their Frequency of Occurrence

S.N.	Quantifiers	Frequency
1	some	112
2	much	09
3	more	49
4	many	34
5	every	23
6	both	21
7	any	73
8	all	20
9	double	01
10	Each	32
11	less	25

The above table shows that the quantifier 'some' has the highest number of frequency of occurrence. It has occurred 112 times in the textbook. Similarly, 'double' has the lowest frequency of occurrence. It has occurred one time in the text.

3.2.9 Frequency of the Occurrence of the Prepositions

Altogether 7120 vocabulary items belonging to prepositions were found to be used in the textbook. Prepositions found in the textbook are tabulated with their frequency of occurrence in the following way:

Table no. 10
Prepositions with their Frequency of Occurrence

S.N.	Preposition	Freq.	S.N.	Preposition	Freq.
1	About	89	21	Into	53
2	Above	35	22	Mid	03
3	According to	59	23	Of	2585
4	Across	01	24	On	267
5	Against	03	25	Out	45
6	Along	05	26	Still	04
7	Among	48	27	Through	62
8	At	116	28	Throughout	02
9	Below	28	29	Towards	24
10	Beside	01	30	Under	15
11	Besides	12	31	Upon	06
12	Beyond	03	32	With	235
13	By	203	33	Within	17
14	Despite	01	34	Without	38
15	Down	06	35	instead of	01
16	Except	03	36	up to	10
17	For	512	37	up	25
18	From	211	38	to	1088
19	In	1248	39	between	40
20	Inside	02			

The above table shows that 7120 vocabulary items related to prepositions are found to be used in the textbook. The preposition 'of' has the highest number of frequency. It has occurred 2586 times in the text. Similarly, other prepositions like 'in', 'to', 'for', 'on', 'with', 'by', 'at' have occurred more than hundred times in the text; they have occurred 1248, 1088, 512, 267, 235, 203 times respectively.

3.2.10 Frequency of the Occurrence of the Interjections

Only two interjections were found to be used in the textbook. They are presented in the following table with their frequency of occurrence:

Table no. 11
Interjections with their Frequency of Occurrence

S.N.	Interjections	Frequency
1	Oh !	01
2	Ha !	01

The table shows that only two interjections are used in the text. Both of them have occurred only one time in the textbook.

3.2.11 Frequency of the Occurrence of the Numerals

Altogether 34 different numerals were found to be used in the textbook. They occurred 288 times in the textbook. They are presented with their frequency of occurrence in the table below:

Table no. 12
Numerals with their Frequency of Occurrence

S.N.	Numerals	Freq.	S.N.	Numerals	Freq.
1	twenty	03	18	once	07
2	twice	01	19	one	89
3	two	23	20	nine	04
4	third	03	21	ninety	01
5	thirty	01	22	ninth	05
6	thousand	05	23	million	10
7	three	19	24	hundred	01
8	tenth	03	25	four	15
9	ten	02	26	fifty	01
10	six	05	27	fifteen	01
11	sixteen	01	28	fifth	01
12	sixth	02	29	eight	03
13	sixty	02	30	eighth	01
14	seven	06	31	lakh	04
15	seventy	01	32	five	25
16	seventy-five	02	33	first	31
17	second	05	34		

The above table shows that both cardinal and ordinal numbers were found to be used in the textbook. The cardinal number 'one' has the highest number of frequency among all the numerals. It has occurred 89 times in the textbook. Similarly, the other two highly frequent numerals are 'five' and 'two'. They have occurred 25 and 23 times respectively.

3.2.12 Frequency of the Occurrence of the Abbreviated Forms

Altogether 175 abbreviated vocabulary items were found to be used in the textbook. They are presented with their frequency of occurrence in the table below:

Table No. 13

Abbreviated Forms with their Frequency of Occurrence

S.N.	Abbreviated forms	Freq.	S.N.	Abbreviated forms	Freq.
1	A.D.	01	19	IUCN	01
2	A.M.	01	20	JEMC	05
3	Ad.	07	21	Ltd.	02
4	ANM	01	22	MCHW	01
5	BCG	05	23	Mr.	01
6	BS	26	24	NPC	01
7	Cm	02	25	UNDP	01
8	CPR	01	26	PF	01
9	DOTS	01	27	Prk	01
10	DPT	03	28	RGP	01
11	Dr.	05	29	RPG	03
12	Etc.	54	30	RS	03
13	FAO	01	31	TB	06
14	FPAN	03	32	TBA	01
15	HIV	01	33	TWA	01
16	AIDS	01	34	UNICEF	02
17	HMG	02	35	WWF	01
18	IMR	09	36	CBS	05

37	TT	01	40	INGOs	03
38	NGOs	03	41	IJNFPA	01
39	SAARC	01	42		

The above table shows that the abbreviated word 'etc.' has the highest number of frequency. It has occurred 54 times in the textbook. Full form of the abbreviated words is not mentioned in the texts which create difficulty for the students to understand.

3.4 Vocabulary Items in Terms of the Level of Difficulty

The researcher used two test items for the grade X students to find out the level of difficulty. The following table presents the result of difficulty in the vocabulary items.

Table no. 14
Vocabulary Items in Terms of the Level of Difficulty

S.N.	Name of Student	Score T ₁	Score T ₂
1	Bishal Shrestha	70	69
2	Pasang Shrestha	65	72
3	Sarmila Ranapal	71	65
4	Lakpa Sherpa	62	55
5	Dorgee Sherpa	65	77
6	Ngima Sherpa	49	45
7	Sarita Bhujel	65	62
8	Sunil Shrestha	55	61
9	Gyalgen Sherpa	66	73
10	Phurba Sherpa	63	62
11	Sunil Gurung	61	63

The above table shows that out of 11 students, 10 have secured above 50% and one student has secured nearly 50. So, the vocabulary items used in the grade ten 'Health, Population and Environment' textbook are according

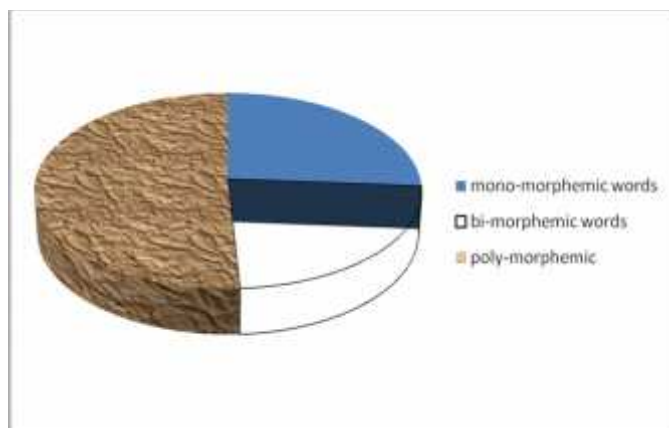

to the level of students. It shows that students are able to comprehend the vocabulary items in the textbook of Health, Population and Environment.

3.5 Analysis of Vocabulary Items in Terms of Morphological Structure

Both mono-morphemic and poly-morphemic words were found to be used in the textbook. More space is occupied by mono-morphemic words. Similarly, inflectional as well as derivational morphemes are used in the textbook. The morphological structures of the words are presented in the following table and pie diagram:

S.N.	Morphological Structure	Frequency	Degree
1	mono-morphemic words	1575	172.45 ⁰
2	bi-morphemic words	1386	151.75 ⁰
3	poly-morphemic	327	35.80 ⁰
Total		3288	360 ⁰

The above table reflects that out of 3288 nouns, verbs, adjectives and adverbs 1567 are mono-morphemic, 1386 are bi-morphemic and 327 are poly-morphemic. The same data can be presented in the given pie-diagram.

CHAPTER-FOUR

FINDINGS AND RECOMMENDATION

4.1 Findings

The aim of the research was to study the vocabulary items used in the Health, Population and Environment textbook for grade X. It is based on parts of speech, frequency, level of difficulty and morphological structure.

On the basis of the analysis and interpretation of the data the researcher has drawn the following findings:

- 1) Altogether 46878 different vocabulary items are used in the textbook.
- 2) a) Presentation of different parts of speech (i.e. word classes) is found in the textbook. Among them the highest numbers of vocabulary items are nouns in the textbook. Out of 46878 vocabulary items 15205 are nouns.
b) Some of the words are used under more than one word classes.
- 3) a) Regarding the frequency of occurrence the article 'the' has highest number of frequency of occurrence. It has occurred 3157 times in the textbook.
b) Both definite and indefinite articles are used in the text.
c) In total 2185 auxiliaries and 6006 lexical verbs are used in the textbook. Among them the auxiliary verb 'is' has the highest number of frequency which occurred 776 times in the textbook.
d) Out of 4570 adjectives, the adjective 'natural' has the highest number of frequency. It has occurred 140 times in the textbook. The positive degree of adjectives is more highly used than the comparative and superlative degrees of adjectives.

e) Both co-ordinating and sub-ordinating conjunctions are found to be used in the textbook. The conjunction 'and' has the highest number of frequency.

f) Both cardinal and ordinal numbers are found to have been used in the textbook. The cardinal number 'one' has the highest number of frequency.

g) The abbreviated form 'BS' has the highest number of frequency of occurrence.

4) Out of the 11 students, 9 have scored above 60%, one student has scored above 50% and one has scored below 50% to write the meaning of the difficult words. It shows that the vocabulary items used in the textbook are suitable according to the level of students. But some of the words are very difficult for them. Such as: septet, handlooms, etc

5) a) Both mono-morphemic and poly-morphemic words are found to be used in the textbook. Mono-morphemic words have covered 47.35 percentages of total nouns, verbs, adjectives and adverbs. Similarly, poly-morphemic words have occurred 52.65 percentages.

b) Both inflectional as well as derivational affixes are used in the textbook.

4.2 Recommendations

On the basis of the findings from the analysis and interpretation of data, the following recommendations have been made:

1) Single words may have various meanings, so students cannot identify the appropriate word meaning in a particular context. So it would be better if the difficult vocabulary items listed at the end of the text with appropriate meaning under the section of Glossary.

- 2) Some of the words are very difficult for the students to comprehend. Even the researcher himself suffered from the same problem. Thus, simple words should be kept in place of those difficult words. e. g. Septet, Handlooms, etc.
- 3) Both derivational as well as inflectional morphemes are used in the vocabulary items. But the derivational morphemes create difficulty to understand the meaning of the words. Thus, morphemes, their meanings and uses should be kept in school level English curriculum with enough examples.
- 4) The same words are used under more than one word classes which create difficulty to manipulate the words in an appropriate syntactic construction. Thus, enough examples should be kept in school level English curriculum.
- 5) Some of the abbreviated forms are presented without their full forms which create difficulty in understanding. So full forms of the abbreviated ones should be mentioned.
