## ACKNOWLEDGEMENT

This is my great pleasure to submit this thesis entitled "An Analysis of orange cultivation". This is prepared for the partial fulfillment of the requirements for the Masters' Degree in Economics.

It is the most remarkable moment in my life to have a warm contact with my most respectable and honorable teacher Mr. Ananta Kumar Mainaly associate Prof. lecturer, Central Department of Economics, Tribhuvan University, whose valuable guidance and instruction made the study felicitations adventure for me. Though my attempt to honour him would be inadequate, I would like to express my deep sense of gratitude for his valuable suggestions, advice, genuine guidance and supervision of this work.

I am very much grateful to Prof. Dr. Madhavi Singh Shah, the head, Central Department of Economics and other respected teachers of the Central Department of Economics for providing invaluable suggestions, information and co-operation.

I want to extend my thanks to all the staff of Central library, Kirtipur and District Agriculture Office, Syangja for providing invaluable suggestions, information and co-operation.

I am highly indebted to my parents who supported me in many ways to arrive to this stage for completion of Masters' Degree thesis. I would like to express the heartiest debt to my wife Chandrakala Regmi for her strong encouragement and help for this work. Similarly, I am thankful to my friends Nar Bahadur Poudel, Deepak Aryal, Madhav Pande and all my friends for their help and co-operation.

I would like to express my thanks to Wowids Computer System for typing, printing and binding this thesis.

Lastly, I have to say I alone bear the full responsibility for any errors and discrepancies that might have occurred in this thesis.
