ACKNOWLEDGEMENTS

This dissertation has been prepared for the fulfillment of Master's Degree in Sociology. For the preparation of the dissertation Magars of Kotdarbar VDC, Tanahun, were selected. I have tried to my best to explore socio-cultural and health awareness conditions towards communicable diseases of this disadvantaged indigenous ethnic community.

It was my greatest fortune to have a privilege to work under my thesis supervisor, Mr. Janardan Thapa, Teaching Assistant, Prithvi Narayan Campus, Pokhara. Without his constant and expert guidance and untiring inspiration, my study would not have come into being. I am also grateful to Dr. Bishowkalyan Parajuli, Head of the Department Sociology and Anthropology, Prithvi Narayan Campus, Pokhara for his invaluable suggestions and encouragement.

I am extremely grateful to the Magars of the Kotdarbar VDC of Tanahun district who shared with me their knowledge and experiences without any hesitation. My special thanks to key informants who gave me direction, Indra Bahadur Ale, Tank Bahadur Thapa, Shreenarayan Thapa, Shree Maya Thapa (Ale), Pashupati Thapa, Lal Bahadur Ale who helped me during my field visit in the study area.

I am deeply indebted to Indra Bahadur Ale, Lecturer of Satyawati Higher Secondary School, Damauli, Suryabhakta Sigdel, Teaching Assistant of Prithvi Narayan Campus, Resham Thapa, Bir Bahadur Ale (Indian Army, Keshavtar-5), Yam Bahadur Thapa (Saru), Lok Bahadur Thapa, Bhima Ale, Ramkumari Ale, Bishnu Sinjali, Sister Sabita Thapa, Brother in-law Bamdev Thapa and Niece Geeta Thapa who helped me giving invaluable suggestions. I owe a great debt to my life partner Shree Maya (Ale) for her encouragement and emotional support when I was in distress.

Finally, I would like to thank my parents Rishi Ram Thapa and Chauri Maya Thapa and all other members of my family, my friends and relatives for their constant encouragement and emotional support for completing this work.
