CHAPTER-ONE

INTRODUCTION

1.1 General Background

Language is the most highly developed and frequently used means of communication that is shared and utilized in terms of common understanding by a particular community. In its countable form, it refers to the actual systems of sounds, word structures and the totality of such means of communication of a particular community. It is a social phenomenon which is a widely used means of communication through which people exchange their thoughts, feelings, desires, emotions, wants and so on. Though there are other means or systems of communication like tactile system, gustatory, system, olfactory system etc, language is the most developed means of communication among all.

There are a number of languages spoken throughout the whole world. Among all, the English language deserves to be regarded as the link language in the international level. It is common means of communication between the people of different linguistic backgrounds. English has occupied the space of the basic need of anyone who wants to keep in touch with the present world.

The English language has been the dominant and the key language to face challenges on various areas. Moreover, it has been the language of mass media, official instructions and international diplomacy. It is a language of politics, science and technology, economics medicine, marketing etc. It is, thus, obvious that English has earned a lot of fame, name and popularity in the world. So the sound knowledge of English language is a must for the development of our career.

Certainly, it is very difficult to learn a second language. It needs a long time and arduous effort to have mastery over all the levels of language successfully. The levels of language are phonological, morphological, syntactic and semantic. Of them, phonology and morphology are the most important levels because these are the starting points from which a language learner begins his/her journey of learning.

A second/foreign language learner has to master an adequate number of vocabulary items without which the effort to communicate either in spoken or written form of it will be meaningless. If the language structures make up the skeleton of language, then it is vocabulary that provides the vital organs and flesh of it (Harmer, 1998). So it is necessary to fill the granary of vocabulary and use them to convey the message meaningfully.

English has significant value in the education system of most of the countries in the world. The government of Nepal, too, has introduced the English language as a compulsory subject from grade one to the Bachelor Level. In this connection, CDC (2005) states, "There has been an increasing demand for English to start at the beginning of primary education". To meet the demand, the then His Majesty's Government decided to introduce English as a subject from grade one, starting in the academic year 2060 BS (2003 A.D.). Before that English was used to be taught from grade four only. The present book *My English Book IV* was revised in 2006 with the motto of making education purposeful, relevant and functional.

1.2 Levels of Language

Level is defined as "a general term in linguistics to refer to a major dimension of structural organization held to be susceptible of independent study. Phonology, grammar and semantics are the most widely recognized levels of analysis. But most often phonetics is distinguished from phonology, lexis from semantics and morphology and syntax are seen as separate levels within grammar" (Crystal 1985:77).

In grammar, the term 'level' refers to a layer of word-level, phrase-level, clause-level etc. Some scholars, for example, Stageberg, are in favour of including only three levels of structure. He says, 'a descriptive structural grammar of English progresses upward through three levels of structure; phonology, morphology and syntax'.

According to Katamba (1993:4), there are four levels of language, which are often called linguistic levels. They are phonological, morphological, syntactic and semantic levels which can be presented hierarchically in the following diagram:

Semantic Level deals with meaning

Syntactic Level deals with sentence structures

Morphological Level deals with word structure

Phonology (phonemics) deals with sound system.

(Katamba 1993:4)

The above mentioned levels of language are put in a hierarchical order with semantic at the top and phonology at the bottom. Each of these levels is to be found equally interrelated when language is to give some meaning. Each level of analysis of language can be described in the following paragraphs.

1.2.1 Phonology

This level of language studies how speech sound are structured or patterned in a particular language. Besides, it describes contrastive relationship of the phonemes of a language, their distribution and articulatory features of their allophones.

John Lyons says, "Phonology, then, is the level of which the linguist describes the sound-system of a particular language" (1970:21).

Within phonology, two branches of study are usually recognized: segmental and supra segmental phonology.

Segmental phonology analyses speech sounds into discrete segments as phonemes and supra segmental phonology analyses those features which extend over more than one segments, as intonation, pitch, rhythm, stress etc.

1.2.2 Morphology

Morphology is the study of internal structure of words or morphemes. It includes the stock of segmental morphemes and the ways in which words are built out of them (Hockett, 1970:177).

Thus, this level of language studies the internal structure of morphemes, words, their function and formation.

According to Crystal (1996:249), morphology is "the branch of grammar which studies the structures or forms of words." It deals with the internal structure of words such things as inflection for number, gender, case, tense, aspect etc. and derivation to form new words. It studies, for example, how the forms 'shout', 'shouted', 'shouting' and 'shouts' differ from another and how the forms 'goodness', 'encouraged', 'quickly', etc. are derived from the forms good, courage and quick respectively.

1.2.3 Syntactic Level

This level of language deals with the sentence structure. This level is the study of sentence building of the ways in which words are arranged together to form larger units of language, viz. phrases, clauses and sentences. Thus, we can say that this level of language is the science of sentence construction.

1.2.4 Semantic Level

In this level of language, we study the meaning of linguistic forms. It tells us, for example, that sense relationship between the words 'tiny' and 'very small', 'beautiful' and 'ugly' under the headings 'synonymy' and 'antonymy' respectively.

Leach, in this regard, says, "Semantics (as the study of meaning) is central to the study of communication; and as communication becomes more and more a crucial factor in social organization, the need to understand it becomes more and more pressing. Semantics is also at the centre of the study of human mind- thought processes, cognition conceptualization- all these are intricately bound of with the way in which we classify and convey our experience of the world through language" (1985:ix).

1.3 Defining Vocabulary

Vocabulary, broadly speaking, refers to the words that we use in our day to day life for expressing our thoughts, feelings, desires, emotions etc. A word plays the most important role while communicating. So it is the most important unit of language. No one can express his/her feelings meaningfully if he/she knows only language structure but does not have adequate knowledge of vocabulary. So, to communicate effectively in a foreign language, the knowledge of vocabulary plays a very important role as it provides vital organs and flesh on the structure of language. The term 'Vocabulary' has been defined differently by linguists in different books. Some of the definitions are listed below:

According to Richards et al. (1985:307) vocabulary refers to "a set of lexemes, including single words, compound words and idioms."

Similarly, Cambridge International Dictionary of English (1995:1628) defines vocabulary as "all the words used by a particular person or all the words which exits in a particular language or subject."

In the same way, Harmer (1991:153) defines, "if language structure makes up the skeleton of language then it is vocabulary that provides the vital organs and the flesh."

In the same way, Hornby (1998:1331), has defined the term vocabulary as "all the words known to a person or used in a particular book, subject etc". The meaning of vocabulary is also given as "the total number of words in a language."

Celce-Murcia and Larsen-Freeman (1983:29) say, "we take a considerably broader view of the lexicon, we consider it to comprise not only single words but also word compounds and conventionalized multiword forms".

Thus, a single word or group of words which convey a single meaning is called vocabulary.

It is such a vital aspect of language without which communication remains impossible. The knowledge of language structure becomes handicapped if one does not possess the granary of crops i.e. vocabulary. So a good store of vocabulary is crucial for understanding all language and communicating in it. People have a sense in which learning a foreign language is basically a matter of learning the vocabulary of that language. So there is a great requirement of systematic analysis and evaluation of the vocabulary.

1.4 Word Classes

Traditional grammarians have classified words into eight different 'parts of speech'. They are nouns, verbs, adjectives, adverbs, pronouns, prepositions, conjunctions and interjections. Nesfield (1965:8), defines these parts of speech as follows:

- i. "A noun is a word used for naming person or thing".
- ii. "A pronoun is a word used instead of a noun or noun equivalent".
- iii. "An adjective is a word used to qualify a noun or pronoun".
- iv. "An adverb is a word used to add something to meaning of a verb, an adjective or another adverb."
- v. "A verb is a word used for saying something about some persons or things."
- vi. "A Preposition is a word used with a noun or a pronoun to show how the person or thing denoted by the noun or previous stands in relation to something else."
- vii. "A conjunction is a word used to join words or sentences".
- viii. "An interjection is a word used to express some sudden feeling".

These definitions given by traditional grammarians are notional and extremely vague. It is very difficult to judge from these definitions whether a particular word is a noun, a verb or an adjective. In the same way, articles (a, an, the), possessives (his, her, their, your, my, our) demonstratives (this, that, these, those) and quantifiers (all, some, neither etc) are traditionally included in adjective but they are different from most adjectives in the sense that, firstly, that precede adjective in sentences; secondly, most of them are never used predicatively; and lastly they have no comparative and superlative forms.

Arts and Arts (1986:22) has classified words into two major types: major and minor word classes. The former are also called open classes: their membership is unrestricted and indefinitely large since they allow the addition of new members. The latter classes are also called closed classes. Their membership is restricted since they do not allow the creation of new members. Besides, the number of items they comprise is so small that they can easily be listed. In English nouns, verbs, adjectives and adverbs are included under major word class and conjunctions, articles, pronouns, interjection etc. under minor under class.

Similarly, words can broadly be categorized into two types: content and structural words which are also called lexical or full words and functional words respectively. The former (content words) type is defined as the words which have stable lexical meaning. They are words that have meanings by themselves. Content words include mainly nouns, verbs, adjectives and adverbs. Structural or functional words, on the other hand, have no meanings of their own. They are used in utterances or sentences to show grammatical relationship. So they are also called grammatical or empty or function words. Structural words include auxiliaries, prepositions, articles, conjunctions, pronouns etc. Each type of content words are described individually in the following lines.

I) Nouns

Words are identifiable as noun on the basis of their syntactic and morphological properties. Adams (1973:17) says, "Among the features that we expect of nouns are: the ability to take the plural and genetic inflection, to take certain characteristics suffixes like -er, -ance, -ness, -ism, -ion etc., to be preceded by determiners like a, the, this, my, another, to follow the prepositions to all as the subject or the object of a sentence."

Typical derivational suffices that form such noun are:

- age : coverage, percentage, postage

- ance : appearance, utterance, reluctance etc.

- ation : confirmation, derivation, reservation etc.

- dom: freedom, boredom, kingdom etc.

- ment : development, enjoyment, movement etc.

- ist : specialist, feminist, educationist etc.

- ism : idealism, organism, socialism etc.

- hood: childhood, boyhood, brotherhood etc.

- ess: actress, mistress etc.

- er : farmer, soldier, teacher etc.

- ence : difference, preference, reference etc.

- ee : examinee, interviewee, employee etc.

II) Verb

The class of verb has a specific function in a sentence. It is such an element which is used as the minimal predicate of a sentence, co-occurring with a subject e.g., the students study, the fish swim etc. In this regard, Adams (1973:21) states, "We may say that verbs are typically associated with reference to time, with activity and changing conditions".

The typical derivational suffixes that form such verbs are listed below.

- en : soften, lengthen, blacken etc.

- ify: amplify, codify, simplify etc.

- ise/-ize : legalize, modernize, symbolize etc.

III) Adjective

Adjectives can occur within a noun phrase as its constituent. Adams (1973:17) in this regard, says, "Adjectives are identified by such characteristic features as the ability to assume comparative and superlative forms, to be preceded by adverbs of degree, like *very*"

Some typical derivational suffixes of adjectives are listed below.

- able/ible : eatable, visible, visible, workable, learnable

- al : normal, functional, derivational etc.

- ic/ical: economical, historical etc.

- ish : childish, foolish, greenish etc.

- ive : passive, effective, negative etc.

- less: aimless, hopeless, shameless etc.

- ous : continuous, courageous, dangerous, furious etc.

- y : sleepy, greedy, dirty etc.

IV) Adverb

An adverb has two major functions. It has the function to serve as a constituent in the structure of a sentence, and to serve as a modifier of the head in an adjective phrase or as adverb phrase. As constituents of sentences, adverbs function as adverbials expressing such meanings as the time, place, manner, frequency and degree of the verbal action. For example:

She goes to school *everyday*. (time)

Ram is playing on the ground. (place)

My teacher *always* suggests me. (frequency)

Mr. Jha completed his work *successfully*. (manner)

I like small children *very much*. (degree)

The typical derivational suffixes of adverb are given below.

- ly: bravely, successfully, badly etc.

- wards: towards, backwards, forwards

- wise: likewise, otherwise, levelwise etc.

1.5 Literature Review

In spite of the great significance of vocabulary items (content words), very few research studies have been carried out on vocabulary analysis and some of the studies are done related to textbook analysis and vocabulary achievement in the Department of English Education. Some of the studies which are more or less related to this study can be observed as follows:

Chudal (1997) has, in his M.Ed. thesis, studied English vocabulary achievement of the students of Grade Six with the objectives of making comparisons of vocabulary achievement. And findings of the study are stated descriptively. The study has found that the students' English vocabulary achievement was poor in total. However, the boys' vocabulary achievement was better in comparison to the girls. Similarly, the students from urban areas were better than the students from the rural areas.

Khatri (2000) has carried out a study on English vocabulary (nouns and verbs) achievement of the students of Grade Eight. The objective of his research study was to investigate the achievement of English vocabulary of the students of Grade Eight. The study has found that the students' achievement of nouns and verbs were 67.9 percentage and 59 percentage respectively.

Similarly, Tiwari (2001) has studied the achievement of English vocabulary by the students of Grade Ten. His study has shown that 43 percent of vocabulary items were quite difficult for the students of that level. Fifty two percent of the total students were below average.

Tiwari, H.P. (2004) has analyzed the vocabulary items used in My Primary English Book for Grade Four. Five hundred and forty six different vocabulary items were found to be used and the auxiliary verb 'is' occurred 467 times in the textbook.

Kattel (2005) has, carried out his M.Ed. thesis entitled "A Study on the Vocabulary Items Used in the New English Textbook for Grade Three" with the objective of analyzing vocabulary items used in English textbook for grade three. It was found that 693 different vocabulary items were used in the textbook. Among different parts of speech, 314 different nouns were

found to be used. Thus, the nouns occupied the highest number of vocabulary items and conjunctions were found to be used least in number. Only six conjunctions were found in the textbook.

Although some researches have already been carried on vocabulary achievement, textbook analysis and vocabulary analysis, no one has yet done a research on the analysis of content words used in My English Book (2006) for grade IV. Though Tiwari, H.P. (2004) carried out a research on the analysis of vocabulary items used in the English textbook for class IV, the very textbook was revised in 2006 with the different name and different vocabulary items. The book on which Tiwari carried out his research is not in use in the present curriculum of the same grade. So, the findings of his research are no longer in use and beneficial for the present textbook 'My English Book for Class IV'. And no one has yet carried out a research on the study of vocabulary items used in My English Book IV. So, the researcher attempted to carry out a research on this new topic.

Similarly, this research is different from Kattel's research in the sense that he has carried out his research work on the study of vocabulary items used in the English textbook for class III including both major and minor word class vocabulary items.

1.6 Objectives of the Study

This study was done with the following objectives.

- a) To study vocabulary items of only major word class i.e. content words (noun, verb, adverb and adjectives) used in My English Book for class Four in terms of :
 - Total number
 - Parts of speech

- Frequency of occurrence
- Phonological structure
- Morphological structure
- b) To enlist some pedagogical implications.

1.7 Significance of the Study

Vocabulary provides the vital organs and flesh to the structures of language. It includes the use of single words, compounds words, idioms and phrases and the meaning in written and oral communication. So, the researcher hopes for the following significances of the study:

- i. This study will be significant to all those who are interested in analyzing vocabulary items of major word class.
- ii. It will be equally useful to the textbook writers for selecting the vocabulary items to frame the English textbook for the very grade.
- iii. This study will be beneficial to the primary school English teachers.
- iv. This study will be equally benefited to the primary level students.
- v. It will be beneficial to the teacher trainers, curriculum designers etc.
- vi. This study will act as a guide for further study on vocabulary analysis.

1.8 Definition of Specific Terms

Affix: A morpheme which only occurs when attached to some other morpheme or morphemes such as root, stem or base.

Complex Words: Polymorphemic vocabulary items with a root and one or more than one derivational affixes.

Compound Words: Polymorphemic words with at least two bases which are both either words, or at any cost, root morphemes.

Consonant Cluster: It refers to the sequence of two or more consonant at the beginning or final position of a syllable.

Frequency: It refers to the recurrence of words.

Lexemes: These are the vocabulary items that are listed in the dictionary.

Major Words: Nouns, verbs, adverbs, adjectives.

Minor Words: Pronouns, prepositions, conjunctions, interjections, determiners etc.

Monomorphemic Words: Words with only one free morpheme.

Monosyllabic Words: Words containing a single syllable.

Morpheme : A minimal unit of grammatical description in the sense that it can not be segmented any further at the grammatical level of analysis.

Parts of Speech : Groups of words which are similar in function in the sentences such as noun, verb, adverb, adjectives etc.

Polymorphemic Words: Words with more than one morpheme i.e. a free morpheme and one or more bound morphemes.

Polysyllabic Words: Words containing more than one syllables.

Root : The irreducible core of a word, which can not be further analyzed without total loss of identity.

Suffix: An affix attached after a root, or stem or base as -es in buses.

Syllabic Contoid: It is the sound [m], [n] and [l] when they form a nucleus of a syllable as in the words rhythm, listen and little respectively.

Syllable : It is a unit of pronunciation typically larger than a single sound and smaller than a word.

Vocabulary: The content words used in My English Book for Grade IV.

Word Forms: Physical manifestations of lexemes.

CHAPTER-TWO

METHODOLOGY

For the accomplishment of the present study, the researcher adopted the following methodology.

2.1 Sources of Data

The research was primarily based on the secondary sources of data.

2.1.1 Secondary Sources of Data

The researcher collected all the vocabulary items related to major word class used in My English Book for Grade Four as the secondary source of data for the study.

Similarly, the researcher consulted and studied various articles, journals, theses, books etc. to support her thesis.

2.2 Tools for Data Collection

The researcher listed all the content words from the book through intensive observation.

2.3 Process of Data Collection

The researcher, while collecting the data, adopted the following procedures:

First of all, the researcher entered all the vocabulary items related to major word class from My English Book for Grade Four in the computer to list them in an alphabetical order, ignoring the vocabulary items under 'Tips to the teacher". Then the total vocabulary items were divided into four different groups as nouns, verbs, adjectives and adverbs according to the parts of speech, with the help of Oxford Advanced Learner's Dictionary (Hornby, 2005) and English Syntactic Structure (Arts and Arts, 1986). While counting the total number of content words, name of persons and places under proper noun were not counted.

Then the researcher divided each item into different groups according to their types eg. noun; proper, common, abstract, material and collective. Then the frequency of each item was counted. While counting the frequency of occurrence of each item, variant forms of the same category were counted as a single lexeme. For instance 'girl' and 'girls' were counted as a single lexeme 'girl'. In the same way, variant forms of the same verb, for example, 'write', 'wrote', 'writing', 'writes' were counted as a single lexeme 'write'. Phrasal verbs were counted as a single lexeme. The auxiliary verbs used in the textbook were not included in the data.

The researcher, then, classified all the vocabulary items into five groups; on the basis of the number of syllable they contain. They were classified into one syllabic, two syllabic, three syllabic, four syllabic and five syllabic words. While counting the number of words on the basis of syllable they consist, the researcher consulted the Oxford Advanced Learner's Dictionary (Hornby, 2005). Similarly, the syllable structures and consonant clusters were also observed.

Then the morphological structures of the vocabulary items were observed in terms of derivational affixes.

The total collected data were tabulated and analyzed and interpreted descriptively using simple statistical tools like percentage and average.

2.4 Limitations of the Study

The study was limited in the following ways:

- i. The study was limited to the vocabulary items of major word class used in My English Book IV, 2006 published by CDC.
- ii. The study was limited to the analysis of the vocabulary items in terms of the total number, parts of speech, frequency of occurrence, phonological structure (syllablewise and clusterwise) and morphological structure.
- iii. The study was limited to the study of morphological structure of words in terms of derivational affixes.

CHAPTER-THREE

ANALYSIS AND INTERPRETATION

The main aim of this research study was to analyze the vocabulary items of major word class: nouns, verbs, adjectives and adverbs used in My English Book for class IV. For that, the researcher, under this heading, has attempted to analyze the collected data (i.e. all the content words). To calculate the total number of content words, first of all, all such words were grouped together. Then they were divided into four different groups as nouns, verbs, adverbs, adjectives and then analyzed them in terms of the following variables:

- i. Total number
- ii. Parts of speech
- iii. Frequency of occurrence
- iv. Phonological structure
- v. Morphological structure

3.1 Analysis of Vocabulary Items in terms of Total Number

Altogether 943 variant forms of the content words were found to be used in the textbook (See Appendix-I). The total number of them found in the textbook is presented in the following table:

Table No. 1

Total Number of Vocabulary Items According to their Number and Percentage

S.N.	Vocabulary Items	No. of Words	Percentage
1.	Noun	495	52.49
2.	Verb	275	29.17
3.	Adjective	127	13.47
4.	Adverb	46	4.88
	Total	943	100

The above table shows that the highest number of words found in the text is *noun* category. Out of 943 variant forms of content words used in the textbook, 495 (52.49%) are nouns, only 46 (4.88%) are adverbs. In the same way, 275 (29.17%) and 127 (13.47%) verbs and adjectives were found to be used respectively in the textbook.

3.2 Analysis of Vocabulary Items in terms of Parts of Speech

Altogether 683 different lexemes belonging to four different word classes were found to be used in the book (See Appendix II). The number of vocabulary items under different parts of speech can be presented in the following table :

Table No. 2

Number and the Percentage of the Vocabulary Items According to Parts of Speech

S.N.	Vocabulary Items	No. of Words	Percentage
1.	Noun	322	47.14
2.	Verb	204	29.87
3.	Adjective	111	16.26
4.	Adverb	46	6.73
	Total	683	100

The above table shows that among four types of vocabulary items according to the parts of speech, the highest number of vocabulary items were nouns and the lowest number were adverbs. Out of 683 total vocabulary items (lexemes), 322 (47.14%) were nouns and only 46 (6.73%) were adverbs. Similarly, 204 (29.87%) verbs and 111 (16.26%) adjectives were found to be used in the textbook.

3.3 Analysis of Vocabulary Items in terms of Frequency of Occurrence

The collected data were analyzed in terms of frequency of occurrence under the following sub headings:

3.3.1 Frequency of the Word Forms

While counting the frequency of occurrence of content words used in the textbook, all content or major word classes were categorized into four different groups which are analyzed under the following sub headings:

3.3.1.1 Frequency of Occurrence of the Nouns

Altogether 322 vocabulary items belonging to the category of noun were found to be used in the textbook. The following table presents nouns with their type and frequency of occurrence.

Table No. 3

Nouns with their Frequency of Occurrence

S.N.	Nouns	Sing.	Plu.	Freq.
1.	action	-	1	1
2.	alphabet	1	-	1
3.	animal	1	1	2
4.	article	-	-	1
5.	baby	4	-	4
6.	balloon	1	-	1
7.	bathroom	1	-	1
8.	bat	-	1	1
9.	beak	-	1	1
10.	bed	6	-	6
11.	bee	-	3	3
12.	bench	2	1	3
13.	bird	8	3	11
14.	birthday	2	-	2
15.	body	2	-	2
16.	book	3	2	5
17.	bowl	1	-	1
18.	box	4	1	5
19.	boy	11	9	20
20.	basket	-	2	2
21.	branch	1	-	1
22.	bridge	3	-	3
23.	brother	1	2	3

24.	bush	1	-	1
25.	butcher	1	-	1
26.	firework	1	-	1
27.	cage	-	1	1
28.	calf	5	-	5
29.	capital	4	-	4
30.	cat	3	1	4
31.	chant	11	-	11
32.	chicken	-	1	1
33.	child	-	17	17
34.	chocolate	-	2	2
35.	cinema	-	3	3
36.	classroom	-	2	2
37.	coat	1	-	4
38.	colour	1	3	4
39.	comb	1	-	1
40.	consonant	1	-	1
41.	copy	3	-	3
42.	cow	6	3	9
43.	crocodile	-	1	1
44.	crop	-	1	1
45.	day	36	5	41
46.	degree	-	1	1
47.	desert	1	-	1
48.	dish	1	-	1
49.	district	1	-	1
50.	doctor	1	-	1
52.	doll	1	5	6
53.	door	1	-	1
54.	dress	8	-	8
55.	egg	-	1	1
56.	evening	1	-	1

57.	avant		1	1
	event	-		
58.	example	5	2	7
59.	exercise	1	-	1
60.	eye	-	2	2
61.	face	4	-	4
62.	farmer	4	1	5
63.	father	3	-	3
64.	foot	-	2	2
65.	fellow	1	-	1
66.	female	-	1	1
67.	festival	-	4	4
68.	field	3	-	3
69.	film	-	1	1
70.	finger	3	-	3

Note: Nos. 1-221, Nos. 222-285, Nos. 286-293, Nos. 294-299 and Nos. 300-322 represent common nouns, proper nouns, collective nouns, material nouns and abstract nouns respectively.

From the above table, it becomes obvious that total 322 different nouns were found to be used in the textbook. Out of 322 nouns, 221 (68.63%), 64 (19.87%), 8 (2.48%), 6 (1.86%) and 23 (7.14%) are common nouns, proper nouns, collective nouns, material nouns and abstract nouns respectively.

Some of the compound nouns e.g. bathroom, birthday, girlfriend, icecream, motorbike, riverside, toothpaste, blackboard, basketball, classroom, landlord, pair work etc. are found to be used in the text.

Out of total 322 nouns, 82 (25.47%) are used in their singular forms only, 100 (31.06%) in plural forms only and 40 (12.42%) are used both in singular and plural forms.

Some of the nouns like milk, colour, copy, mistake, park, ship, sound etc. have been used both as nouns and verbs in the textbook. As a noun they are used 1, 1, 3, 2, 1, 1 and 2 times respectively in the textbook.

3.3.1.2 Verbs with their Frequency of Occurrence

Altogether 204 vocabulary items related to the category of verb (i.e. lexical verbs and phrasal verbs) were found to be used in the textbook. Verbs with their frequency of occurrence can be presented in the following table:

Table No. 4

Verbs with their Frequency of Occurrence

S.N.	Verbs	\mathbf{V}_1	\mathbf{V}_2	V_3	\mathbf{V}_4	V_5	Freq.
1.	achieve	1	-	-	-	-	1
2.	act	4	-	-	-	-	4
3.	allow	-	1	-	-	-	1
4.	answer	35	-	-	-	3	38
5.	argue	-	2	-	-	-	2
6.	ask	3	1	-	-	2	6
7.	attack	1	-	-	-	-	1
8.	attempt	5	-	-	-	-	5
9.	bathe	1	-	-	-	-	1
10.	bear	-	-	-	-	1	1
11.	beat	2	-	-	-	-	2

196.	keep on	-	1	-	-	1	1
197.	listen to	10	-	-	-	-	10
198.	look like	9	-	-	-	-	9
199.	put on	2	-	-	-	1	2
200.	put up	1	-	-	-	1	1
201.	set by	1	-	-	-	-	1
202.	set on	1	-	-	_	_	1
203.	sit down	1	-	-	-	-	1
204.	stand up	1	-	-	-	-	1

Note: Nos. 1-131 transitive verbs, Nos. 132-180 intransitive verbs and 181-204 phrasal verbs.

The above table displays that there are 204 verbs found to be used in the textbook. Among them, 180 (88.26%) are lexical verbs and 24 (11.76%) are phrasal verbs. Among 180 lexical verbs, the verb 'say' has the highest frequency of occurrence. It has occurred 84 times in the texts. It has been used for 26, 48 and 10 times in infinitive, simple past and third person singular forms respectively. Out of 204 verbs in total, 82 verbs have been used only once in the text.

Similarly, out of 180 total lexical verbs 131 (72.11%) are transitive and 51 (28.33%) are intransitive and only 24 (11.76%) phrasal verbs are found to be used in the textbook. Among phrasal verbs, the verb phrase 'look at' has the highest frequency of occurrence. It has occurred 14 times in the textbook. Thirteen other phrasal verbs are occurred only once in the text.

From the above facts, we can state that most of the verbs are used many times in their infinitive (V_1) and simple past (V_2) forms but a very few verbs are used in past participle (V_3) , continuous (V_4) and third person singular form (V_5) .

3.3.1.3 Frequency of Occurrence of the Adjectives

One hundred and eleven total number of vocabulary items belonging to adjectives were found to be used in the textbook. Adjectives found in the textbook are presented with their frequency of occurrence in the following table.

Table No. 5

Adjectives with their Frequency of Occurrence

S.N.	Adjectives	Pos.	Com.	Sup.	Freq.
1.	afraid	1	-	-	1
2.	alone	1	-	-	1
3.	black	1	-	-	1
4.	meaningful	1	-	-	1
5.	nice	3	-	-	3
6.	noisy	1	-	-	1
7.	old	1	-	-	1
8.	opposite	3	-	-	3
9.	powerful	1	-	-	1
10.	ready	3	-	-	3

11.	red	2	-	-	2
12.	right	6	-	-	6
13.	rough	1	-	_	1
14.	sad	8	-	-	8
15.	same	1	-	-	1
16.	short	12	1	1	14
17.	sick	1	-	-	1
18.	similar	12	-	-	12
19.	slippery	1	-	-	1
20.	slow	-	1	-	1
21.	exciting	1	-	-	1

74.	great	7	-	-	7
L	1	I	L	I	L

75.	green	4	-	-	4
76.	happy	6	-	-	6
77.	hard	4	-	-	4
78.	high	7	-	-	7
79.	hungry	1	-	-	1
80.	intelligent	5	-	-	5
81.	large	3	1	7	11
82.	long	15	-	-	15
83.	lovely	5	-	-	5
84.	quarter	2	-	-	2
85.	half	1	-	-	1
86.	little	16	-	-	16
87.	many	11	-	-	11
88.	whole	3	-	-	3
89.	this	11	-	-	11
90.	that	15	-	-	15
91.	these	5	-	-	5
92.	those	1	-	-	1
93.	eight	4	-	-	4
94.	eleven	3	-	-	3
95.	five	7	-	-	7
96.	forty four	1	-	-	1
97.	four	9	-	-	9
98.	fourteen	1	-	-	1
99.	seven	1	-	-	1
100.	six	13	-	-	13
101.	twenty	2	-	-	2
102.	twenty five	1	-	-	1
103.	twenty two	1	-	-	1
104.	two	14	-	-	14
105.	fifth	4	-	-	4
106.	final	1	-	-	1
	l .	l .	l .		L

107.	first	15	-	-	15
108.	fourth	4	-	-	4
109.	seventh	13	-	-	13
110.	sixth	3	-	-	3
111.	both	2	-	-	2

Note: Nos. 1-83 adjective of Quality, Nos. 84-88 adjective of Quantity, Nos. 89-92 Demonstrative adjective, Nos. 90-111 Numerical adjective.

The above table mirrors that altogether 111 different types of adjectives have been found in the textbook. Among them, 83 (74.77%) are qualitative adjective, 5 (4.50%) are quantitative adjectives, 4 (3.60%) are demonstrative adjectives and 19 (17.13%) are numerical adjectives.

It is obvious from the above table that out of 111 different adjectives, the adjective 'following' has occurred for 33 times in the textbook. So it has the highest frequency of occurrence. Similarly, 41 adjectives have occurred only 1 time i.e. the least frequency of occurrence.

3.3.1.4 Frequency of Occurrence of Adverbs

Forty six vocabulary items belonging to adverbs were found in the textbook. The adverbs with their frequency of occurrence are given in the following table:

Table No. 6
Adverbs with their Frequency of Occurrence

S.N.	Adverb	Freq.
1.	about	18
2.	after	4
3.	yesterday	7
4.	late	1
5.	early	1
6.	before	7
7.	finally	2
8.	when	20
9.	just	2
10.	last	3
11.	next	4
12.	now	4
13.	still	5
14.	o'clock	10
15.	around	1
16.	away	3
17.	down	10
18.	here	6
19.	near	3
20.	out	17
21.	there	7
22.	where	20
23.	always	12
24.	never	23
25.	normally	1
26.	often	12
27.	once	6
28.	again	11
29.	sometimes	12

30.	bravely	1
31.	how	25
32.	loudly	1
33.	luckily	1
34.	quickly	1
35.	quietly	1
36.	slowly	1
37.	steadily	1
38.	tightly	1
39.	well	6
40.	why	9
41.	generally	2
42.	together	2
43.	really	3
44.	SO	10
45.	too	4
46.	also	11

Note: Nos. 1-28 adverb of time, Nos. 29 adverb of frequency, Nos. 30-42 adverb of Manner and 43-46 adverb of Degree.

The above table mirrors that altogether 46 different types of adverbs are found in the textbook. Among them, 28 are adverbs of time; only one is adverb of frequency, 14 are adverbs of manner and rest are adverb of degree.

Among all, 'how' has the highest frequency of occurrence i.e. 25 times in the text. 12 adverbs (26.08%) are used only once i.e. they have the least frequency of occurrence in the textbook.

3.4 Analysis of Vocabulary Items in terms of Phonological Structure

The collected data were analyzed in terms of phonological structure under the following sub headings:

3.4.1 Syllable

In terms of syllable, the data were analyzed under the following sub headings:

3.4.1.1 On the basis of the Number

On the basis of number of syllables contained in the words, they are classified into five groups: monosyllabic, disyllabic, tri-syllabic, tetrasyllabic and penta-syllabic. Number and percentage of the words according to their number of syllables can be presented in the following table:

Table No. 7

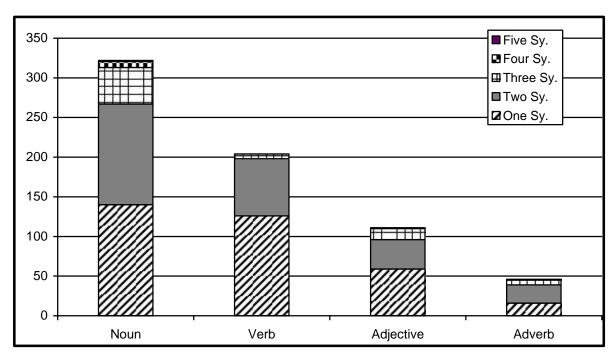

Number and Percentage of the Words according to the Number of Syllables

S.N.	No. of Syllables	No. of Words	Percentage
1.	One Syllable	380	55.64
2.	Two Syllables	220	32.21
3.	Tree Syllables	72	10.54
4.	Four Syllables	10	1.46
5.	Five Syllables	1	0.15
	Total	683	100

The above table mirrors that out of 683 total vocabulary items, 380 (55.64%) words are monosyllabic (i.e. having only one syllable), 220 (32.21%) disyllabic (i.e. having two syllables), 72 (10.54% are tri-syllabic (i.e. having three syllables), 10 are tetra-syllabic (i.e. having four syllables) and only 1 (0.15%) is penta-syllabic (i.e. having five syllables).

Out of 322 nouns used in the textbook, 140, 127, 46, 8 and 1 are mono syllabic, disyllabic, tri syllabic, tetra syllabic and penta syllabic respectively. In the same way, out of total 204 verbs, 126, 72 and 6 are mono syllabic, disyllabic and tri syllabic respectively. Likewise, among 111 total adjectives, 59, 37, 14 and 1 are mono syllabic, disyllabic, tri syllabic and tetra syllabic respectively. Similarly, out of 46 total adverbs used in the text book, 16, 23, 6 and 1 are mono syllabic, disyllabic, tri syllabic and tetra syllabic respectively. This data can be presented in the following bar diagram.

Figure No. 1
Bar Diagram Showing the Number of Syllables of the Words

There is only one word having five syllables i.e. vocabulary (vo-ca-bu-la-ry). It shows that the concept of one syllabic, two syllabic, three syllabic, four syllabic and five syllabic words are given but there is not proportional distribution of words in terms of syllables. Emphasis is given on monosyllabic and disyllabic words. It may be because it will be very difficult for the beginners of foreign language to pronounce the words with lots of syllables. Though some of the words of four syllables and only one word of five syllables are found to be used in the textbook.

3.4.2 On the basis of Syllable Structure of the Words

The structure of the syllable (i.e. canonical shape) can be represented by syllabic pattern in terms of consonant and vowel sound segments. Syllable structures of the words found in the textbook are presented with examples as follows: (See Appendix IV).

Syllable Structure	Examples	Syllable Structures	Examples
CV	say	CVCCC	comment
CV (C)	mar	CVCC <u>C</u>	temple
CVC	bad	CVCCV	birthday
CVCC	found	CVCCVCC	festival
CVC <u>C</u>	final	CVCVCV	tomato
CVCCCVC	children	CVCVC	morning
CVCV (C)	butcher	CVCVCVCC	chocolates
CVCVCVC	capital	CVCCVCVCC	consonant
CVCVCCC	servants	CVCCVCCC	conversations
CVCCVCCVC	contracted	CVCV(C)CVC	motorbike
CVCVCV (C)	similar	CVCCCVVC	punctuate
CVCVCCVCVCV	vocabulary	CVCCCVVC <u>C</u>	punctuation
CVCCV (C)	danger	CVCCVCVC	dangerous
CVCVV	video	CVCCVCV	yesterday
CVCCVC	national	CVCCCVCC	district
CVCVCVCV	generally	CVCVCCV (C)	behaviour
CVCVCCVC	paragraph	CVCVCCVCVC	celebrated
CVCVCC <u>C</u>	meaningful	CVVCVCC	rearrange
CCV	blue	CCVC	black
CCVCC	frogs	CCVCCC	climbed
CCVCVCC	crickets	CCVCCV	quickly

CCVCCVC	drinking	CCVC <u>C</u>	trouble
CCVCCCV	grandma	CCVCV	Friday
CCVCVC	writing	CCCVCVC	squirmy
CCVCV (C)	brother	CCVCVCV (C)	clever
CCVCVCVCC	crocodiles	CCVV (C)	player
CVVC	vowel	CCVCCVC	statement
CCV(C)	floor	CCCVCCV(C)	stranger
CCCVCCVC	strangers	CCCVCCVCC	strongest
CCCVCCC	student	CCVCVCV	slippery
VC	earn	VC <u>C</u>	apple
VCV	agree	VCV(C)	order
VCVC	about	VCCV(C)	after
VCCC	asked	VCC <u>C</u>	uncle
VCC <u>C</u> C	actions	VCCCVC	English
VCCCV	angry	VCCV	ogre
VCCVC	afraid	VCVCCC	elephant
VCVCC <u>C</u>	example	VCVCVC	animal
VCVCVCC	animals	VCVCC <u>C</u> C	examples
VCVCCC	elephants	VCCVCV	unhappy
VCVCCCVCV	apostrophe	VCCCVCVC <u>C</u>	exclamation
CCCVCVC	stretches	VCCVCCVCC	understand
VCCVC <u>C</u>	article		

Note: 1. \underline{C} is a syllabic contoid that functions as a nucleus of a syllable.

- $2. \ (C) \ denotes \ the \ optional \ consonant \ in \ a \ syllable \ structure.$
- 3. Syllable structure of the compound words and phrasal verbs are not included in the list.

The above list shows that 87 different syllable structures of the words are found in the textbook.

3.4.3 Consonant Cluster

In terms of consonant clusters, the data was analyzed under the following sub headings :

i. Consonant Clusters in Initial Position

Two or three consonants in sequence are found to be used at the beginning of the words which are presented below:

A. Initial Consonant Clusters: Two consonants

Initial consonant clusters with two consonants found in the textbook are presented below:

/pl/	as	in	play	/sk/	as	in	scarf
/bl/	as	in	blue	/sl/	as	in	sleep
/kr/	as	in	cry	/sm/	as	in	small
/dr/	as	in	draw	/sn/	as	in	snake
/fl/	as	in	flew	/sp/	as	in	spread
/st/	as	in	stay	/sw/	as	in	swing
/ r/	as	in	throw	/kl/	as	in	climb
/wh/	as	in	why	/fr/	as	in	friend
/kj/	as	in	cute	/kw/	as	in	quick
/pr/	as	in	practise	/fj/	as	in	future
/gr/	as	in	grammar	/tw/	as	in	twenty

[See Appendix V for the whole list]

B. Initial Consonant Clusters: Three consonants

The following types of consonant clusters were found starting with CCCV.

/skw/ as in squirmy /str/ as in straight /stj/ as in student

The above lists [A] and [B] show that the initial consonant clusters having the syllable structure CCV and consonant clusters having CCCV are found to be used in the text book.

The consonant cluster in spoken Nepali is very rarely used. So a Nepali learner of the English language feels difficulty in learning English clusters such as /str/, /stj/, /gr/, /dr/, /gl/, /tw/ etc.

ii. Consonant Clusters in Final Position

Two, three and four consonants in sequence are found to be used at the final position of the words. They are presented below (See Appendix V).

A. Final Consonant Clusters: Two consonants

Final consonants clusters with two consonants found in the textbook are as follows:

/lz/	as	in	animals	/lk/	as	in	milk
/kl/	as	in	article	/1 /	as	in	nails
/sn/	as	in	exclamation	/zd/	as	in	used
/pl/	as	in	example	/mb/	as	in	climb
/nd/	as	in	understand	/ z /	as	in	clothes

/kt/	as	in	act	/ps/	as	in	crops
/sk/	as	in	ask	/ts/	as	in	eats
/dz/	as	in	friends	/nt /	as	in	inch
/fl/	as	in	powerful	/ls/	as	in	false
/ld/	as	in	old	/nd /	as	in	rearrange
/ns/	as	in	once	/tz/	as	in	letters
/ks/	as	in	ox	/n /	as	in	seventh
/tn/	as	in	eaten	/m /	as	in	sometimes
/st/	as	in	strongest	/v /	as	in	leaves
/pt/	as	in	attempt	/nd /	as	in	change
/ n/	as	in	occasion	/vn/	as	in	given
/bl/	as	in	trouble	/lp/	as	in	help
/nk/	as	in	blank	/ft/	as	in	left
/kn/	as	in	broken	/mp/	as	in	bump
/f /	as	in	fifth	/g /	as	in	legs
/vd/	as	in	lived	/1 /	as	in	falls
/v /	as	in	lives				

Note: [n] and [l] are syllabic contoids that function as a nucleus of a language.

B. Final Consonant Clusters: Three Consonants

Final consonant clusters with three consonants found in the textbook are listed below:

/mnt/	as	in	comment	/ gl/ as	in	jungle
/snz/	as	in	persons	/kst/ as	in	next
/nsd/	as	in	danced	/nts/ as	in	pants

/imz/	as	in	films	/ ks/ as	in	thanks
/fts/	as	in	gifts	/lvz/ as	in	wolves
/ndz/	as	in	hands	/mpl/ as	in	temple
/lpt/	as	in	helped	/snz/ as	in	conversations
/mpt/	as	in	jumped	/fnt/ as	in	elephant
/sts/	as	in	lasts	/gfl/ as	in	meaningful
/skt/	as	in	asked			

C. Final Consonant Clusters: Four Consonants

Final consonant clusters with four consonants found in the textbook are presented below.

/mplz/ as in examples /ksnz/ as in actions

The above lists [A], [B] and [C] show that the final consonant clusters having the syllable structures VCC, VCCC, VCCCC and VCCCC are found to be used in the textbook. There are only two words with VCCCC and VCCCC syllable structure. They are 'examples' and 'actions' respectively.

3.5 Vocabulary Items in Terms of Morphological Structure

In terms of morphological structures, the collected data were analyzed under the following sub headings:

3.5.1 Monomorphemic Words

Most of the words used in the textbook are monomorphemic i.e. having only one morpheme. Out of 683 total content words used in the textbook, 469 (68.76%) words are monomorphemic. Out of 322 nouns, 237

(73.60%) are monomorphemic. In the same way, out of 204 verbs, 146 (71.57%), out of 111 adjectives, 69 (62.16%) and out 46 adverbs, 17 (36.96%) are monomorphemic words.

3.5.2 Polymorphemic Words

Among 683 total words used in the textbook, 214 (31.33%) are polymorphemic. Out of 322 nouns, 85 (26.4%) are polymorphemic. Similarly, out of 204 verbs, 58 (28.43%) are polymorphemic.

In the same way, out of 111 adjectives, 42 (37.84%), and out of 46 adverbs, 29 (63.04%) are polymorphemic words.

Note: Words belonging to more than one word class have been counted as a single lexeme in 3.4.1 and 3.4.2.

Except inflected words (i.e. words formed through the inflectional suffixes e.g. film+s=films), two types of polymorphemic word are found to be used in the textbook. They are as follows:

A. Complex Words

On the basis of the structure of complex words, the following types of affixations are found to form the complex words in the textbook.

i. Single Affixation

A root with only one derivational suffix is found in some of the complex words. The structures of the complex words formed through single affixation process are given below.

Root+Suffix a.

Root		Suffi	X		Words
crack (v)	+	er	=		cracker (n)
quick (adj)	+	ly	=		quickly (adv)
quiet (adj)	+	ly	=		quietly (adv)
slow (adj)	+	ly	=		slowly (adv)
steady (adj)	+	ly	=		steadily (adv)
tight (adj)	+	ly	=		tightly (adv)
general (adj)	+	ly	=		generally (adv)
real (adj)	+	ly	=		really (adv)
act (v)	+	ion	=		action (n)
strange (adj)	+	ly	=		strangely (adv)
sweat (n)	+	ing	=		sweating (v)
win (v)	+	er	=		winner (n)
noise (n)	+	y	=		noisy (adv)
power (n)	+	full	=		powerful (adj)
slip (v)	+	ry	=		slippery (adj)
meaning (n)	+	full	=		meaningful (adj)
slow (adj)	+	er	=		slower (adj)
farm (v)	+	er	=		farmer (n)
run (v)	+	er	=		runner
excite (v)	+	ing	=		exciting (adj)
yellow (v)	+	ish	=		yellowish (adj)
good (adj)	+	ness	=		goodness (adj)
care (v)	+	full	=		careful (adj)
care (v)	+	less	=		careless (adj)
danger (n)	+	ous	=		dangerous (adj)
follow (v)	+	ing	=		following (adj)
love (v)	+	ly	=		lovely (adj)
				- 56 -	

final (adj) finally (adv) ly += normal (adj) normally (adv) ly brave (adj) bravely (adv) 1y +loud (adj) loudly (adv) +ly usual (adj) usually (adv) ly +teach (v) teacher (n) +er = beauty (n) beautiful (adj) full += punctuate (v) punctuation (n) +tion =

b. Prefix+Root

Prefix		Root		Words
a	+	live	=	alive
be	+	come	=	become
en	+	circle	=	encircle
en	+	courage	=	encourage
re	+	arrange	=	rearrange
re	+	read	=	reread
re	+	turn	=	return
un	+	happy	=	unhappy
un	+	tidy	=	untidy

Thus, altogether 43 complex words formed through the process of single affixation are found to be used in the textbook.

ii. Multiple Affixation

A root with more than one derivational and inflectional suffixes is found in three complex words. The structure of complex words through multiple affixation is given below:

Root+Suffix +Suffix

Root		Suffix		Suffix	Words
crack(v)	+	er	+	S	= crackers (n)
farm (v)	+	er	+	S	= farmers (n)
luck (n)	+	y	+	ly	= luckily (adv)

B. Compounding

On the basis of the head word (i.e. dominant constituent of the entire compound word), only 26 compound nouns are found in the textbook. The general structure of the compound noun according to Katamba (1993:323) is as follows:

$$N \begin{cases} N \\ A \\ V \\ Prep \end{cases} N$$

Among them the following ones are found to be occurring in the textbook.

a. N→NN

basketball	girlfriend
birthday	landlord
classroom	motorbike
cowshed	riverside
everyone	twenty five
everybody	fifty five
firework	twenty two
football	homework
forty four	toothpaste
pair work	

b. $N \rightarrow VN$

bathroom crossword breakfast

c. $N \rightarrow AN$

good morning good bye ice cream blackboard

The above mentioned examples clarify that out of 26 total compound words, 19 (73.08%), 3 (11.54%) and 4 (15.38%) are found containing a noun followed by another noun, a verb followed by a noun and an adjective followed by a noun respectively.

There is only one word (i.e. well done) containing an adverb followed by a verb found to be used in the textbook.

Moreover, there is a word derived from the process of reduplication in which the base is repeated. In the word 'hee-haw', 'hee' has been modified into 'haw'. So it is modified reduplicate word.

Beside these, on the basis of word formation process, there is only one word viz TV which is formed through the process of abbreviation or acronymy.

There are two more words which are formed through modification process. They are :

stand→stood where 'a' is replace by 'oo' tooth→teeth were 'oo' is replace by 'ee'.

CHAPTER-FOUR

FINDINGS AND RECOMMENDATIONS

4.1 Findings

The main aim of this research was to analyze the vocabulary items of major word class, used in My English Book IV by CDC, interms of total number, parts of speech, frequency of occurrence, phonological structure and morphological structure.

On the basis of the study and interpretation of the data, the findings of the present study are summarized below.

- i. Six hundred and eighty three vocabulary items belonging to major word classes were found to be used in the text. Among them 322 (47.14%) nouns, 204 (29.87%) verbs, 111 (16.26%) adjectives and only 46 (6.73%) adverbs were found in the textbook (See Appendix I)
- ii. All types of nouns (proper, common, abstract, material and collective) are found to be used i.e. 221 common nouns, 64 proper nouns, 8 collective nouns, 6 material nouns and 23 abstract nouns. Out of 322 nouns, 82 are used in singular form, 100 in plural form and 40 are used both in singular and plural forms in the textbook.
- iii. Some of the nouns like milk, colour, mistake, copy, park, ship, sound etc. are used as both nouns and verbs. Among all the nouns used in the textbook, most of them are concrete nouns. Thus, we can say that nouns are selected scientifically.

- iv. One hundred and thirty one transitive, 49 intransitive and 24 phrasal verbs are found in the text.
- v. Similarly, out of 111 adjectives, 83 qualitative, 19 numerical, 5 quantitative and 4 demonstrative adjectives are found.
- vi. Regarding the frequency of occurrence of the lexemes, the lexeme 'say' has the highest frequency of occurrence. It has occurred 84 times in its different forms in the text.
- vii. Most of the verbs are used in their present, past and continuous forms but a very few verbs are used in past participle and third person singular forms.
- viii. Both types of adjectives i.e. regular (like fat) and irregular (like good) type of adjectives are found to be used in the textbook.
- ix. Among 683 word forms 341 (49.93 are monosyllabic, 259 (37.92%) are two syllabic, 72 (10.54%) are three syllabic, 10 (1.46%) are four syllabic and only 1 (0.15%) is five syllabic (See Appendix-III).
- x. The words which have initial consonant clusters CCV and CCCV pattern and final consonant clusters having VCC, VCCC, VCCCC and VCCC are found in the text.
- xi. Syllabic patterns having syllabic contoid (i.e. <u>C</u>) for example little (CVC<u>C</u>) are found. (See Appendix-IV).
- xii. Both monomorphemic and polymorphemic words are found be used in the textbook.
- xiii. Both single affixation and multiple affixation are used to form complex vocabulary items.
- xiv. Compound words which are used in the textbook are formed through the process of adjective + noun, noun + noun, verb + noun and adverb + verb (e.g. well done).

4.2 Recommendations

On the basis of the findings from the analysis and interpretation of the data, the following recommendations have been made:

- i. There is not given the word list of vocabulary items used in the textbook. The list of vocabulary items should be given in the textbook so that the students would find the word meaning easily.
- ii. Regarding the use of nouns, some of them are used in their plural forms only. So the singular forms should be introduced before their plural forms.
- iii. The words consisting four or five syllables become difficult to pronounce for the learners of primary level. So the words with four or five syllables like 'vocabulary' should not be used in the textbook designed for the beginners of the foreign language.
- iv. The words with consonant clusters in initial position like 'squirmy' and final position like 'actions' will be difficult for the beginners of a foreign language. So such types of word units should not be introduced in the primary level textbooks.
- v. Some of the compound words containing a verb followed by a noun and an adverb followed by a verb and an adjective followed by a noun are found in the textbook. But for the primary level students, compound words which contain only a noun followed by another noun should be given. So they will feel easy to understand their meanings.
